SOLUTIONS FOR SPECIAL CABLES

Taping

Complete taping lines for the insulation, screening and protection of special cables using any kind of tape and yarn.

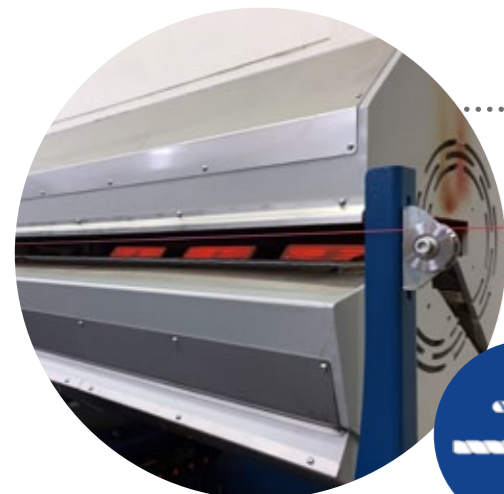

Cabling

Single-twist stranding lines for the production of flexible high-performance multicore cables with backtwist pay-offs.

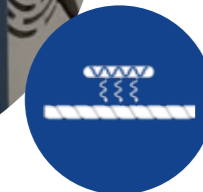

30 years of passion
W.T.M. Srl

For the cable producers all over the world, WTM is the business partner for what concerns high performance equipment such as taping machines, single-twist stranding lines, ovens for heat treatment, rewinding lines and machines for specific applications. Thanks to the deep knowledge of cable construction, materials and their application methods and the experience coming from hundreds of machines produced, WTM studies the specific production needs and designs the suitable solutions to optimize the production processes of its Customers.

Sintering

Sintering ovens for different heat treatments on conductors, through infrared lamps, hot air recirculation, induction system and salt-bath technology.

Visio

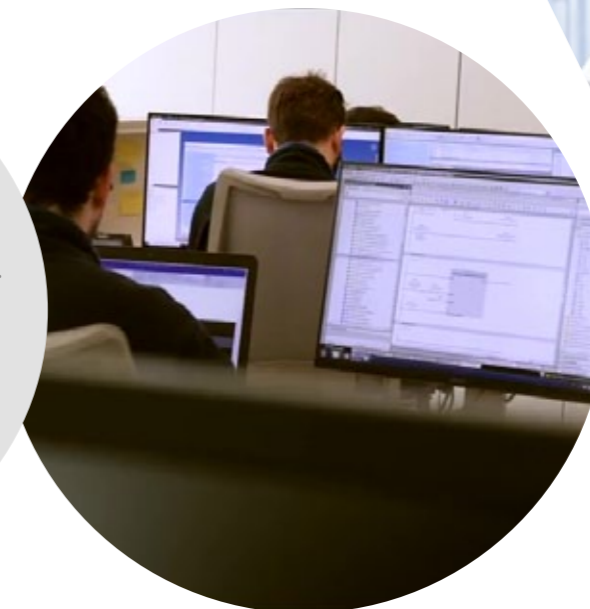

Vision systems with high-speed camera and data management for in-line quality control on insulated wires and cables.

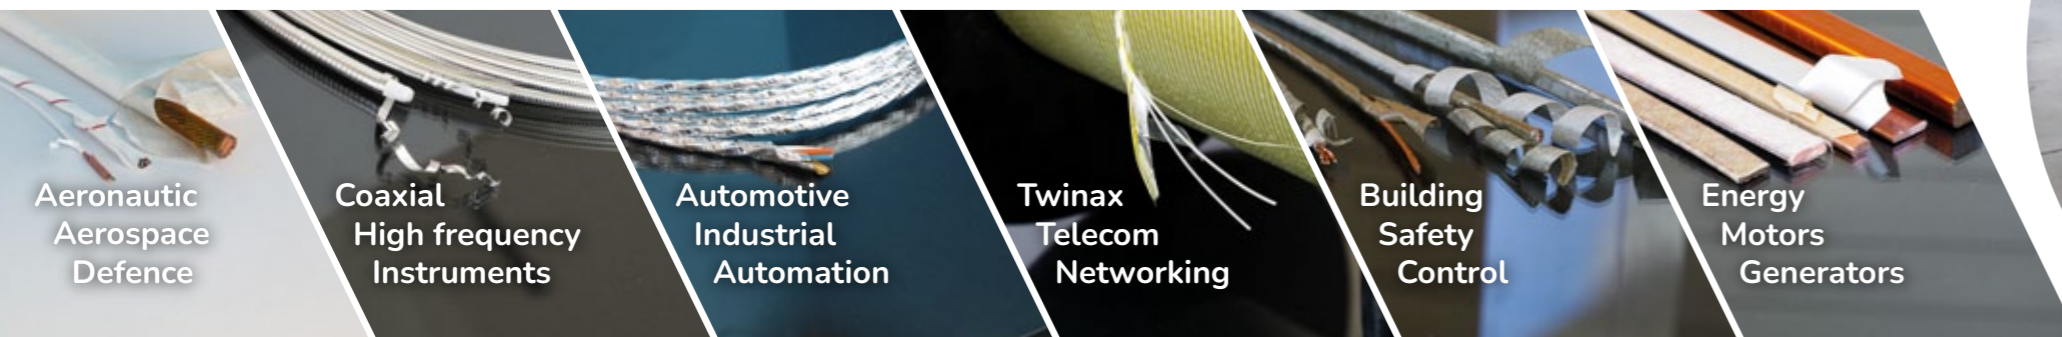

Worldwide after-sale service

Always there, when you need it.

Thanks to a highly qualified team and modern diagnostic tools, WTM provides timely analysis of the functionalities of its equipment. A key service to increase the operational efficiency and to reduce downtime costs.

Applications

Know why Choose us

- 1 Know-how**
More than 600 machines designed, customized and installed to fulfill the needs of leading producers of special cables.
- 2 Quality**
Application of cutting-edge technological solutions and exclusive use of top-quality components produced in Europe.
- 3 Guarantees**
Continuous support throughout the whole life of our machines, with remote assistance and spare parts availability.
