COMPANY PROFILE

PRESENTATION

www.ecat.it

Welcome to Our Company

Oversized clocks, particularly those that are incorporated into buildings, go beyond their primary role of telling the time. These striking **timepieces serve as captivating focal points**, drawing the attention of passers-by while enriching the city's landscape and amplifying both. the architectural character and the overall atmosphere of their environment.

Welcome to Our Company

With more than 50 years of experience, we combine **Italian craftsmanship, innovation,** and **attention to detail** to deliver unique projects.

Made in Italy Certified Quality

Entirely Italian production

ISO 9001:2015 certification

Remote technical and commercial assistance

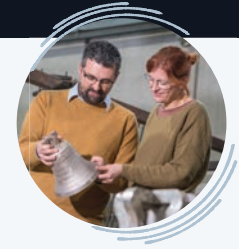

Fully customized projects

Our Company Who We Are

Our strength lies in our people.

For every project, you will have dedicated professionals by your side – from first contact to installation and after-sales support.

Our Company

What We Do

We design and manufacture **tailor-made monumental clocks** that become urban landmarks and architectural symbols.

From historic towers to modern skyscrapers, our clocks enhance prestigious spaces and tell more than time.

Our Company

International Experience

We work with clients in **over 50 countries worldwide.**

Our global presence, with a strong focus on Europe, allows us to:

- understand diverse markets,
- respond to specific needs,
- deliver effective and customized solutions.

Among our clients: Panerai, Pagani Automobili, public administrations, major installers, and international brands.

Our Mission

Clocks Tell More than Time

A monumental clock is not just a timekeeper: it is a symbol of identity, a distinctive feature that becomes an architectural element and a powerful tool for brand communication.

Each project is designed to enhance prestigious spaces and leave an iconic mark.

Our Mission: To transform the clock into an urban and architectural landmark, capable of combining aesthetics, precision, and symbolic value.

The background features a large Ferris wheel with glowing blue capsules, set against a city skyline with several skyscrapers. The scene is overlaid with dark blue and light blue geometric shapes, including triangles and lines, primarily on the left and right sides. The overall aesthetic is modern and architectural.

CASE STUDIES

Pagani Automobili – Workshop Clock

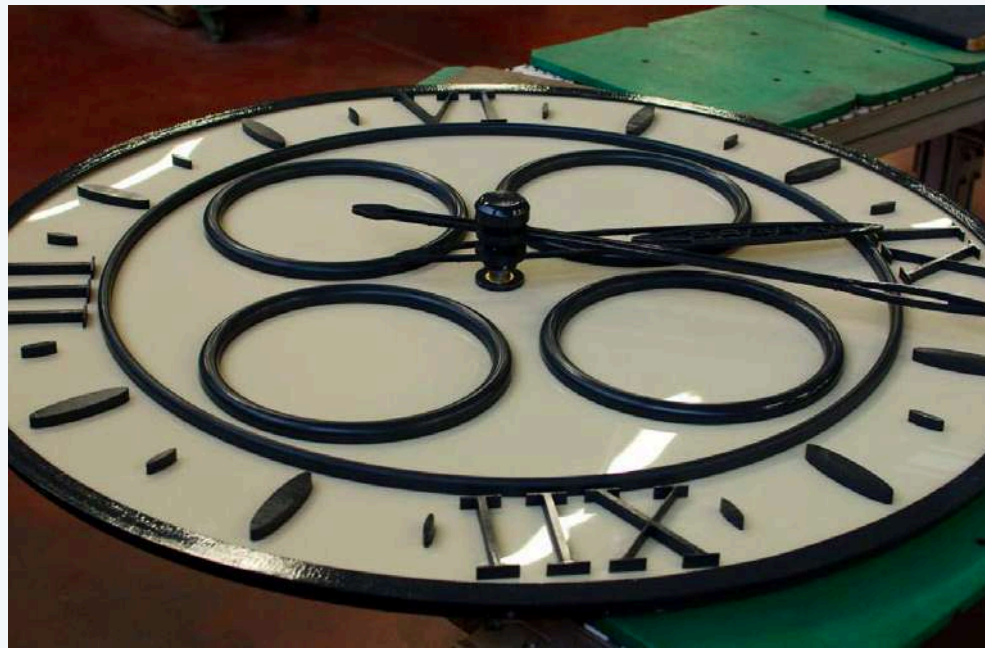

Inside the Pagani factory-museum in Modena, we built an **illuminated façade clock integrated into a tower-like architectural structure**.

The dial, developed exclusively for Pagani and based on a design personally drawn by Horacio Pagani, reflects the brand's style codes in an ultra-customized way and becomes a distinctive feature for clients and visitors.

