ARLECCHINO

Captive,
Interact and Promote

An elegant and versatile device

Arlecchino is a next generation multimedia device and at the same time it is an object of luxury design with a strong character, easily adaptable to different contexts and customizable according to different needs. Stable and robust, Arlecchino is aggressive and elegant at the same time.

Open your imagination for limitless selections of colors, materials with Arlecchino you can have an exceptional piece of Italian designs, which is consistent and unified into a symphony with today's technology and the future.

Adaptive design

Adaptive design identifies Arlecchino's soul as has been created to well fit in any kind of luxury environment. It can be assembled as totem or lectern thanks to its special designed joints, in order to have a very flexible system.

These fine alloy elements can be customized in any color and give a very personal feature to the whole structure.

One more great effect feature of the adaptive design is its interchangeable panels that can be selected in different finest materials.

You will have the option to choose between technology surface as carbon or finishing in real wood or leather in their multiple possibilities or either with more luxury details on request to make your Arlecchino unique in the world.
