

## **Our Company**

We have been producers of classic, semi-classic and casual men and women shirts for over 40 years.

We are a family company and the founder Mr. Giovanni Rosmini still works in the company with his wife and his two sons.

Our showroom and production seat are located in Città di Castello (PG, central Italy) near Perugia and Assisi and not far from Florence and Rome.

Our daily capacity is 400-500 units with a structure of 40 employees (factory and office workers).

Our shirts are the expression of a 100% Made in Italy product with particular attention to style, finishing details, fabrics and final presentation of shirts.

## **Our Product**

### *Types of Shirt Constructions:*

We have two main types of shirt manufacturing methods for our shirts :

- Semi-classic (side and underarm with twin needle seam). This manufacturing can be requested both with a classic look of shirt and with some style details such as contrast fabrics, rat tail piping, soft collars , washed effect, evening shirts. It is possible to match colored buttons, contrast buttonhole and button thread, washings, embroideries and so on.
- Classic/Sartorial (side and underarm with one needle seam). This shirt is manufactured with some artisanal details and with the possibility of handmade passages (for instance handmade stitching of armhole, thermal button wrapping) This line is based on classic shirts with refined fabrics and in general these shirts are requested without contrast fabrics, washings and so on.

### *Types of business relationships*
