REGENESI

## ABOUT US

Breathing new life into unwanted material, from aluminium to paper, from plastic to leather, the Regenesi portfolio boasts of elegant transformation from rejection to desire. Casting a new light on renewable product, reincarnating the discarded to live once again as objects of desire.

We transform the remnants of a consumeristic society into products of exceptional quality, timeless style and genuine aesthetic value. To make the world a better, more beautiful place.

### SUSTAIN BEAUTY

Don't we all deserve a second chance? Aluminium, leather, plastic, cardboard and rubber; raw materials regenerated with new processing techniques that ensure quality standards identical to those of virgin (original) raw materials to which is given a second chance. Our every single object, carefully made by hand by skilled Italian craftsmen, is produced beautifully, with full respect for man and the environment.

### THE IDEA BEHIND THE PROJECT

*Maria Silvia Pazzi | CEO Regenesi*

I had a dream and put together a group of people who could help me to achieve it. In this way, in 2008, an unorthodox company was established with the ability to give new life to old materials, by developing unique, beautiful, exceptional products.

REGENESI

REGENESI

DESIGNER

INTERNATIONAL, HIGH DESIGNERS EMBRACE THE CHALLENGE OF CIRCULAR ECONOMY BY CREATING SUSTAINABLE AND ETHICAL ITEMS IN UNIQUE STYLES.

MATERIALS

PLASTIC

The material is made from 100% recycled and recyclable plastic (no additives or new resins) and each sheet has a 40% smaller carbon footprint than one from virgin material. The white version is produced by the regeneration of the inner parts of scrapped refrigerators. The dark version is produced by the regeneration of disposable coffee cups from vending machines.

A 100% recycled aluminium surface; it consists of post-consumer recycled cans. As with all types of recycled aluminium, by using it we save 95% of energy, when compared to virgin aluminium.

ALUMINIUM

PAPER

High quality recycled, uncoated papers and boards with 40% de-inked post-consumer FSC fibre, 55% pure environmentally friendly FSC pulp and 5% of cotton fibre. This material is completely biodegradable and recyclable.

Mixed-wool fabric products with more than 70% from the regeneration of textiles and knitwear (clothing or scrap textile) and certified "Carded Regenerated CO2 neutral". The regenerated leather is entirely made of natural and regrowing raw materials: genuine leather fibres tanned with vegetal substances, natural colouring agents and salts.

LEATHER & FABRIC

WE BELIEVE IN BEAUTY, IN DESIGN  
AND IN SECOND CHANCES

Bringing discarded material back to life and transforming into designer goods, and then wrapping with 100% recycled material is at the core of Regenesi's values. Giving life back to our environment. All the items are crafted using recyclable materials, following an innovative production process guaranteeing the same quality as the raw materials. Being the best we can, looking the best we can and choosing to make the world a more beautiful place to live in.

*Good design comes to the essence of things. It makes the complex simple and reveals it to the world in a playful, smart and functional way.*

## FRUIT BAG

The classic daily shopping bag rises in rank and becomes a real leather shopper. Its delicate and refined profile transforms it into an object of desire strictly "Made in Italy", created by skilled artisan hands and marked by the creativity of Setsu & Shinobu Ito, an internationally renowned designer.

## MSP

A beautiful and sustainable daily bag. MSP is made of regenerated leather. Practical, soft and roomy with a wooden closure and a protective bag in regenerated wool that becomes a design cushion cover. Handmade by Italian artisans, it is also perfect for special occasions, with a version embellished with handmade graphics with particular pictorial effects.

## DESKOFFISET

The DesKoffiSet is a family of three useful elements to accompany the work table. The essentiality of their shapes is given by the composition, through simple joints, of two-dimensional shapes made from sheets of post-consumer plastic material.

## THE OFFICE SET THAT IS AMAZING

## ALUTABLE

Alutable is a line of products made entirely from satin-finished reconditioned aluminum and 100% recyclable. The exclusive decorative lining that characterizes all the objects in this line gives aluminum unique three-dimensionality and warmth, giving it a more natural appearance and making it suitable for lighting and heating the table.

### O-RE-GAMI

The o-Re-gami line offers decorative and functional objects, inspired by the lightness and romanticism of origami. The o-Re-gami line is composed of lamps, basket and centerpiece, all made exclusively with regenerated leather without the use of glues, and are therefore recycled and 100% recyclable.
