

TO RNERIA FANTI R.

CNC MACHINING

ISO 9001
ISO 14001
IATF 16949

FANTI COMPANY HAS MORE THAN 80 YEARS OF ACTIVITY.

Many show up themselves with “new solutions”.

We, simply, concretize them.

Fanti company was born in Turin in 1938 by Fulvio Fanti. Then it passed into the expert hands of his son Renato and now, there is the third generation: Claudia and Fulvio.

They are all united from the same feature: the passion for work and the take care of Customers. Today, into the 4.0 Industry revolution we catch the challenge and we work for being always more efficient with the support of technology.

Many “expand themselves”

We, simply, grow up with you.

We are modern artisans: without forgetting where we started, we are committed to welcoming the endless opportunities of the industry. For this, in 2005 we went in a new area of 2.500 square meters, to give the right space to customers needs.

COMPETENCE AT YOUR SERVICE.

Experts call it “competitive advantage”.

We, simply, call it good job.

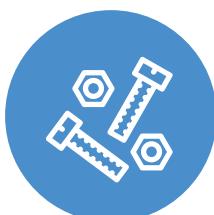

Our precision mechanical machining, from simply screws, pins, washers to more complex products, start from your specific details...all the precision small parts that go out from our plant have inside a world

EACH PIECE CONTAINS PART OF OUR EXPERIENCE.

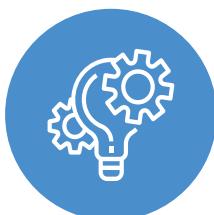

The realization

Starts from the customer needs, from his drawing. In each step of production, we give maximum collaboration and communication.

The machining

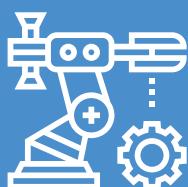

According to the customer's specifications, we carry out mechanical machining such as turning, milling, drilling, boring, tapping and threading. We have also a consolidated network of suppliers for treatments and other machining that your product need.

The evolution

Our history is made of technological updates and skills.

Since 1991, year in which we bought our first CNC lathe, our attention to technology is not change, guiding our investments to the improvement of work and services.

Machine tools

We have the most modern CNC lathes and Machining Centers. We can machine from Ø4 mm to Ø80 mm, for the realization of products in iron, steel and its alloys, inox, aluminium and brass. To complete the mechanical machining we have all the machines for second operations and measuring instruments such as optical measuring machine (MTL 500 EVO), 3D measuring machines, profile projectors, profilometers, hardness testers, altimeters, surface roughness testers.

We have also a packaging system, a washing machine and a platform scale.

BUILDERS OF QUALITY, PIECE AFTER PIECE.

There is who is adjusted to "market needs".

We, simply, adapt to you.

Quality should never be taken for granted and for doing this, we have improved. We have innovated.

1

The good job is certified.

We are certified ISO 9001:2015, IATF 16949:2016 and ISO 14001:2015. For us are important the quality of job, the wellness of our workers and the welfare of environment.

2

The precision is important.

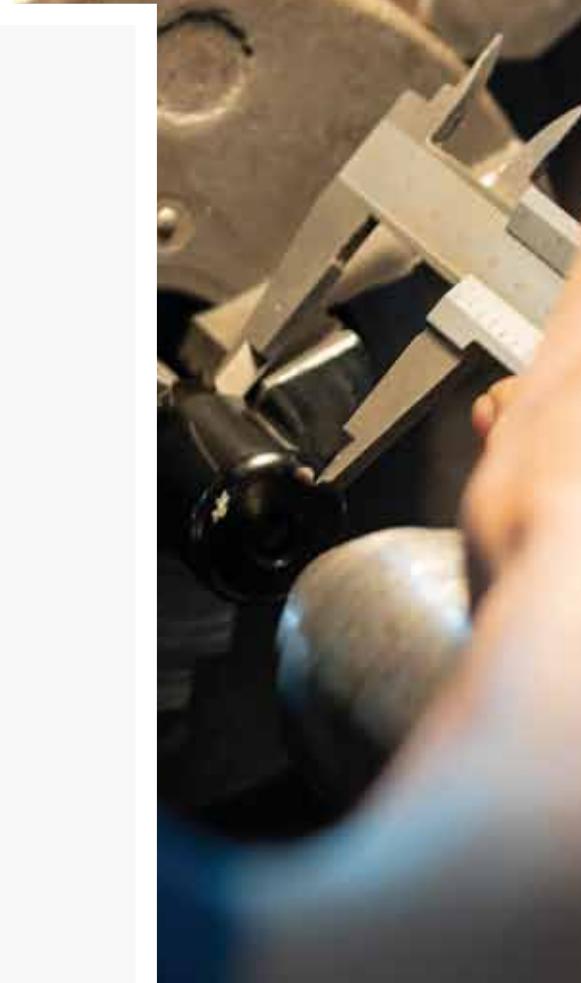

We have a metrological room where we calibrate the instruments used in production area for dimensional inspections.

We also lean on LAT centers.

3

**Always close to you,
expanding our borders.**

You can find us to the biggest sector fairs and our sales department is always on trip to visit Customers and Company that want work together.

WE PRODUCE YOUR PROJECT.

Many talk about "attention to the service".

We, simply, make all for you.

Our team is also yours: in fact, during the years we added many services designed on customers' needs.

COMMERCIAL

Do you need rapidity in requests management?

We offer it.

We reply and manage them in 24 h.

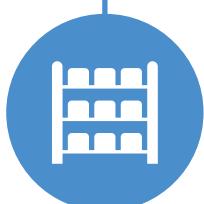

LOGISTIC

Do you need precision flows?

We offer them.

Thanks to technology and to software introduced into management system, we have the whole traceability of products, from the arriving of raw material to delivery and a planning system that allows us to escape quickly the Customer requests. Your delay is our problem.

WAREHOUSE

Do you need an "intelligent warehouse"?

We offer it.

Customer friendly.

Optimizing spaces through Modula warehouses, we are able to meet the needs of each customer, in terms of space, service level, storage.

Our packaging system gives us the opportunity to personalize the packaging according to the product specifications.

**TORNERIA FANTI
THE CUSTOMER IN THE CENTER
OF OUR THOUGHTS, ALWAYS.**
