

BACKBOSS 1000

DESIGNED AND MANUFACTURED IN ITALY

BACKBOSS 1000

The first petrol-powered backpack generator.
Imagine going on an expedition, trimming a long
hedge, carrying out small building repairs
or being ready for an urgent public assistance.
Imagine now that you need a stable power source,
also by USB connection.

BACKBOSS IS THE PERFECT ALLY
FOR PEOPLE LIKE YOU,
PEOPLE WHO NEVER STOP.

It can be used in all situations where the national electricity grid is not available, as well as during a temporary blackout, to power small households with sufficient power (appliances, lighting, submerged pumps, electric gates) or in the case of natural disasters, with the ability to power emergency lights, electrical tools and first aid equipment. Multiple generators can also be connected in parallel, thus significantly increasing the available power.

Engine 4-Stroke

HONDA GX50

Fuel tank capacity 0.63 L

Variable speed

CE marking

Voltage 230 VAC

Frequency 50 Hz

LED LAMPS ACCESSORIES

Light up your work area with LED portable equipment! With a weatherproof IP65 rating and 5400 lumen, this area light is great for use in many different environments. It can provide light in all directions to illuminate an entire working area.

This light allows for full output, instant start-up, even in colder temperatures. In addition, the LED light's life expectancy is 50,000 hours to allow for long-lasting use.

Its compact and portable design surpasses military grade drop test requirements.

Plus, its built-in clickable attachment allows you to mount the light on our Backboss, on a tripod or magnet.
