Metal Working srl[®]
quando il metallo prende forma

We are an innovative company with a clear view.
From design to manufacturing, Metal Working takes
care of every aspect of production in its headquarter
in Trentino, Italy.

*When metal takes
shape... becomes a
good for men.*

We aim to go beyond the traditional provider-client relationship, and offer
innovative products capable to preempt the market trends and satisfy every
necessity, modeling our organization with flexibility and efficiency.

*In Trentino, where excellence
goes hand in hand with know how.*

Metal Working srl[®]
quando il metallo prende forma

The innovative design processes, accomplished with skill by specialized technicians, guarantee incomparable standards of control and verification.

We achieved the certification **ISO 14001:2015** and **ISO 45001:2018**.

All METAL WORKING products are made of top quality steel with testing certificate Q235. STAINLESS STEEL AISI304 DIN 17007, 1.4301 or AISI 316 DIN 17007, 1.4401.

PATENT VR2010A000040 – Junction/structural intersection
PATENT PENDING VR2010A000041 – Antibacterial treatments
PATENT PENDING Y011793/STG – Filter Unit for oily fogs

Metal Working Ltd designs and creates products that comply with the ATEX guidelines 2014/34/UE, equipped with safety systems for environments where the presence of potentially explosive and / or conductive dust which determine the risk.

According to the environmental safeguard we chose to use 100% energy from renewable sources.

Metallic towers for Elevators and Lifting Platforms, excellent modular and customizable products. Four lines that meet every need from simple installations to most complex solutions, in various geometrical shape.

Besides the products in our catalogue, we design and realize tailor-made solutions that can deal with any technical and aesthetic request, with customized finishes based on the design.

We can meet every need, from simple installations to complex solutions, thanks to our design flexibility and ease of installation.

To easily demonstrate construction possibilities and application advantages, our elevation products are divided into four lines.

Elegant

Elegant XT

Discovery

LineaF

The best in elevation. Clean and linear design suitable for every environment, with structural profiles that can be coated with a wide range of materials for an **excellent aesthetics**.

