

Daniel&Bob

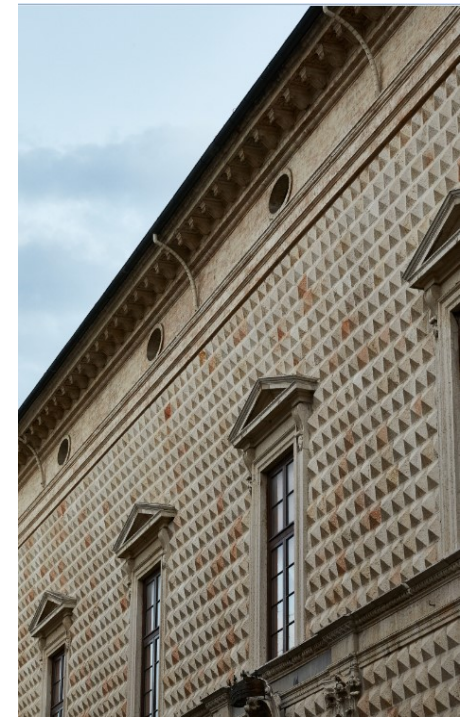

FERRARA ITALY

## The company / The brand

Daniel & Bob was founded in 1976 in Ferrara, a historical town from the Renaissance era located in the north east of Italy.

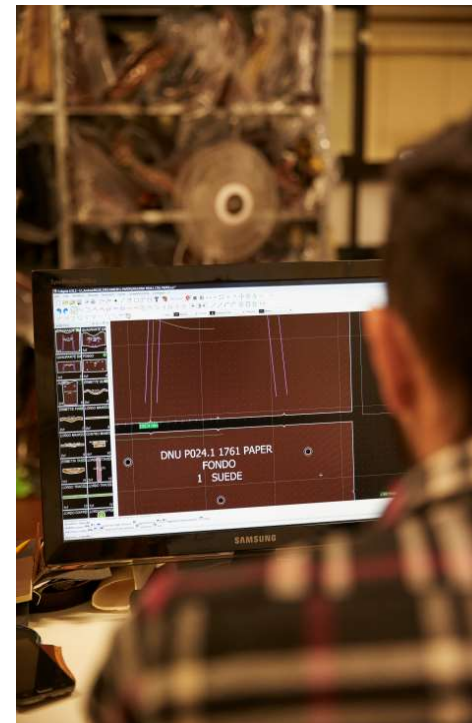

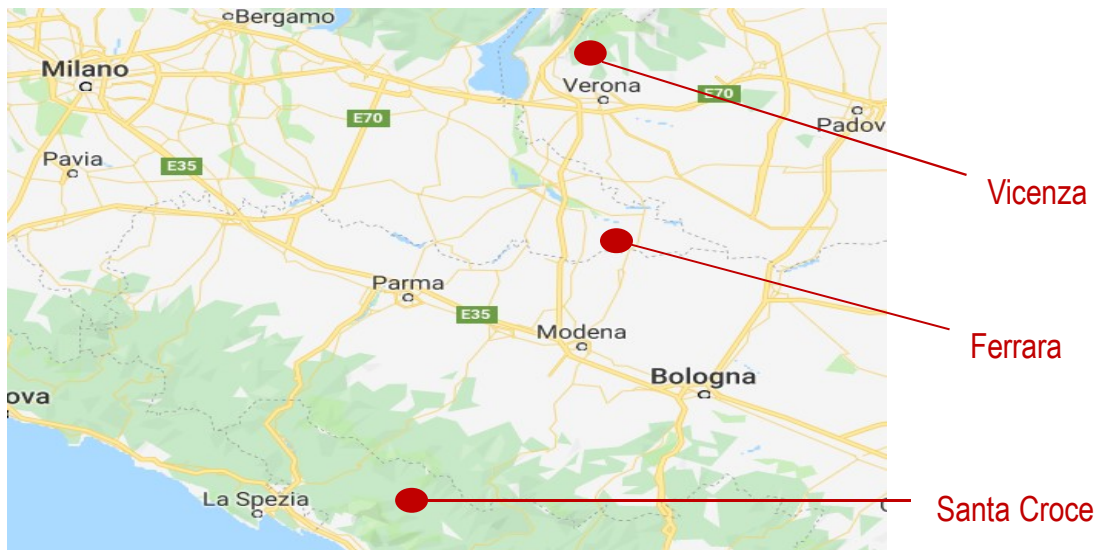

Since these early years as a small artisan enterprise Daniel & Bob have been enthusiastically appreciated and supported by people who shared the same passion for quality of materials and craftsmanship. This is the true heart of the brand that has remained unchanged as the years went by and the company established itself more and more.

