

## LUNA NUOVA

Lighting, acoustic, IoT, health

*ENGI LIGHTING* has created its first luminaire with several functions as lighting, acoustic, human comfort, IoT devices. Not only a lighting solution but also a higher benefit on our ambiances with positive effects on room's air, supporting health and performances of humans.

### LIGHTING:

Led 30W – 4000K – 24V CE, driver included

**ACUSTICA:** it is integrated with a sound absorber panel installed in the central part of the luminaire, 4 cm depth body made in fiber glass and cement glass foam and cellular glass on the sides

**BIOTECH:** we can add a surface treatment with silver ions with antibacterial, fungicidal and sanitizing actions for higher human comfort. It also releases anions and ionizes air, it neutralizes smoke, smells, dusts, pollens, virus. These actions are longlasting and give benefits to nervous system, to breathing, to immune system, to intolerances, stress and in general it raises energy and concentration.

**IoT:** LUNA NUOVA can have on board IoT devices to control and dimmer brightness or sensors to check air quality or other on request.