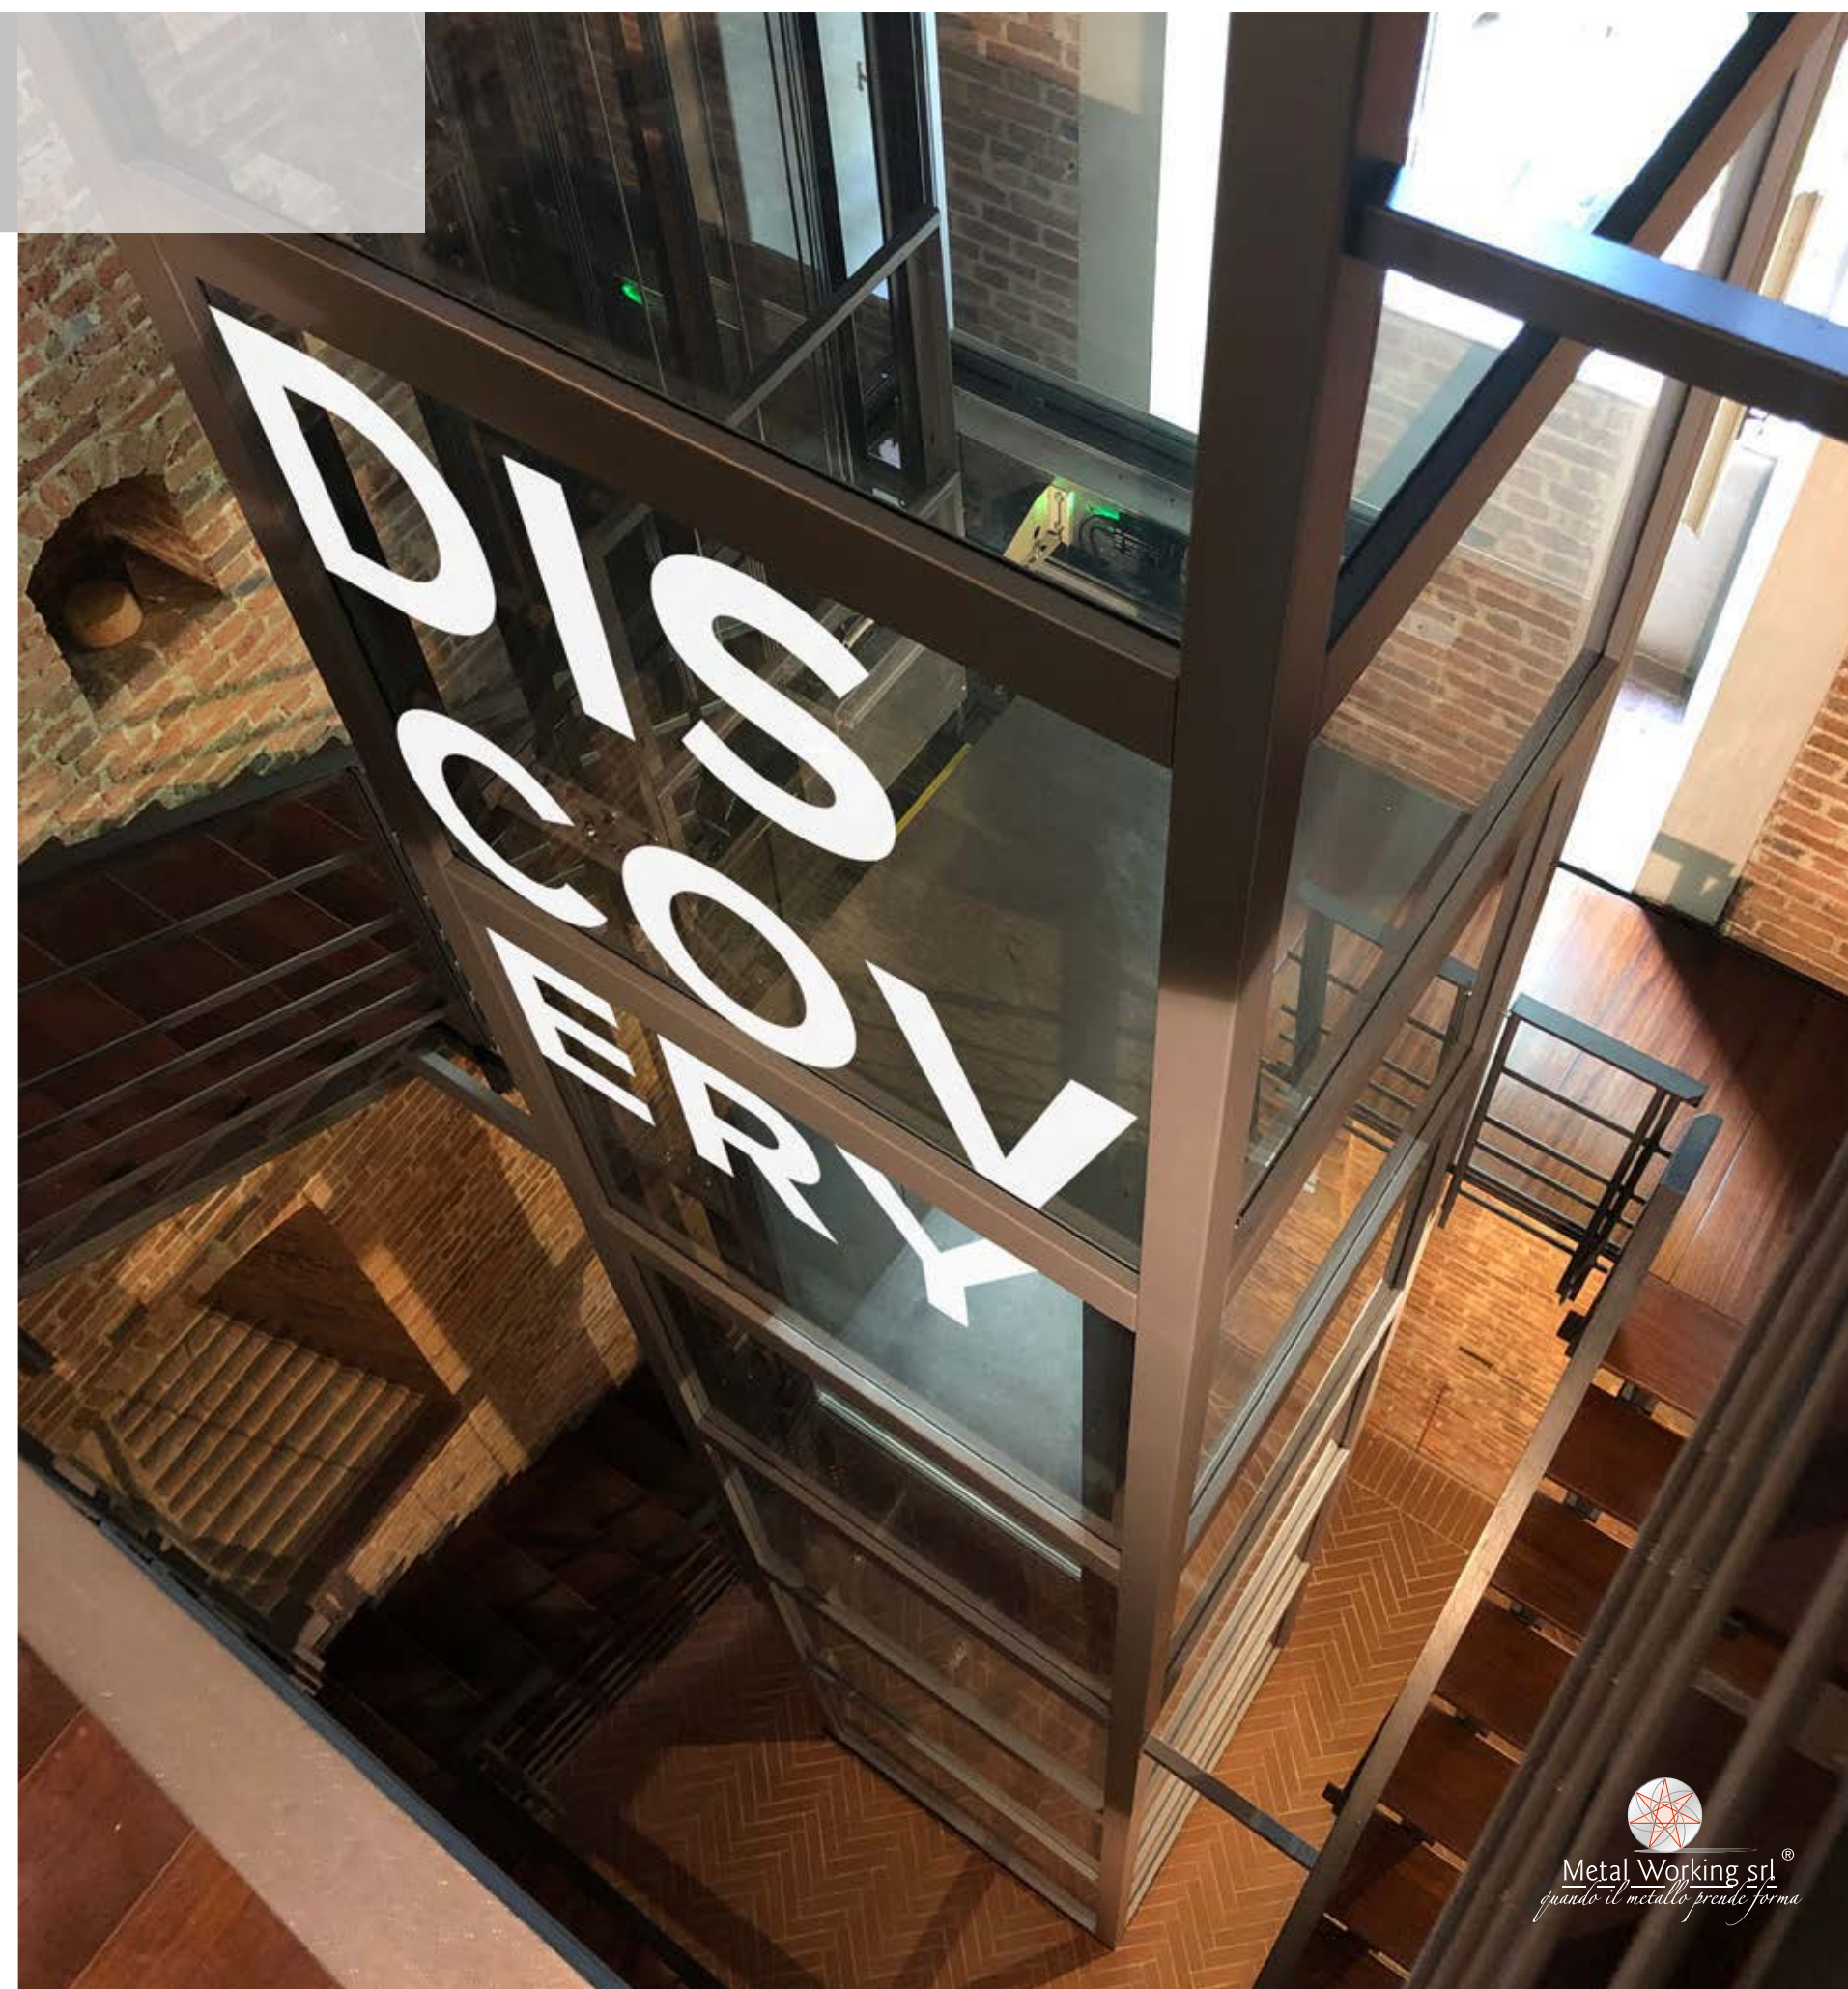

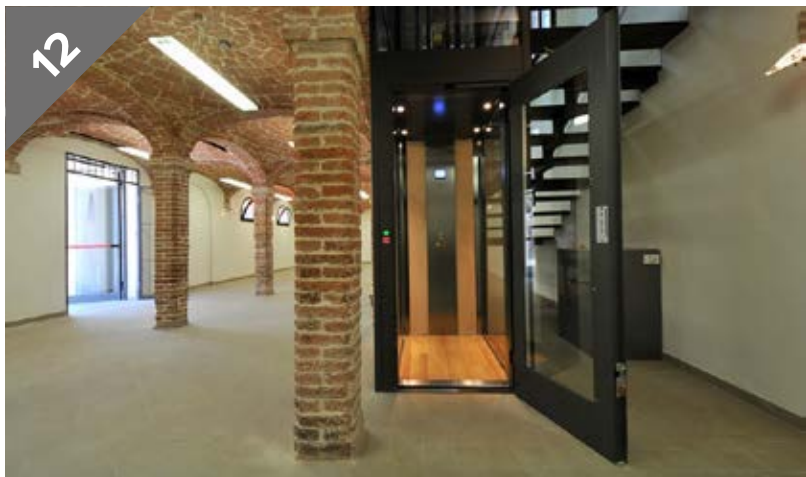

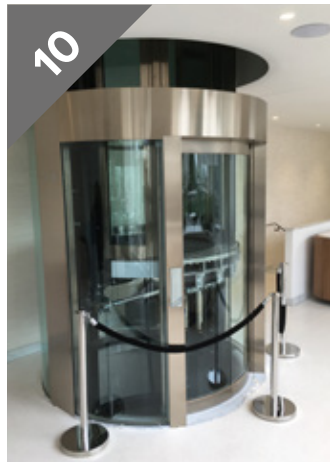

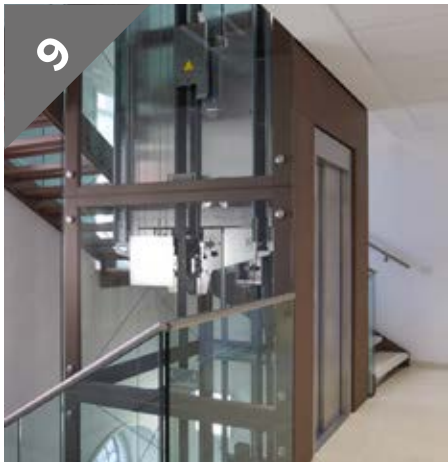

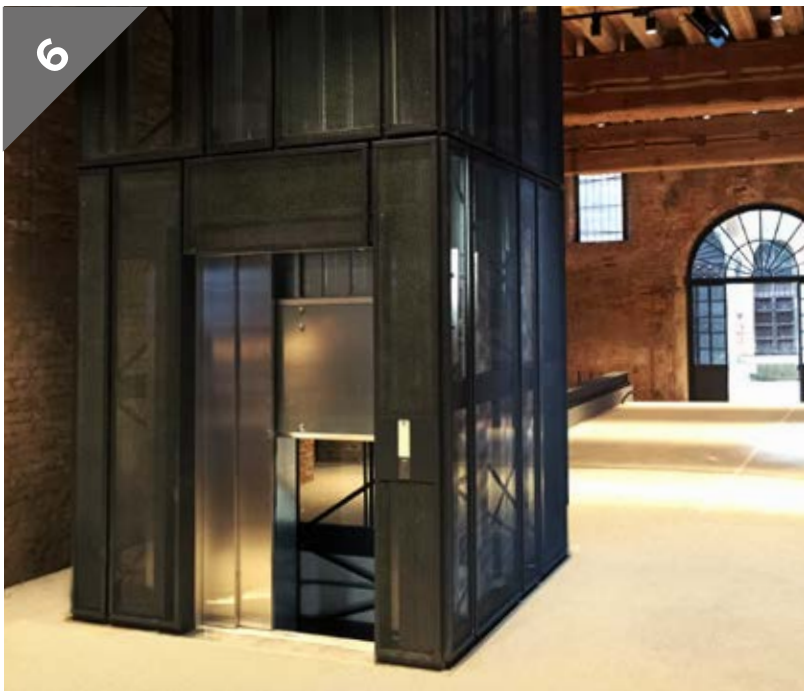

A flexible and competitive line of structures capable to capitalize even on small spaces. Thanks to its simplicity, quality and functionality, this line can offer multiple solutions, from the most essential to the most complex and refined.

An innovative structure with the best price/quality ratio, without compromising functionality and design. Thanks to its versatility, it's suitable to be located either **indoor and outdoor**.
