 **SKI SKETT**

 **SKI SKETT**

SKI SKETT or the idea of cross country skis with wheels was conceived in the mid 1960's in the workshop of an artisan Fabio Crestani, in Sandrigo (Vicenza), in the Northeastern Italy, an area renowned for its industrial productivity. The company **CRESTANI SPORT** since its debut in **1973** has become one of the most popular best selling brands of roller skis in the world, with its complete range of models suitable for any needs.

the World under My Roller Skis

Crestani Sport markets its **SKI SKETT** brand according to four parameters **tradition, technology, innovation, reliability.**

All **SKI SKETT** products are unique and innovative; they are characterized by the advanced technology of the materials used in their construction including **light alloy, stainless steel, polyurethane, rubber, carbon fiber and Kevlar**. These materials have been studied and tested at length and have been proven to provide the characteristics, that best meet the sportsmen's needs.

Each Day a Different Challenge Wellness*

To the contrary, roller skiing offers individuals of all fitness levels the opportunity to engage in the same healthy and beneficial form of exercise one receives from cross country skiing on snow. By roller skiing with **SKI SKETT**, people can essentially engage in cross country skiing in any geographic location or climate.

Roller skiing is one the most complete forms of physical exercise which provides a good cardiovascular and strength building workout. Some may think **SKI SKETT** is only suited (as training device) for elite cross-country ski racers.

SERIES
SPORT

MODEL >
SPORT
CLASSIC 2

The two-wheels model very comfortable and stable, suitable for both skiers with less experience and for those Nordic skiers who need a comfortable shock absorbing roller ski for a good aerobic training on less than ideal road surfaces...

- > LENGTH FRAME 700 mm
- > WHEELS 74x60 mm
- > RATCHET device back
- > WEIGHT 2,2 Kg (pair)
- > OPTIONAL: STOP&GO, SPEED REDUCER, RATCHET device in front

SKI SKETT

MODEL >
SPORT
CLASSIC B

The three-wheels training model
for classical technique with great
stability and comfort.

- > LENGTH FRAME 700 mm
- > WHEELS 100x24 mm
- > RATCHET device back
- > WEIGHT 2,1 Kg (pair)
- > OPTIONAL: STOP&GO; SPEED
REDUCER; RATCHET device also in
front

SPORT CLASSIC ALU

SPORT CLASSIC ALU

MODEL >

SPORT **SKATE ALU**

The skating model for both adults and young people, designed with wheels which allow the user to roll his foot inward prior to pushing off the inside edge of the wheels in the same way a skier pushes off the inside edge of his ski. The SPORT SKATE ALU model is available with several different wheels:

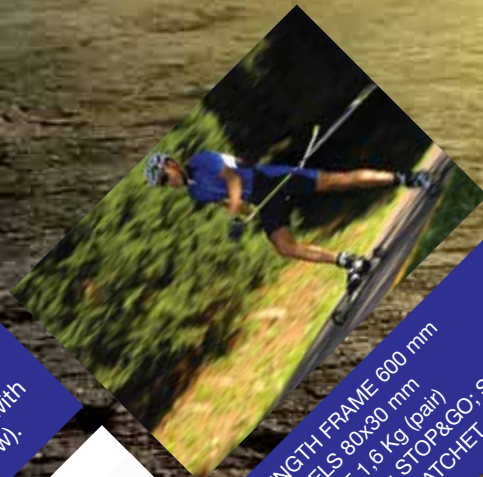

- **PL**, slow and comfortable wheels wheel, which has excellent traction, for those who need a strength building tool (available slow and extra slow wheels).
- **PV**, faster harder wheel for those who prefer higher tempo or less strenuous
- **PE**, medium speed for less demanding athletes.

- > LENGTH FRAME 600 mm
- > WHEELS 80x30 mm
- > WEIGHT 1,1 Kg (pair), it depends on the version
- > OPTIONAL: STOP&GO, SPEED REDUCER, PATCHET device for PV and PL versions

MODEL >
SPORT
SKATE FLEX

It is the SPORT SKATE ALU version with an elastic and very comfortable frame, equipped with PL wheels (slow or extra slow).

- > LENGTH FRAME 600 mm
- > WHEELS 80x20 mm
- > WEIGHT 1,6 Kg (pair)
- > OPTIONAL: STOP&GO; SPEED REDUCER; RATCHET device in front

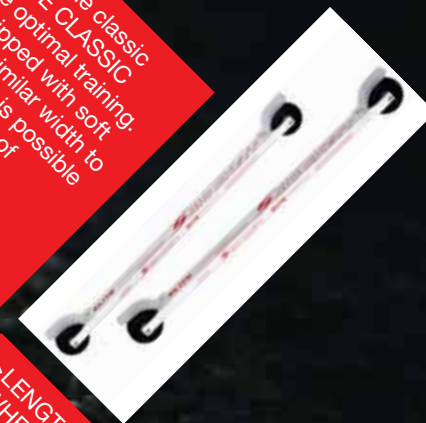

MODEL
ELITE
CLASSIC ALU

For skilled skiers in the classic technique the ELITE CLASSIC version offers the optimal training. This model is equipped with soft rubber wheels of a similar width to a cross country ski. It is possible to choose different types of wheels:

- > **CL**: slow and comfortable, with great traction, suitable also for classical technique (available for an extra slow version CX).
- > **PL**: slow, but with harder wheels, suitable also for skating technique (in front) wheels, suitable also for skating technique
- > **TB**: a mix of hard (back) and soft (in front) wheels, suitable also for skating technique
- > **PV**: for fast training session also with the skating technique.

