

The right partner
for modern growers

The right partner for modern growers

CaBa Industrie was founded with the intention of creating a group of brands able to provide the agricultural market with a wide range of high-quality machines and equipment.

Our brands:

In 2006 CaBa Industrie - owner of **Specialcavi**- acquired **Vicar**, a company manufacturing turbine sprayers for over 40 years.

In 2012 the desire to provide a more advanced technology for wine-growing equipment led to the takeover of **Lotti**.

In 2013 the acquisition of **Macfruit**, specialized in the production of fruit harvesting machines.

VISION

Our visionary approach is to become a leading company in the agricultural machinery market by manufacturing different machines and equipment thanks to new technologies and solutions that meet the needs of modern agriculture.

The growing need for embracing the green reflects our philosophy looking at the production of agricultural equipment and machines which work in full respect of the surrounding nature, minimizing the use of chemical products.

MISSION

The CaBa's mission is to take care of plants in orchards and vineyards, offering the best quality machines and equipment for carrying out several eco-friendly operations on the ground.

We work for your land!

Versatility, convenience and precision

The brand **Lotti** identifies a range of agricultural equipment to till the soil, remove weeds, take care of plants in orchards and vineyards without using any chemical products.

Why choose **Lotti**?

Lotti equipment and machines are versatile and convenient.

Throughout the special tool-holding head it is possible to use different kind of tools according to all customer's needs.

The wide range of interchangeable tools allows to carry out the following operations:

- Hoeing;
- Earthing up;
- Weed removal;
- Inter-row cleaning of the soil;
- Windrowing;
- Pruning;
- Defoliation;
- Trimming;
- Shoot removal;
- Chopping

Innovation, design and technology

Vicar produces a range of mounted and trailed sprayers to be used in orchards, vineyards, greenhouses, nurseries and tall trees, even in the most extreme conditions.

Why choose **Vicar**?

Technological

The turbine sprayer system generates a constant and uniform air flow on the leaf canopy, making the product adhere to both leaf sides, thus optimizing the treatment effectiveness even at low volume.

Eco-friendly

A **Vicar** turbine sprayer is eco-friendly because it ensures a considerable drift reduction thanks to its spraying precision.

Vicar turbine sprayers stand out for the high quality of the components used, such as their stainless steel turbines, brass connections and hot galvanized frames, etc.

Quality, safety and performance

Originally designed to meet all the needs of modern fruit growing, the brand **Macfruit** has developed an advanced system of fruit harvesting mechanization and orchards handling, and it has become over time a very powerful means for the installation of anti-hail nets, winter pruning and summer thinning.

Why choose **Macfruit**?

Versatile

- Several machine configurations;
- Silent powerful diesel engines;
- Quality components and assembly.

Reliable

- Machine's robustness;
- Final checks on all machines;
- Low maintenance and working costs.

Performance is ensured by a rich standard equipment and a wide range of optional accessories which allow to customize the machines according to the customer's needs.

Quality, resistance and versatility

For over thirty years **Specialcavi** has produced flexible transmissions for the operation of mechanical components, such as braking systems, couple-release, stop, start and opening devices.

The range of articles in production includes:

- Simple drive transmissions manufactured according to customer's drawings or sample
- Push-bull transmissions manufactured according to customer's specifications and drawings
- Accessories and components for the spare parts market

Why choose the Specialcavi transmissions?

Versatile

They can be used in many different fields: car, motorbike and cycle industries, agricultural, earthmoving and industrial cleaning machinery, furnishing, nautical industry, spare parts, etc.

Resistant

Thanks to a more automated manufacturing and management process, Specialcavi stands out for the quality of its products as well as for the services it can offer to its customers.
