sales@cmeitaly.com www.cmeitaly.com

CME was born from the experience of people who for over 40 years have been dealing with machines and plants for crushing, recovery, selection, grinding, washing and recycling of inert material.

The company is specialized in the sector of quarries, mines and construction manufacturing aggregate treatment plants and sells machines suitable for the recovery of sands such as hydro-sand.

At the top of the national scene for completeness of the production range and for the high level of technology adopted, CME support the Client from the study to implementation, modifications and modernization of systems, assembly and after-sales assistance with specialized personnel.

This result is due to three main components:

- the long experience gained in the sector;
- the construction of the machines made with modern equipment according to the most advanced technologies;
- design according to the specifications requested by the customer.

NOT THE USUAL SUPPLIER, BUT A 360° PARTNER !

Alongside the customer in all phases of the process:

Engineering

Manufacturing

Assembly

Maintenance

Spare parts

WITH US YOU CAN GO SO FAR AND SEE NEW HORIZONS

Every customer PROBLEM is a CHALLENGE for us
and its SOLUTION is our goal.

Over 30 years of experience in the sector available
to find effective and innovative SOLUTIONS.

OUR MISSION

We are committed to:

- follow our customers responsibly
- optimize their investments
- ensure maximum safety and respect for environment and people.

OUR PILLARS

RELIABILITY'

- 40 years of experience in the sector
- We effectively face up emergency situations and the new needs of our customers

SAFETY

- We continuously invest in the future, with new technologies, research and development for new solutions

COMPETITIVENESS

- We study advantageous and customized solutions in each project, the added value that makes the difference

COMPETENCE

- Professional and experienced Technician, passionate about what they do
- 360 ° problem solving

OUR MAIN SPECIALIZATIONS

- aggregate processing systems
- washing systems
- sludge dewatering
- water clarification
- dust suppression

SAND SEPARATORS

Sand separator machines are studied and built in order to guarantee a total recovery of sand through the separation of clay and a thorough selection of any other extraneous material.

The sand, mixed with unwanted materials, comes from the aggregate materials processing equipment. After being collected in a tank, a special pump that is specifically designed for abrasive and dense liquids draws it and pushes it into the separation cyclone.

Impurities are separated from the sand thanks to a centrifugal force, in order to guarantee the perfect cleaning of the materials. The clean sand is then transferred for drying onto a vibrating screen.

SPECIAL PROJECTS

CME mobile systems are extremely compact and offer great flexibility of use; they are produced in the version on tracks, on rubber and on skids and can be equipped with different types of crushing or screening machines.

Today Cme offers mobile crushing units to numerous companies in Italy and abroad that are engaged in quarries, mining applications and recycling sites.

EXTRACTION

- mobile groups
- fixed installations
- machine restructuring

ECOLOGY

We collect everything, except memories...

- land and water reclamation
- recycling of used materials
- composting plants
