Gli Ori di Venezia *Gold of Venice*

Murano Glass Beads Producer

Gli Ori di Venezia, da oltre vent'anni produce perle di vetro di Murano. Utilizzando le antiche tecniche dei maestri vetrai muranesi, sapientemente mixate con moderni strumenti industriali, l'azienda è in grado di produrre e fornire l'intera e sterminata gamma di perle di vetro della tradizione veneziana. Una produzione con standard di altissima qualità fa sì che Gli Ori di Venezia siano il brand di riferimento per tutte le aziende le quali hanno bisogno di rifornirsi costantemente di questo prodotto. La produzione e la spedizione delle perle viene effettuata velocemente, la qualità del prodotto è controllata scrupolosamente. Le aziende che si occupano di fashion jewellery potranno contare su un partner efficiente, attento e propositivo, grazie alla vastissima gamma di prodotti che l'azienda riesce a produrre.

"Gli Ori di Venezia" has been a world leader in making Murano glass beads for over twenty years. Using the ancient techniques of Murano master glassmakers, ably enhanced by modern industrial tools, the company is able to make and supply the whole immense Venetian Tradition's range of glass beads. Gli Ori Di Venezia follow only the very highest production standards, making the company a reference brand for any business that needed a constant and steady supply of this product. Beads are made swiftly, but the quality of the product is kept under scrupulous control. Companies making fashion jewellery may rely on an efficient, careful and proactive partner, thanks to the enormous range of products regularly offered by the company. Magical transparencies, tones that shade off into each other; pursuing each other in a magical sequence of light and colours...

La tradizione secolare di queste perle veneziane, fa sì che esse divengano un autentico gioiello di vetro, dotato di un fascino immutabile, e impermeabile alle mode del momento.

Le perle in vetro possono essere piene o soffiate. A seconda della tecnica di lavorazione si possono suddividere in tre grandi categorie di base: la "conteria", la "rosetta" e le "perle a lume". "Conteria" e "rosetta" sono delle perle da canna, ottenute cioè da canne precedentemente preparate. Le "perle a lume" sono invece create una ad una avvolgendo del vetro rammollito al calore di un piccolo bruciatore (lume) attorno ad un tondino di ferro opportunamente preparato e rifinendole in una varietà di modelli praticamente infinita, per cui possono essere arricchite con altri materiali come oro, smalti e avventurine.

Glass is something that is incapable of leaving anyone uninterested. "Gli Ori di Venezia" was born in a world of exclusive items, hand made, but worked according to the contemporary markets' requirements; thus we revisit Venetian Beads and Murrine, enriching them and turning them into original jewels. Our regular control and selection only allows the best items into the collections of "Gli Ori di Venezia", and the most eloquent witness of this is the success the company achieved in the world's leading gold jewellery fairs. All "Gli Ori di Venezia" items are made by hand, and therefore not a single one is ever exactly like another. This makes every item an original, but also means that the object required may be slightly different from the way it appears in the catalogue.