A project that embodies Italian craftsmanship and technological innovation, perfectly in line with Pagani's philosophy.

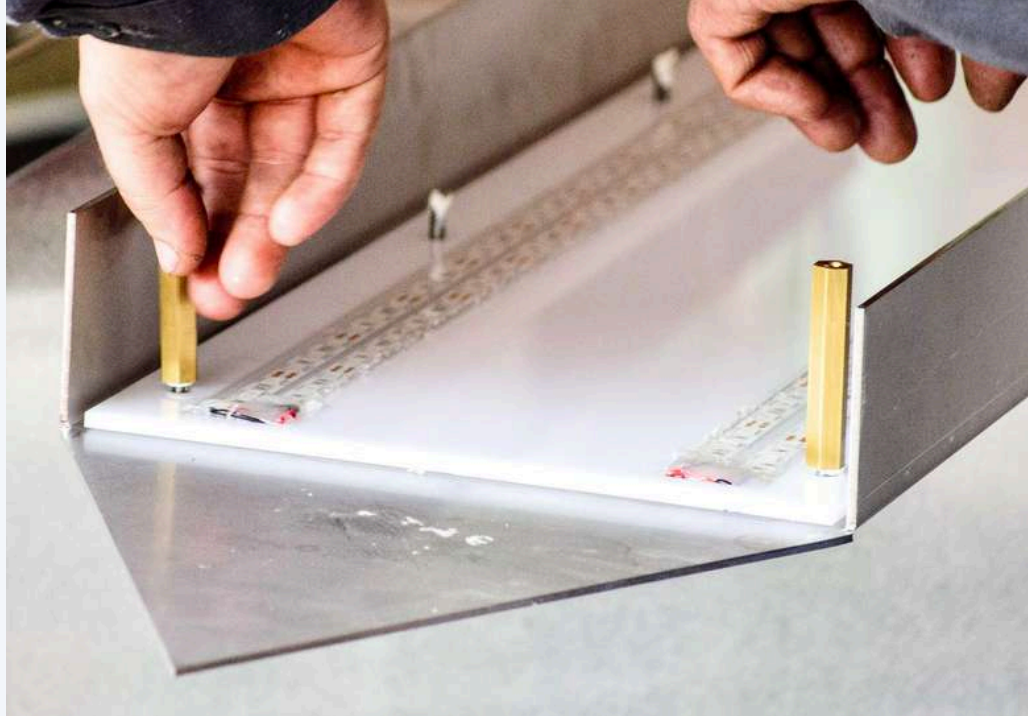

Panerai Shanghai K11 Art Mall

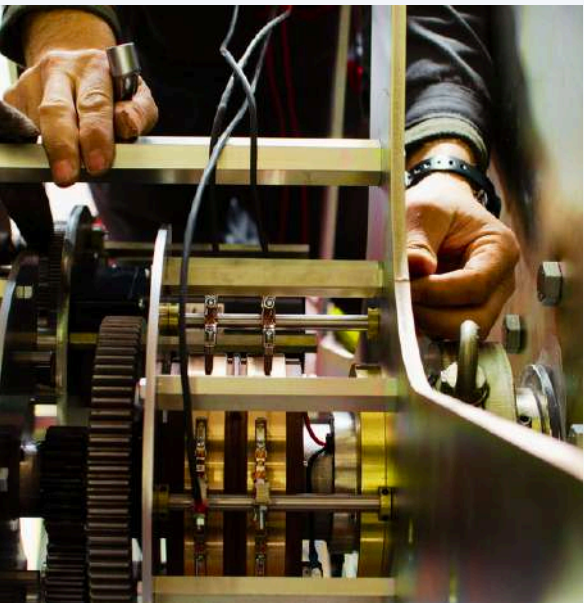

In the heart of one of the world's most iconic metropolises, we created a monumental clock for the Panerai flagship boutique.

Ecat has established a legacy of excellence, further reinforced by our exclusive partnership with the prestigious brand Panerai which is part of the **Richemont Group**. Panerai has chosen Ecat as the sole supplier of clock movements and hands, which were previously supplied by a renowned Swiss manufacturer for their boutiques worldwide. This shows our **reliability** and the high standards we consistently maintain.

The hands, weighing several kilograms, had to be engineered without the traditional counterweight tail, demanding a bespoke mechanical solution to guarantee stability, and smooth operation.

Vobra Clock

With its 7-meter diameter and integrated illumination, the clock is visible from a long distance, becoming an instantly recognizable symbol and a strong branding element

An iconic project that transforms the company façade into an urban landmark.

