

 enerbrain®  
Smart Monitoring

Improving wellbeing while  
staying energy efficient

# Why?

Currently public awareness is changing regards to health and wellbeing risks in staying in public indoor spaces.

Our **sensors** give you an indication of indoor air quality levels

# How?

Monitoring is the first step to improving indoor air quality.

eSense is a unique plug&play CO<sub>2</sub> sensor to monitor Indoor Air Quality in the workplace.

This strategy is compliant with recommendations from latest Covid-19 Guidance published by REHVA and AICARR.

HVAC usage guidelines during COVID-19
