COVERS

TOE COVERS

SHOE COVERS

Thanks to a highly qualified workforce and skilled designers your products will ensure great performances, feature hi-tech characteristics like multi-layer structures, specific protections, reinforcements, ventilation areas, special selections or applications that will make your product unique!

YARNS

All our yarn suppliers are certified OEKO TEX

and do follow REACH standards.

We work with many different fibers:

- natural (cotton, merino wool, cashmere, silk, viscose, lyocell),
- synthetic (polyamide, polyester, polypropylene, elastane, acrylic, polyethylene)
- artificial (reflective glass fiber, carbon, copper, silver)
- as well as special printed yarns.

Recycled yarns are GRS certified

organic cottons are GOTS certified

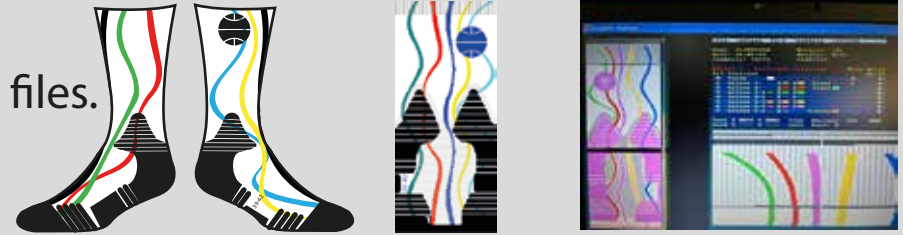

and merino wool is RWS certified.

PRODUCTION PROCESS

All production steps are carried out by our professional workforce in Italy.

We transform your ideas in pixel designs and prepare chain files.

We collect all necessary yarn cones and start knitting.

In the meantime, we suggest you some custom packaging solutions and process the order.

Once knitting is finished, socks are ironed and only those that pass our quality control ...

... will be packed according to the client's request and will be ready to be shipped.

Our high standards and decades of experience is a guarantee for your products.

SUSTAINABILITY and ENVIRONMENT

We care about our environment and do our best to have the least impact on it.

We have just renewed all our implants of air suction, air compression, electric cables, and light bulbs to reduce air leakage and energy consumption.

Most of our energy is CO2 free thanks to a 150 Kw photovoltaic system.

We offer socks made with recycled or sustainable yarns.

We recycle all our yarn production waste using it as padding to produce a new product.

We are storing in our facility all the textile waste that we still do not know how to recycle. But we are studying a way to reduce it in small chips and use as padding for dolls.

We acknowledge that we can only be economically successful in the long term if we also act in an ecologically and socially sensible way.

VALUE ORIENTED FAMILY BUSINESS

We believe in long-term working relationship with all our employees. We care to offer a safe, comfortable, and friendly working environment, where our staff can feel home. In fact, being a family business, we feel our company to be our home, and we want our employees to feel part of this family. Our fortitude lies with our employees, we achieve goals together and each person plays a fundamental role in the business.
