

Derma Shot

Liquid Medicine Injection System

High precision micro-injector for
HAfiller, PRP and others

DERMA SHOT is a highly innovative device for micro-infusions.

Safe and rapid: allows to set a volume ranging from 0,01 to 0,1ml, choosing between continuous or dose mode. Three different operating speed

On the OLED display, there is a counter that will indicate how many injections performed since the beginning of the treatment.

The high precision ensures a considerable reduction of treatment times avoiding incorrect or undesired dosages.

CHARACTERISTICS

- Two modes of injections and three speeds of actioning
- Compatible with standard needle and 5 pin head
- Wireless
- OLED display

Why choose DERMA SHOT

- Reduction of treatment times
- Greater safety
- High precision injections
- Manageable and ergonomic to use with one hand
- Consistent results
- Suitable for High-density solutions
- Suitable for all types of treatment

Scars treatment

Mesotherapy

Fat Reduction

Baldness Reduction

Vaginoplasty