- > LENGTH FRAME 700 mm
- > WHEELS 74x40 mm
- > RATCHET device back
- > WEIGHT 1,5 Kg (pair)
- > OPTIONAL: STOP&GO; SPEED REDUCER; RATCHET device in front

MODEL >

ELITE
CLASSIC FLEX

With ELITE CLASSIC FLEX you will experience the feeling and speed of being "on-snow". This is optimal for training in the classical technique and the choice of Elite World Cup and Olympic cross country skiers. This model incorporates a carbon fiber frame with forks forged from stainless steel. CL wheels, soft and slow, at request extra slow wheels, version CX.

- > LENGTH FRAME 700 mm
- > WHEELS 74x40 mm
- > RATCHET device back
- > WEIGHT 1,9 Kg (pair)
- > OPTIONAL: STOP&GO, SPEED REDUCER, RATCHET device in front

ELITE
SKATE ALU

SKI SKETT

The SHARK is a skating model designed for very fast training rolls. It has wheels which allow the user to roll his foot inward prior to pushing off the inside edge of the wheels in the same way a skier pushes off the inside edge of his ski. The SHARK offers two versions :

- PL, slow and soft wheel, which has excellent traction (available also extra slow wheels).
- PE, for fast training sessions.

- > LENGTH FRAME 600 mm
- > WHEELS 100x24 mm
- > WEIGHT 1,2 Kg (pair)
- > OPTIONAL: STOP&GO: SPEED REDUCER; RATCHET device in front only in PL version

MODEL >

ELITE
SKATE FLEX

It is the ELITE SKATE ALU version but with a very comfortable frame, suitable for long skating training session. It is equipped with slow wheels, but it is available also an extra slow version.

- >LENGTH FRAME 600 mm
- >WHEELS 100x24 mm
- >WEIGHT 1,6 Kg (pair)
- >OPTIONAL: STOP&GO; SPEED REDUCER; RATCHET device

SERIES
OFF-ROAD

SKI SKETT

MODEL >
CROSS
SKATE 2

The CROSS SKATE 2, with its big inflatable wheels, is the ideal off-road roller skis, away from the asphalted surfaces. Strong and at the same time light, this model can be used on every courses and it is the ideal tool for enjoying your outdoor skating training.

- > LENGTH FRAME 640 mm
- > Inflatable WHEELS 150x30 mm
- > WEIGHT 2.2 Kg (pair)
- > OPTIONAL: STOP&GO, RATCHET device

MODEL >

CROSS
CLASSIC 3

- > LENGTH FRAME 700 mm
- > Inflatable WHEELS 150x30 mm
- > RATCHET device back
- > WEIGHT 3,0 Kg (pair)
- > OPTIONAL: STOP&GO;
RATCHET device also in front

This is the Off-road version for classical technique equipped with three big inflatable wheels which allow to roller skiing on not asphalted roads, even uphill, with great stability. Excellent tool also for ski touring training.

MODEL >
FAST
SKATE

To be competitive in roller ski races, a special model is required to obtain those high speeds. The model FAST SKATE is your winning ride for competitive roller ski racing, according to F.I.S. rules.

- > LENGTH FRAME 530 mm
- > WHEELS 100x22 mm, hardness 80 ShA, available also 84 ShA
- > WEIGHT 1,3 Kg (pair)
- > OPTIONAL: RATCHET device

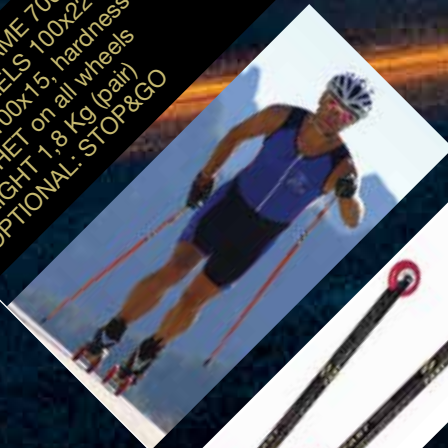

MODEL >

FAST CLASSIC 3

If you want to beat your competitors on uphill races, the right choice is FAST CLASSIC 3, a traditional three-wheel model suitable for your races using classical technique. All wheels are watertight and supplied with bearings, in order to preserve the sophisticated ratchet system.

- > LENGTH FRAME 700 mm
- > Front WHEELS 100x22 mm, back wheels 100x15, hardness 80 ShA,
- > RATCHET on all wheels
- > WEIGHT 1.8 Kg (pair)
- > OPTIONAL: STOP&GO

FAST CLASSIC 3

MODEL >

FAST
CLASSIC 2

For racing on classical technique using a two wheels model choose the FAST CLASSIC 2. It offers a high stability and excellent traction; the ratcheted wheels are equipped with fast bearings, all watertight and rust resistant, in order to preserve the sophisticated ratchet system from sizing.

- > LENGTH FRAME 700 mm
- > WHEELS 74x40 mm, hardness 80 ShA,
- > RATCHET on all wheels
- > WEIGHT 1,7 Kg (pair)
- > OPTIONAL: STOP&GO; SPEED REDUCER

LINE ACCESSORIES

BAGS

Big and resistant bags for carrying your roller skis.

LED LIGHTS

Both in front and back these lights allow to be visible also in condition of poor visibility, for your safety.

SPEED REDUCER

It can be regulated before starting the training and it reduces the speed on all tracks.

STOP&GO

How to stop with the roller ski is one of the first need of the users. STOP&GO is the answer. Very easy-to-use brake it can be applied to any roller skis (even the three wheels models). Easy to assemble is adjustable not only in high, but also forward and back and applicable on wheels of any diameter.

SKI POLES

Very resistant, equipped with tungsten carbide tipped ferrules, our poles are suitable for the execution of the cross-country technique. They are available in light alloy and carbon fibers.
