MARMI FAEDO

Dal cuore della Valle Agno, tra il comune di Cornedo Vicentino e Valdagno, sorge una cava da dove viene estratto un materiale unico al mondo, lastre screziate da sfumature sorprendenti, inconfondibili per bellezza e resistenza. Nasce così il Marmo Grolla, estratto in esclusiva da Faba Marmi s.r.l., proprietaria della sola cava esistente.

Studi scientifici dimostrano infatti che la sua zona di estrazione coincide con l'unica area del Veneto vulcanizzata, all'origine di intrusioni basaltiche che hanno conferito al materiale caratteristiche tecnico-meccaniche di assoluto rilievo.

Il Marmo Grolla, è costituito per il 98% da carbonato di calcio ed è dotato di particolari caratteristiche fisicomeccaniche che ne permettono l'uso in ambiente esterno anche in zone climatiche difficili.

Il basso assorbimento d'acqua, la resistenza all'invecchiamento in presenza di umidità, la resistenza chimica alla salsedine e ai sali per piscine fanno quindi del Grolla un marmo ideale per l'utilizzo in esterni. La resistenza all'abrasione, alla flessione e alla compressione, in particolare, lo rendono indicato per le pavimentazioni e rivestimenti a parete.

L'Azienda Marmi Faedo S.p.A., forte di una lunga tradizione familiare che prosegue da tre generazioni, fornisce al committente un servizio completo: dai lavorati finiti su disegno alla consulenza tecnico-progettuale, dall'assistenza in cantiere sino alla posa in opera con l'ausilio di maestranze altamente specializzate.

In the heart of the Agno Valley, between Cornedo Vicentino and Valdagno, there is a quarry which extracts a one-of-a-kind material in mottled slabs of amazing shades, unique for its beauty and resistance. This is how Grolla is born. It is excavated exclusively by Faba Marmi Srl, the owner of the only existing quarry.

In fact, scientific studies show that the area where it is extracted coincides with the unique vulcanized Veneto area and the origin of basaltic intrusions that have given the material significant technical and mechanical characteristics.

Grolla hard limestone is 98% calcium carbonate and has special physical and mechanical features that allow it to be used outside, even in areas with harsh climates.

The low water absorption, resistance to ageing from humidity, chemical resistance to saltiness and pool salts, make Grolla an ideal stone for external use. The resistance to abrasion and compression and its elasticity, in particular make it suitable for floors and wall cladding.

Marmi Faedo S.p.A., with its long family tradition that has continued for three generations, provides complete service to the customer, from products made according to a design to technical and design consulting and from construction site assistance to installation, with the help of highly specialized workers.

La molteplicità delle superfici

Il linguaggio del Marmo e della Pietra trasmette autentiche vibrazioni e si esprime da secoli in forme di poetico stupore in quanto da sempre elegante, raffinato ed affascinante.

La natura crea armonia: il marmo è armonia naturale, un equilibrio perfetto tra forma e colore, fondamentalmente uguale ma sempre diverso, come l'erba ed i fiori dei campi: impercettibilmente dissimili ma esteticamente unici.

E non è tutto, perchè il carisma della Materia si esprime anche attraverso le sue molteplici e fantasiose lavorazioni superficiali, un vero e proprio valore aggiunto, una potenzialità espressiva incomparabile che si coniuga perfettamente con la varietà degli impieghi.

The different surfaces

Marble and stone language transmits authentic vibrations and it is expressed for centuries in poetic wonder forms, as always elegant, refined and charming.

Nature creates harmony, marble is natural harmony, a perfect balance between shape and color, basically the same but always different like flowers and grass in the field: subtly similar but esthetically unique.

And that's not all because the charisma of Matter is expressed through its various and imaginative surface treatments, a real added value, an incomparable expressive potential that fits perfectly with the variety of uses.
