# Tradition, innovation and experience

It's from 4 generations that the Carillo Group - founded in the early **1900s** - is a textile company in constant evolution, able to compare wide distribution scenarios, to guarantee production with a high design content and to conform to the highest quality standards. We are an ethical company where human values are at the first place along with the investment for innovation and evolution of working processes. Being flexible and fast is our daily goal.

WAREHOUSE

Our company stands out in the world of curtains because of the huge number of references in stock and the fast delivery time for cut service. Our state-of-the-art warehouse is the second largest in Europe in terms of size, technology, and automation. We also boast an excellent operating system at the complete disposal of our customers, which makes them autonomous in all business processes, from order loading to order tracking. Our textile sampling combined with our management system allows each of our dealer partners to have total access to our stock on hand.
