FRATELLI  
**GROPPPO**  
ARREDAMENTI  
DAL 1946

---

Founded in 1946 in Sommariva Bosco, Italy, Fratelli Groppo is a company born from the passion of a family of carpenters with the aim of proposing **custom-made furniture for commercial establishments**.

Over the years, the company has adopted a philosophy destined to merge the qualities of an artisan laboratory with those of an organized company capable of combining the excellence of the craftsmanship product with the attention in terms of controls, safety, and respect for the environment, typical of the industrial dimension.

**More than 75 years** since its birth, today at the top of the company are the brothers Elio and Livio, who with Livio's son Giuseppe manage a group of 25 employees plus as many collaborators specialized in **custom-made commercial furniture**. Great attention is paid to the skilful integration of modern design and production technologies with the creativity and originality of the **Made in Italy**. Furthermore, the direct relationship with the customer and a timely after-sales assistance summarizes our style.

# CUSTOM-MADE PROJECTS

Groppo provides a complete service starting from the customer's needs and architects' tastes. For any environment the objective is proposing cutting-edge solutions within a clever mix of experience, professionalism, and technology, paying particular attention to the economic sustainability of the projects. The organizational flexibility and the innovation are the cornerstones our activities are based on. These characteristics make us capable of carrying out and managing even particularly complex orders.

# TURNKEY CREATIONS

The structure and the internal organization developed over the years allows Groppo to act as the only interlocutor to rely on in order to fulfil any furnishing requirement. The main processing of materials is carried out within the company in specialized departments. The furniture is fitted by qualified installations teams, while for the post-fitting period Groppo provides the customers with a support service. We have always stood out for the timely manner we comply with the production schedules, and we conduct the fitting of the furnishing items.

# TRUSTWORTHINESS AND RELIABILITY

For over 75 years we have been acknowledged by the market as capable and reliable in delivering on our promises, making the objectives of our customers our own. Being consistent with the schedules is the key to become the protagonist of successful projects. This is thanks to the ongoing search for new solutions and a wise management of problems which may arise while working on site. One of our engineers will be appointed to the project, they will be the point of reference during the various stages, and they will be the person to turn to for any information and in-depth analysis.

# MATERIALS FIRST

We have no limits in the choices of materials that may range from metals, synthetic resins, plastics and ceramics. The wood is used in all its types and shapes, from solid wood to agglomerated and veneers to obtain "textural" surfaces and convey new sensations.

An area of the company specializes in the processing of metals, stainless steel and in the production of custom-made refrigerated display cabinets. All the materials we offer are carefully selected with absolute respect for the environment.

the customers we provided furnishings in the last 10 years

# FOOD SHOPS

Arts and crafts at the service of your prestigious products: traditional recipes intertwined with modern techniques for experiences to be consumed daily.

Continuous search for tools to improve exposure and capture attention, skilful use of light to enhance environment and detail.

# RESTAURANTS & BARS

Beyond food. The restaurant is visioned as a place to savour a dish, experience a territory, and meet a culture. The bar expresses specific moments: the good morning with every coffee and the start of the evening with the toast of the aperitif. Groppo studies and designs new spaces, capable of enhancing history and the future to come, where men and women experience not only the pleasure of food.

# WINE

The lighting and furnishings designed and crafted with sartorial care create an environment in which wine is the star. The sensations perceived upon entering these premises are those evoked by a good glass of wine: personality, elegance, passion, and emotion that envelop the customer, creating a single space-furniture-experience-sold product.

# MORE PROJECTS

Grosso takes care of every single detail in the setting, giving shape to an aesthetic and sensorial balance in various environments. Grosso wants the customer to feel "at home" in each scenario we create.
