# WHO WE ARE

With over 25 years of experience, the Frabemar™ group has been active in the world of logistics, transport and maritime technology. Reliability and transparency are the values through which we offer our services to our customers. Our activities are mainly concentrated in West Africa. In addition, the representation of many African Shippers' Councils constitutes an important and additional value that gives us the possibility to provide a 360° service.

Furthermore, being close to the major industrial production centers of northern Italy and central Europe, Genoa is an optimal and strategic base for operating in this fascinating sector. Moreover, Genoa is one of the most important ports in Italy and Southern Europe. Thanks to its 29 terminals it allows the handling of all types of goods.

## Our past

Frabemar Srl was founded in Genoa in 1995 by Mr Franco Bernardini, thanks to his experience developed over 40 years in West African Shipping. He decided to put to use all of his skills and expertise by opening Frabemar. Initially, it only operated as a shipping agency for many African national shipping lines. Thereafter, to meet customers' demand, Frabemar developed different departments strictly linked between them - such as a Forwarding, Shipping, International Trade and Technology, as well as the representation of different African Shipping Councils.

## Our present

The development of our Technological Department aims at satisfying Institutional customers' demand in order to optimize internal logistics operations. Technological evolution has prompted Frabemar™ to develop web applications for tracking load, ships and collecting royalties in order to ease the exchange of digital documents. It is in this context of digital revolution that Frabemar™ has decisively oriented its strategies towards technological innovation.

Frabemar has also developed an innovative blockchain system, specifically designed to reduce delays, data manipulation, fraud, human errors, costs for processing commercial documents.

All of this, thanks to the quick delivery of encrypted documents, allowing transparency in transactions between various players in the logistics chain sector.

This pushed Frabemar towards the future and as a strategic partner for many African Shippers Councils to enhance an economic and logistic evolution of the country of reference.

## Our future

In 2019, Frabemar's board of directors transferred some business branches, creating a new operating company that start its activity on the 2020. The goal is to offer an increasingly tailor-made, versatile and dynamic service in a constantly evolving market.

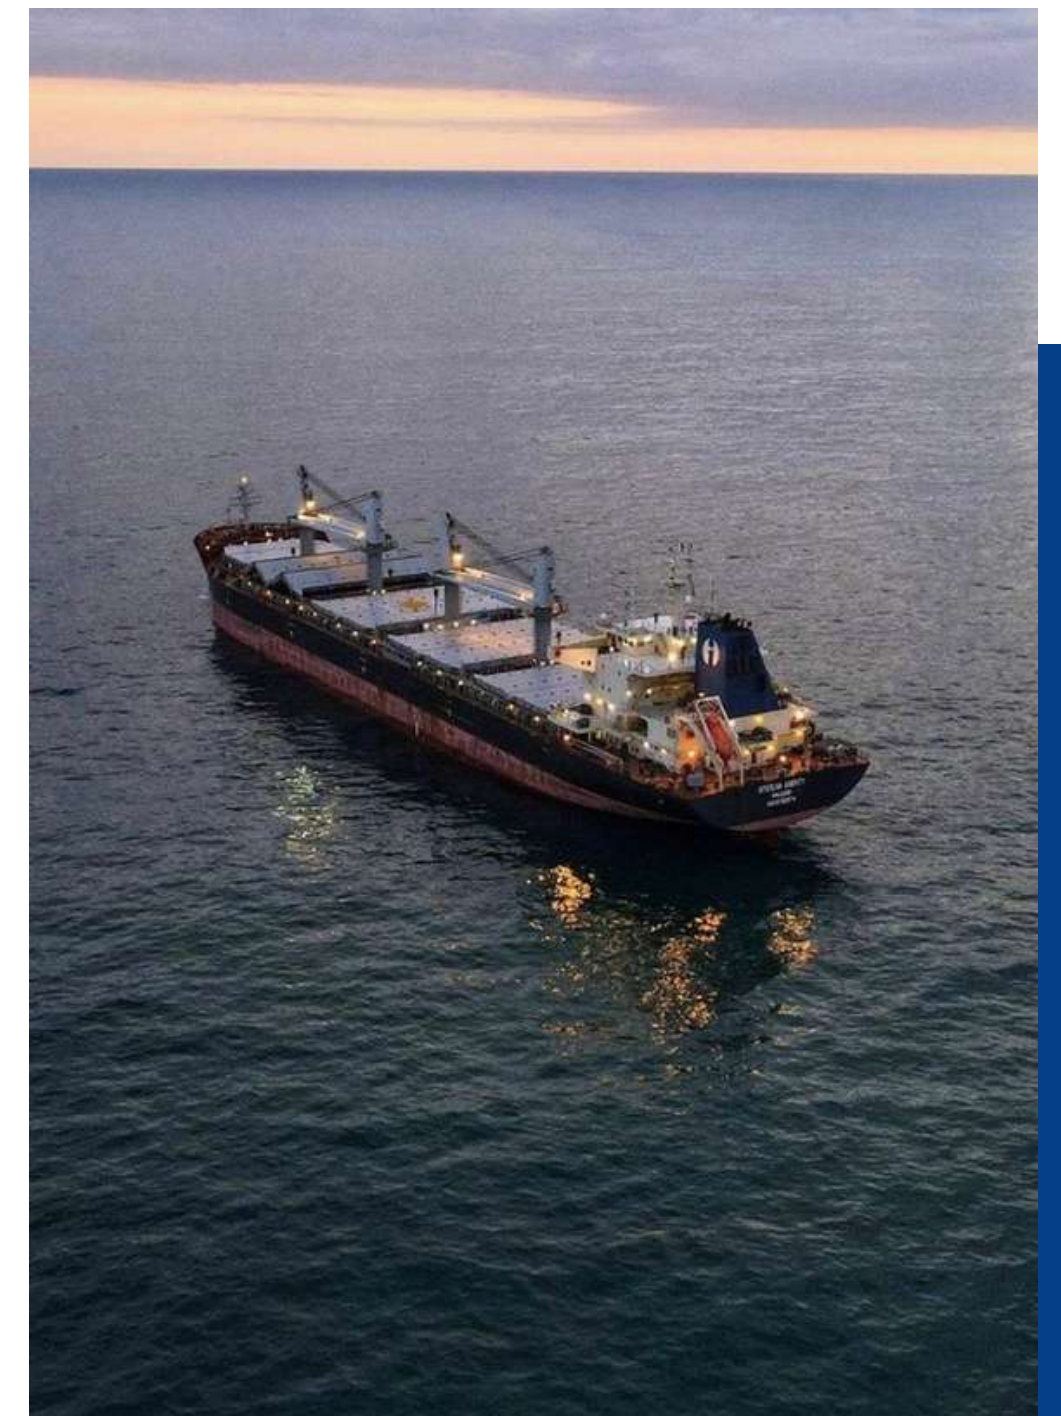

**International Shippers Documentation Srl** better know as **SHIPPERSDOC** was created to meet customers demand in issuing the Electronic Cargo Tracking Note or the Bordereau de Suivi des Cargaisons – ECTN / BESC / BIETC / LC required in most West African countries.
