SPARE AND WEAR PARTS

ENGINEERING DEPARTMENT

Availability and courtesy are the basis of our working relationship with customers.

According to each single company 's needs, our engineering department studies, designs and draws each part to meet even the smallest requirement.

The department is always in close contact with the production to find and meet any customer's requirements. This is why the customer's satisfaction is for us an added and essential requisite in our overall view of quality.

FACTORY AND WAREHOUSE

Spreads over more than an indoor surface of 3700 m². Our company is composed of a factory where single parts are built and repaired, and a warehouse where we always have all parts in stock. Our flexible structure of production allows us to make smaller quantities opposed to the standard sizes. We are therefore more able to react properly and rapidly when orders are received, and thereby reducing waiting times.

EXTRUSION SCREW

TYPE	COD.	DESCRIPTION		EXTRUDER GROUP
H150	1510201R	EXTRUSION SCREW	RIGHT	8 VOIDS 
H150	1510201L	EXTRUSION SCREW	LEFT	
H200	2010201R	EXTRUSION SCREW	RIGHT	6 VOIDS