Daniel & Bob factory in Ferrara is located in a very strategic position. It lies in between “Santa Croce” (close to Firenze) where most of the leading Vegetable tanned leather tanneries are, and “Vicenza” where many of tanneries specialized for technical tanning are working. This enables the company to keep very close relationship with leather suppliers in order to research and develop its original materials.

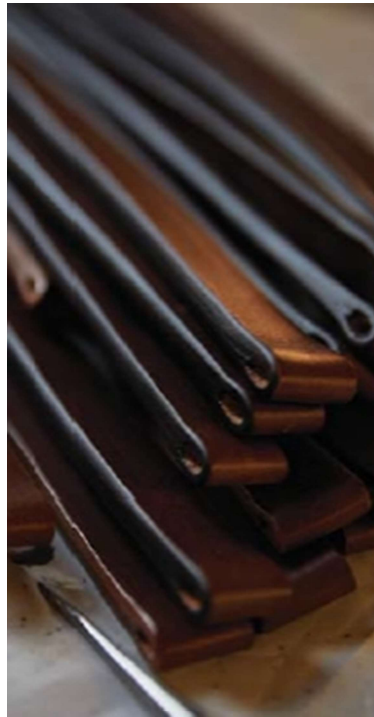

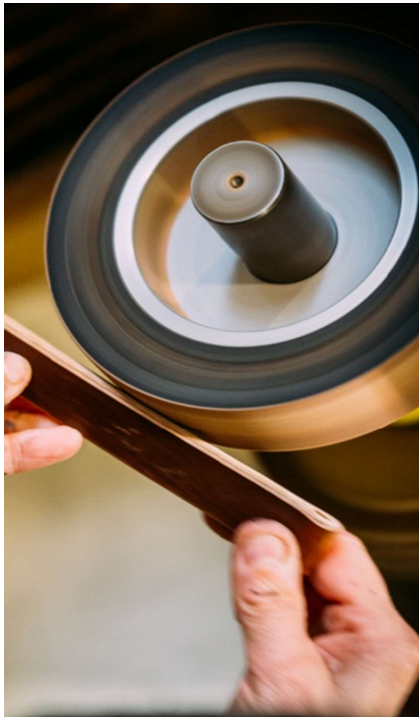

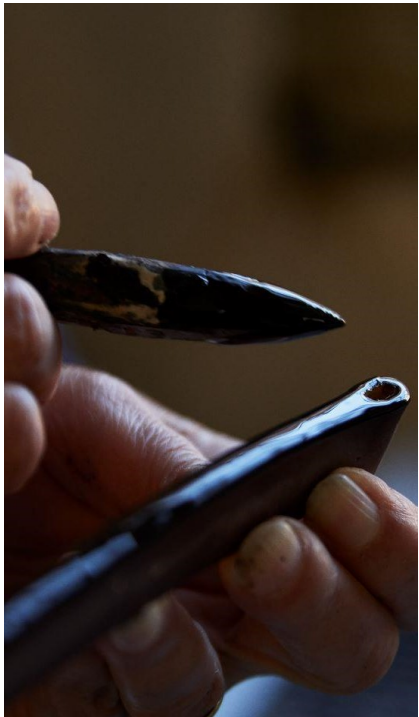

Every single phase of production is happening within the same building/ workshop, from the early sketches, up to the final product, creating a synergy and prompt feedback among all the different departments: from the Technical and Design department to the Production units up to the Quality Control and Packaging department.

## The style

Daniel & Bob bags and accessories are oriented to those Men and Women who are looking for a luxury accessory that is elegant but sober, with strong personality but never pretentious.

This idea is reflected in every detail, from the shape of handles up to stitching, so that the design is creative and elegant but always functional to the comfort of the user and the product durability.

As well as its own collection, our company also has a great expertise in OEM, private label and co-branding solutions as we have been working for some of the most important Brands and Department Stores in the world such as Ermenegildo Zegna, LVMH, Prada, Barneys New York, Heschung, etc..

These Brands found in Daniel & Bob the skills and competences necessary to meet their design and production standards.

It's this combination of know-how, flexibility and design that makes the company well recognized in the luxury leather goods world.
