Toilet seat lift PRO-LIFT

Professional aid to help disabled and elderly

When use the electrical TOILET SEAT LIFT?

PRO LIFT is a toilet seat lift designed for elder people and for anyone suffering from limited mobility for diseases or injuries; PRO-LIFT can really helps these people to retain their autonomy in the bathroom safe and comfortable.

PRO LIFT is a medical device that can make up for certain physical limitations. This device can help eliminate some of the stress and strain on your joints when you go from sit to stand; just think for example how difficult and painful is for people with arthritis getting from sit to stand!

The toilet lift "PRO-LIFT" is available in 3 different types. Mechanically and aesthetically they are the same; they only differ from each other for the feeding:

- **Rechargeable Battery power SILVER**
This type is particularly fit for domestic and private use.
- **Supplied by mains current 230V GOLD** This type is suitable for users who do not want to care of battery charging.
- **Supplied by mains current 230V + buffer battery PLATINUM**
This type is particularly suitable for users who do not want to care of battery charging, being granted anyway the full working even in case of temporary power failure.

The user, standing in upright position and simply leaning on the toilet seat, is gently lowered and then raised, effortless, safely, independently, while always keeping his feet on the ground.

PRO-LIFT is produced in Italy by MIBA SRL

Toilet seat lift PRO-LIFT

“Sit to stand” easy and safe. Retain your autonomy

Arms (every model)

Arms (standard supply) are ergonomic-shaped to guarantee the highest comfort and **confidence** to the user. Up-down buttons control are made of two light buttons easily operated while keeping holding the arm. Up-down buttons control can be either on right or left arm according to user's request.

Friendly user (every model)

On the arm supplied with up-down buttons control, you can also find the on-off button. Even this button is light to guarantee the highest safety.

Rechargeable Batteries (SILVER model only)

30 to 50 cycles with full loaded battery

Silver model works by means of a lithium-ion battery that guarantees a very long endurance (30 to 50 cycles according to user's weight); it takes about 3 hours to recharge the battery. However, Silver is supplied with two (2) batteries thus allowing a continuous operation. The battery replacement is very very easy and fast (see picture on the left); this operations only takes a few seconds.

NO cables (SILVER model only)

Thanks to battery power, Silver has no electric wires.

Lifts up
**330
lb**

Useful space
46 cm (expandable)

Adjustable

- The seat can be stopped in any position you want between the minimum and the maximum height allowed.
- The arms (standard supplied) can be reclined backwards to allow user more freedom to move.

Anatomic

- Pro-Lift moves up and down gently and slowly reproducing the natural moving of our body.
- Pro-Lift reduces or even eliminates the need to be assisted by auxiliary personnel.

Noiseless

Thanks to two lifting silent actuators, self-lubricating axle-bearings, sound-proofing carter coating, the lift PRO-LIFT is highly noiseless.

Height from ground (95 cm) in upper position

Rear bar to fix the PRO-LIFT device to customer's vessel
