COMPANY

---

# WHO WE ARE?

Since 1979 Comall International has been a reference point in the design and production of pneumatic punching machines for aluminium profiles.

The company offers a wide range of extremely versatile and high performance punching machines, capable of satisfying the needs of suppliers and extrusion specialists all over the world.

Active collaboration with these entities has enabled Comall International to specialise in the punching machine sector and continue to offer innovative technological solutions.

# COMALL FRANCE

Comall founded Comall France to respond better to the needs of the French, Belgian and North European markets.

The presence of Comall France guarantees Comall quality in these geographical areas.

Technical assistance and installation of the machines is carried out by staff trained at our parent company in Reggio Emilia.

The French company specialises in the automatic punches sector, for which it can also count on its own R&D department.

# THE OFFER RANGE

---

## **PUNCHING MACHINES**

The production of a punching machine arises from the close collaboration between the manufacturer of ranges of aluminum profiles for doors, windows and facades (ranger) and Comall International. With over 40 years of experience, Comall is able to offer multiple solutions and technical advice on how to best work the range.

---

## **LOGISTIC LINE SYSTEMS**

In order to be In the front fine In workshop logistics too, Comall has extended its range to include the "Logistics Line systems", with state-of-the-art products and equipment for solutions increasingly tailored to users' needs.

---

## **THERMAL BREAK TTK**

The thermal break section is obtained by joining of two extruded aluminium sections with two polyamide bars, the results is a HIGH-PERFORMANCE thermal insulation

---

## **SILVER LINE**

The thermal break section is obtained by joining of two extruded aluminium sections with two polyamide bars, the results is a HIGH-PERFORMANCE thermal insulation

# GROUP

---

# THE FOM GROUP

---

Fom Industrie, founded in 1972, is a leader in the cutting and machining of extruded aluminium.

The company offers a range of high technology machine tools that is one of the broadest on the market.

The range varies from automatic cutting and machining lines, to 3-4-5 axis work centres, single and double head sawing machines and traditional machines.

Since 1989, when the first branch was purchased, Fom Industrie has expanded on the world market, investing in businesses with innovative know-how.

The Fom Group currently consists of 9 manufacturing companies, 10 sales branches worldwide and 55 official distributors. This network of businesses is structured to allow 360 degree management of all phases in the window manufacturing industry supply chain. It is able to offer additional and complementary services for the machines supplied, such as workshop logistics and specific software applications developed entirely by its own software house.
