ANAYSIS INSTRUMENTS AND DOSING SYSTEMS
FOR WATER TREATMENT

STEIEL... SINCE 1973 THE ELECTRONICS WITH PASSION FOR WATER

Studio Tecnico Elettronico Industriale E Laboratorio (Industrial Electronic Technical Study & Lab), this is how, in 1973, Eng. Ettore Pilotti, together with a high skilled team, starts one of the most historic Italian companies, which deals successfully with the design and production of electronic devices applied to water treatment.

That small reality, today more and more international, from more than forty years is in the market with a wide range of electronic measurement instruments and dosing systems for the treatment of all the types of water, from industrial processes to water purification and conditioning, from the agri-food and livestock industry to swimming pools.

In addition STEIEL is one of the first Italian manufacturers of chlorine dioxide generators, now widely used for the legionella abatement in domestic hot water circuits. From 10 years STEIEL has been sanitizing water distribution systems in many public and private facilities, hospitals, hospices and nursing homes, hotels, agri-food industries and farms, both in Italy and abroad.

The STEIEL team includes highly qualified electronic and mechanical designers; technicians who help the customer with the plant start-up, scheduled maintenance and technical courses; marketing and back office professionals, who take care of all customer requests; technical-commercial officials always attentive to the needs of the market.

Today STEIEL is present in more than 30 countries, with a sales network consisting of national and international distributors (even exclusive), direct and indirect customers, important OEM customers and plant manufacturers. STEIEL was one of the first Italian companies to understand the importance of creating customized products and tailor-made solutions according to the specific needs of the customer.

Accepting challenges is the key of our success and our philosophy...

“Do not ask us to be what we are not, but help us to not remain what we are”

The STEIEL team

DIGITAL SINGLE-PARAMETER UNITS

PANEL INSTALLATION

S503 SERIES, BASIC LINE

- Input for Pt100 sensor, for temperature measurement and compensation
- Two relay outputs (threshold or alarm, K1 can drive a pump magnet)
- Current output, fully configurable and with galvanic separation
- OFF digital input, for disabling all outputs
- Optional front panel for IP54 protection or version with IP65 housing
- Power supply: 230 V~ (standard), 115 V~, 24 V~, 24 V- (50/60 Hz)

ITEM	DESCRIPTION	PART NO.
S503 pH/RX/T	Input for pH or ORP electrode + Pt100	80050010
S503 CO	Input for 2-electrode conductivity cell + Pt100	80240005
S503 IN	Indicator with 0/4-20 mA input, range to be specified	80710130
Transparent front cover for IP54 protection, for 96x96 mm housing		49000517
Option: models with IP65 housing		

S508 SERIES, PROFESSIONAL LINE

- Input for Pt100 sensor, for temperature measurement and compensation
- Two relay outputs configurable as intervention threshold or alarm
- Current output, fully configurable and with galvanic separation
- Serial port for communication with PC, data recorder, RW14
- OFF/FLOW digital input, for disabling all outputs
- Multi-language menu
- Optional front panel for IP54 protection
- Power supply: 230 V~ (standard), 115 V~, 24 V~, 24 V- (50/60 Hz)

ITEM	DESCRIPTION	PART NO.
S508 pH/RX/T	Input for pH or ORP electrode + Pt100	80050050
S508 CO	Input for 2-electrode conductivity cell + Pt100	80240050
S508 ACL	Input for CLE12 cell, range to be specified upon order	
S508 CAC	Input for CAC (or CP) cell, range to be specified upon order	
S508 TU	Input for turbidity cell	85700050
S508 IN	Indicator with 0/4-20 mA input, range to be specified	80710180
Transparent front cover for IP54 protection, for 72x144 mm housing		49000516

C902 COMPACT CONDUCTIVITY METER

- Conductivity measurement up to 9.99, 99.9 or 999 µS/cm (to be specified)
- Measurements in µS/cm or ppm (to be specified upon order)
- Input for two-electrode conductivity cell, with cell constant depending on the full scale value
- One relay output with threshold adjustable through trimmer
- Power supply: 230 V~, 115 V~, 24 V~, 24 V- (50/60 Hz)

ITEM	DESCRIPTION
C902	C902, measure unit and range to be specified upon order

INSTRUMENTS FOR INDUSTRIAL APPLICATIONS

INSTALLATION ON DIN SLOT

S504 SERIES

- Input for Pt100 sensor, for temperature measurement and compensation
- Two relay outputs configurable as intervention threshold or alarm
- Current output, fully configurable and with galvanic separation
- OFF digital input, for disabling all outputs
- Power supply: 230 V~ (standard), 115 V~, 24 V~, 24 V- (50/60 Hz)

ITEM	DESCRIPTION	PART NO.
S504 pH/RX/T	Input for pH or ORP electrode + Pt100	80050030
S504 CO	Input for 2-electrode conductivity cell + Pt100	80240020
S504 IN	Indicator with 0/4-20 mA input, range to be specified	80710160
S504 box	Instrument mounted in closed housing, single instrument	
	Instrument mounted in closed housing, double instrument	

WALL INSTALLATION

S507 SERIES, PROFESSIONAL LINE

- Input for Pt100 sensor, for temperature measurement and compensation
- Two relay outputs configurable as intervention threshold or alarm
- “Dosing-shot” option for relay K1
- Current output, fully configurable and with galvanic separation
- Serial port for communication with PC, data recorder, RW14
- OFF/FLOW digital input, for disabling all outputs
- Multi-language menu
- Watertight housing suitable to harsh industrial environments
- Can be supplied prewired and assembled on panel
- Power supply: 230 V~ (standard), 115 V~, 24 V~, 24 V- (50/60 Hz)

