

Dolce Lucio

HOT STAMPING MACHINES

www.dolcelucio.com

COMPANY

The partner of choice for hot stamping

Dolce Lucio is a manufacturer of HOT FOIL MACHINES, offering standard, customized and prototype solutions for national and international markets.

The company was founded in 1963 by the founder of the same name as a precision mechanical workshop, subsequently specialising in the construction of hot stamping machines. The solid basis in precision mechanics is the added value that the customer finds in our machines.

EXPERTISE

For over 60 years the answer to the most different needs

1. Reliability

The experience and know-how acquired over more than half a century assure the best support and assistance essential in the choices to be made before and after sale to resolve specific situations.

2. Flexibility

In addition to a wide range of standard models, we have always been able to provide customers with custom-built machines to meet specific needs, thanks to an accurate prototyping service.

3. Service

Dolce Lucio offers its customers the guarantee and the advantage of talking with a single interlocutor, the same company that designed and built the machine.

HOT STAMPING

The flexible solution for
colouring and decorating

With its hot stamping machines, Dolce Lucio offers a printing solution for decorating objects with designs, logos and text. The process consists of transferring the colour from the foil (a ribbon containing pigment of a colour suitable for the specific type of material) to the surface to be printed, by means of the heat and pressure exerted by the machine.

HOT STAMPING

[FINISHES]

All the potential of hot stamping

- Metallic" effect finishes: gold, silver, bronze, etc.
- Wide variety of colours: glossy, bright, pastel, matte, etc.
- High color rendering, superior quality and resistance over time
- Enhancement of the graphics making the decoration elegant and valuable, enhancing the product
- Transfer of repeated patterns, holograms, etc.
- Embossing and fire marking ("burning" effect)
- Green solution: dry process without the use of solvents (no production of toxic or hazardous waste)

[MATERIALS]

All the potential of hot foil print

- Plastic
- Paper
- Cardboard
- Special papers
- Leather and similar
- Metal
- Glass

HOT STAMPING AND MORE

In addition to HOT FOIL printing machines, we also produce machines for EMBOSSING and PAD PRINTING or in combination of the various types of printing.

We can also create machines for specific customer needs, as well as equipment to be applied to existing production lines.

All our machines:

- are produced in **ITALY**
- are **CE** certified according to the safety and health regulations in force
- are set up for **remote assistance** connection to our Company.
- they have fast and **economical format changeover**
- guarantee **direct assistance** from our staff

COMPANY PROFILE

AUTOMATION & PROTOTYPES

Targeted design for an
evolving market

An increasingly diverse and demanding market constantly offers new and interesting challenges. At Dolce Lucio we respond with expertise, innovation and professionalism, offering our customers a range of solutions from modification of standard machines to customised and prototype design.

OUR ACHIEVEMENTS

[PROTOTYPES]

Yesterday's experience for tomorrow's innovation

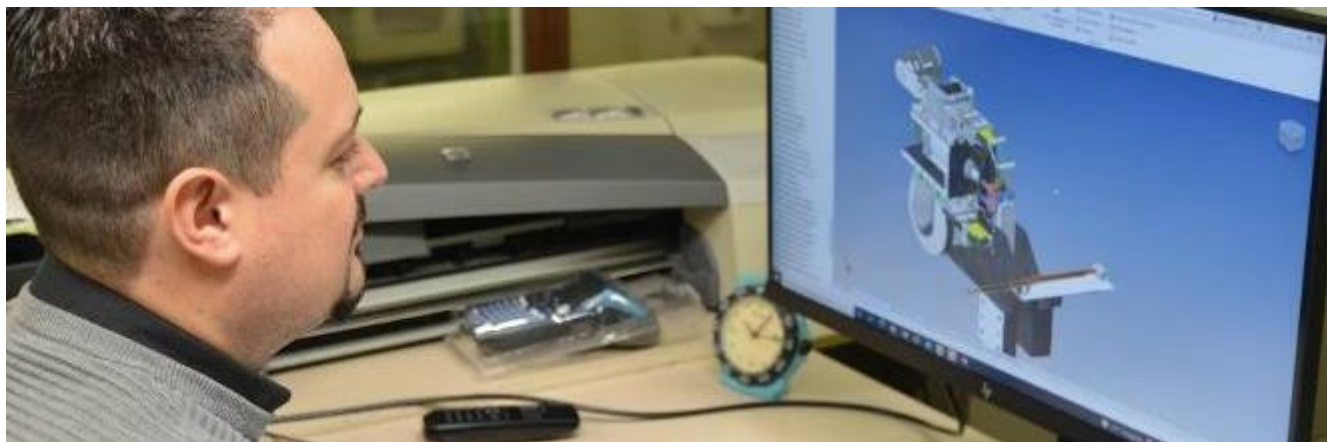

We combine the use of the latest technology with our 50 years of experience to find the best solution for our customers' needs. We manage the entire process in-house, including electrical system design, software programming and user testing. In addition to the best control over the product, this choice allows us to have highly competent staff available for all service requirements.

[AUTOMATIONS]

Flexibility and problem solving

Dolce Lucio stands out for the design and manufacturing of hot stamping machines and automated systems for assembling and handling objects. We offer a vast assortment of solutions, which include series production, customized production, prototypes and integrations into pre-existing production lines.

Our mission is to collaborate with our customers to identify and provide the best solutions capable of satisfying their specific needs
