MADE IN ITALY CONCRETE PIPE MACHINES SINCE 1927

THE COMPANY

MARIO CROCI & FIGLI s.r.l. is a manufacturing company in northern Italy, operating since 1927, specialized **in the design and manufacture of machines and equipment to produce concrete pipes, mixer and batching plants**, 100% made in Italy.

Over a period of nearly 100 years **MARIO CROCI & FIGLI s.r.l** has acquired wide and specific experience in the field, achieving the manufacturing of high-technology machines able to meet the needs of the worldwide market for the concrete pipe production.

All machines are designed by our technical department, equipped with 3D CAD systems, and they are made by means of the most up-dated tooling machines and equipment. All components used are chosen carefully taking in consideration their reliability and strength.

The countries in which **MARIO CROCI & FIGLI s.r.l** operates are in the European Union, in Africa, in Central and south America, in Oceania and in Southeast Asia. In particular, the Thai market is strongly developed thanks to a well-organised sales network.

CORE BUSINESS PRODUCTS

CONCRETE PIPE MACHINES

The automatic and semi-automatic **MARIO CROCI & FIGLI s.r.l.** concrete pipe machines, using the press-vibrating principle, allow the production of reinforced and unreinforced concrete pipes with different shapes and with dimensions and length as per customer requirement. Production of pipes with liner is also possible. With the automatic machines, depending on pipe size, multiple and mixed production is possible.

OTHER PRODUCTS

MIXERS

Counter current mixers C.I. with rotating tank to produce all types of concrete used in the precast industry. They allow short mixing time, homogenous concrete, reduced wearing, low power consumption.

BATCHING PLANTS

Batching plants for concrete production are designed and built according to customer's requirements. Fully automatic running.

OVERHEAD BUCKET

Overhead bucket running on bi-rail straight or with shapes. Discharge by bottom dump opening or rotating. Traction by means of electric motors controlled by inverter allowing high translation speed.

ADVANTAGES

- Great experience in the sector going back three generations
- High quality standards and long life of the products
- Easy use and reliability of the machinery
- 100% made in Italy (produced in our own factory in Varese)
- Excellent cost effectiveness
- Wide products range and customization possibilities
- Flexibility
