ABOUT FORLIGHT

internal production, from metal sheet cutting to wiring and testing

optics design, development and production

high qualitative standard

customized technical solutions

attention in employees training

PHOTOMETRIC LABORATORY

We are equipped with an internal photometric laboratory with rotating Goniophotometer, which allows the carrying out of surveys according to C-Gamma and V-H systems.

We measure flow, light intensity, performance and efficiency of light sources and luminaires.

The measurements are carried out according to regulatory requirements (UNI EN 13032-1:2012).

FORLIGHT
SEEING THROUGH

CLEANROOM

The quality of light in its purest environment, is also able to satisfy the needs of the human biorhythms during the different phases and the different conditions of everybody's life.

Our growth is the result of a constant collaboration with customers, who are leader in the planning and in the setting up of hospitals 'turned key'.

Their great knowledge of the sector and the complex needs that demand us to satisfy, were the occasion to develop new devices and new solution always attentive to the easiness of the mounting and to a reduction of the maintenance assistance.

FORLIGHT
SEEING THROUGH

SEA LINE

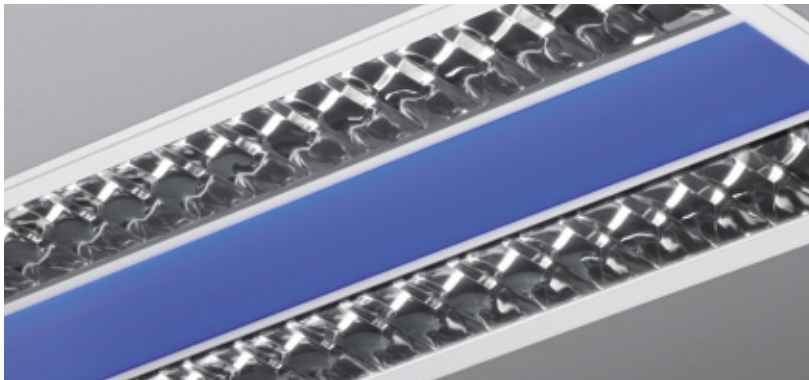

FORLIGHT is the protagonist of the healthcare lighting sector and it is present in international markets with the SEA range: a specific line of production ENEC 03 for cleanrooms.

Our luminaires are suitable for being installed in:

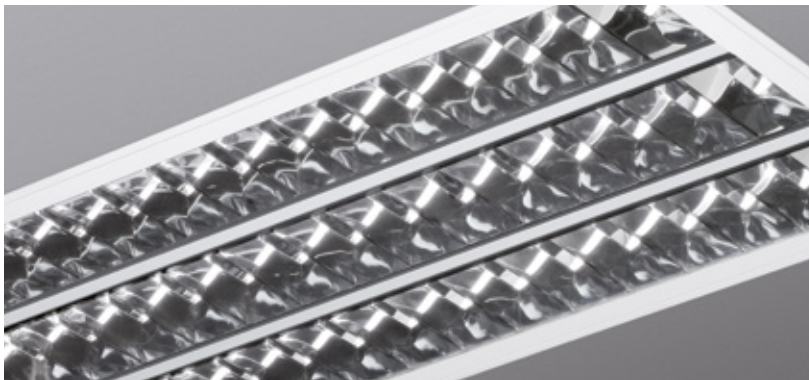

- operating rooms
- preparation areas
- recovery rooms
- hospital environments
- analysis laboratories
- research laboratories
- chemical industry
- pharmaceutical industry
- food industry
- electronic industry

Tunable White

RGB + White

Darklight

Skyled

S K Y L E D

Suitable for installation in environments which require aseptic conditions, thanks to the IP54 degree of protection, and aiming to make places of hospital stays more comfortable, the Skyled range luminaires are totally customizable with several decorative and therapeutic images. They offer an extended composition possibility, and the reduced width of the panel allows installation also in suspended ceilings where the hollow space is of reduced height.

L A R G E
A R E A S

technical lighting for work environment

The high-performance luminaires allow excellent visual comfort and energetic efficiency. Installation and maintenance operations are made easier by the peculiar fastening and opening systems of the luminaire.
