FOUNDRIES ALUMINUM in SAND – DIE GRAVITY – DIE CASTING From ideas/project to finished product quality ISO 9001

Foundries qualified partner of companies that they confirm having advantages to work from ideas or existing products for:

CUTTING cost, stock, lead time and time to market	IMPROVE LEVEL qualitative and service
PROJECT TECHNICAL support	ADVANTAGE management supply chain
codesign and engineering products/services	INCREASE competitiveness on the markets

Contact us for analysis, evaluation, proposals for your:

Aluminum in sand – die gravity and die casting Aluminum castings machined Prototype aluminum Advisoring and engineering

Also if existing patterns.

FOUNDRIES ALUMINUM MARKET and PRODUCTION

Factory certified to the vanguard, modern and with experience have continuously invested in technological resources for offer to own customers collaboration, competitiveness, quality and support.

CASTINGS

Partner of companies in automotive, actuators, compressors, explosion-proof, gear box, lighting system, motorcycle, plants distribution energy, valves.

ENGINEERING

Co-design and technical support Development concept, products and process Prototypes and construction patterns

ADVISORING

Advisoring and technical training activities on materials, technologies, design, production, supply chain to customers and suppliers on various projects. In partnership with business and professional associations.

FOUNDRIES ALUMINUM PLANTS and SERVICES

Factory certified and qualified from Customers.

Modern companies with experience have continuously invested in technological resources for offer to own customers competitiveness, quality and support. For productions of prototypes to series in little, medium and large dimensions we have available:

AUTOMATIC LINES in SAND

dimensions mm. 600x700 and 650x800 with robot

MECHANIZED LINES in SAND RESIN

dimensions up to mm. 1500x1500

DIE GRAVITY (also with core inside)

max mm. 800x800 and weight kg. 20 cad. piece

DIE CASTING

max mm. 550x600 and weight kg. 1,5 cad. piece

CORE SHOP - FINISHING and LABORATORY

Also in our core shop – furnaces – heat and superficial treatment and finishing department, the phases of the production processes / controls are carried out in factories, ensuring quality and timeliness.

We make quality control and mechanical tests in our laboratory (quantometer durometer, traction, fluoroscopy, X-ray).

SERVICES

We supply the castings in any series, weight, dimension also:

Machined

Thermally treatments

Painted

Prototypes and series pieces machined on automatic C.N.C., manual machine from the idea, design or project in standard and special materials.