Illuminated Monumental Clock

A unique project combining technology and design: a monumental clock with a 5-meter diameter, equipped with high-visibility LED illumination.

The imposing and scenic structure becomes a focal point of the urban skyline, transmitting innovation and strengthening the identity of the location.

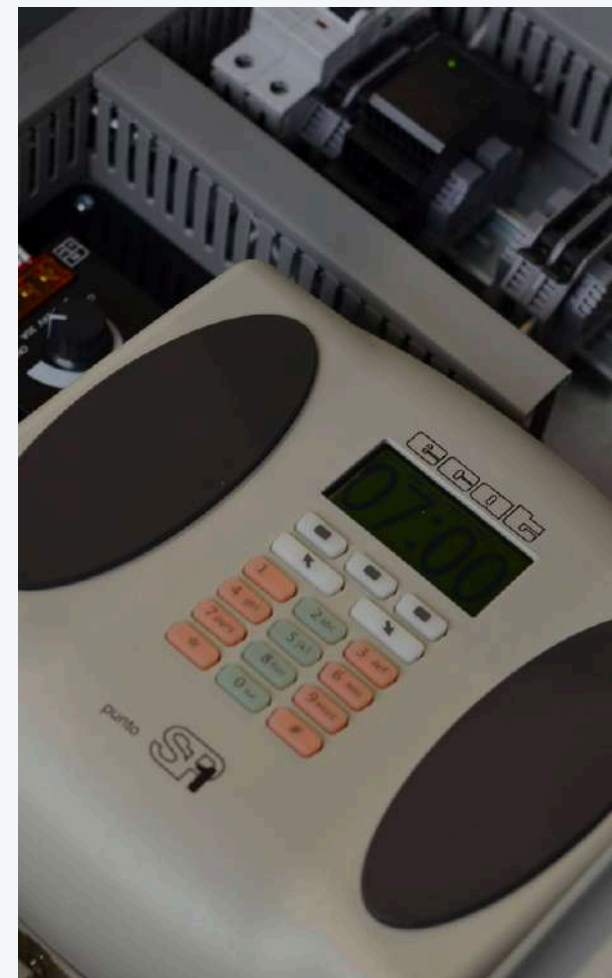

Flexible LED Solutions

The LED solution is perfect for indirect lighting, as custom made versions for fair or shop applications as well as for all kinds of illumination.

Due to their shallow design and and installation flexibility the LED offer a wide spectrum of application possibilities.

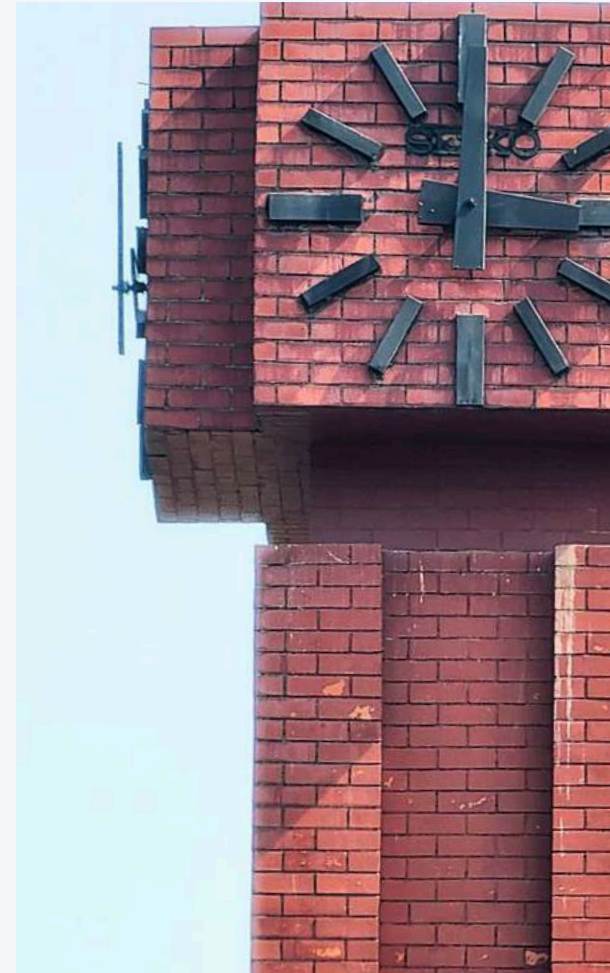

Other Projects Worldwide

From historic towers to modern skyscrapers, our monumental clocks are installed in a wide range of contexts, becoming urban symbols and architectural landmarks.

From mechanical precision to cloud-connected systems, our clocks embody the evolution of timekeeping.