ITEM	DESCRIPTION	PART NO.
S507 pH/RX/T	Input for pH or ORP electrode + Pt100	80050040
S507 CO	Input for 2-electrode conductivity cell + Pt100	80240040
S507 ACL	Input for CLE12 cell, range to be specified upon order	80600201
S507 CAC	Input for CAC (or CP) cell, range to be specified upon order	
S507 TU	Input for turbidity cell	85700026
S507 IN	Indicator with 0/4-20 mA input, range to be specified	80710170

DIGITAL MULTI-PARAMETER UNITS

WALL INSTALLATION

MC14 CONTROLLER

- **Inputs for 5 simultaneous readings** (temperature always provided)
- Measurements of pH, ORP, chlorine, conductivity, turbidity, etc.
- Available double input for CAC cells
- **Two configuration levels** (standard and advanced), with password
- Multi-language menu
- **Relays for ON/OFF or proportional control**, or NO/NC alarm
- **Two current outputs**, 0-20 or 4-20 mA
- OFF input, configurable NO or NC for disabling outputs
- Input for water flow sensor for disabling outputs in case of flow lack
- Two level inputs for monitoring the products to be dosed
- Data log downloadable via serial line (internal data logger)
- Serial port, with galvanic insulation, for communication with PC, RW14, μMMC4
- **Optional RS485 port with Modbus RTU communication protocol**
- The unit can be supplied pre-wired and assembled on panel, complete with measurement sensors, dosing pumps and data recording system (see specific section)
- Power supply: 230 V~ (standard), 115 V~ / 50/60 Hz

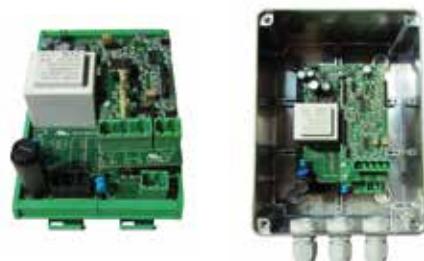

ITEM	DESCRIPTION
MC14 /2 std.	MC14, 2 channels + temperature (Pt100), RS232
MC14 /3 std.	MC14, 3 channels + temperature (Pt100), RS232
MC14 /4 std.	MC14, 4 channels + temperature (Pt100), RS232

AUXILIARY INSTRUMENTATION

SG18 SERIES, GALVANIC SEPARATORS AND SIGNAL AMPLIFIERS

- Series of devices that work as **signal converters** and **pre-amplifiers**
- Signals are **galvanically isolated**
- The ideal device in case of signal transmission problems due to long distances or “noisy” environments
- Input options: pH electrode (0-14 pH), ORP electrode (0-1000 mV), conductivity cell (K=5 or K=1, range to be specified)
- Thermo-compensation of pH readings with separated Pt100 probe, of conductivity measurements with NTC sensor in-built in the cell
- Output: 4-20 mA (standard), or 0-20 mA
- Models with **watertight housing or support for installation on DIN slot**
- Power supply: 230 V~ (standard), 115 V~, 24 V~, 24 V- (50/60 Hz)

ITEM	DESCRIPTION
SG18	Wall-mounting series; Input and output to be specified
SG18/DIN	DIN series; Input and output to be specified

PROGRAMMERS

PRG11 MODEL FOR REVERSE OSMOSIS PLANTS

- Can be **wall-mounted or assembled on** the osmosis system **frame**
- **Internal RTC** powered by buffer battery, for scheduling filter cleaning
- **Two inputs for** two-electrode **conductivity cells**, for monitoring water both entering and exiting the osmosis unit
- **Thermo-compensation** of readings with NTC sensor in-built in the cell
- **Serial port** for communication with PC, data recorder, RW14
- Outputs: direct control of filter pump and dosing pump, and alarm
- Digital input for 3-wire sensors (magnetic or capacitive)
- Power supply: 230 V~ (standard), 115 V~ / 50 Hz

PRG EVO MODEL FOR REVERSE OSMOSIS PLANTS, SOFTENERS AND FILTERS

- Basic supply: electronic boards with support for mounting on DIN slot
- Optional supply: boards assembled in an electric cabinet, dimensions to be agreed with the customer
- Graphic LCD, LED indicators and 5-button keyboard
- **Internal RTC** powered by buffer battery, for scheduling filter cleaning
- **Two inputs for** two-electrode **conductivity cells**
- **Thermo-compensation** of readings with NTC sensor in-built in the cell
- Digital inputs, 12 V, compatibles with PLC PNP outputs at 12 or 24 V
- **Optional serial port**, opto-isolated, RS232 (also double, for duplex configuration) or RS485
- Outputs: direct control of filter pump and dosing pump, and alarm
- Storage of alarms and events
- **Service configuration** function
- Digital input for 3-wire sensors (magnetic or capacitive)
- Power supply: 24 V-, 24 V~, 115 V~, 230 V~ (standard) / 50 Hz

ITEM	DESCRIPTION
PRG11	Programmer for reverse osmosis (RO) plants. Conductivity ranges, cell constant and output (230 V~ or 24 V-) to be specified.
PRG EVO	Programmer for reverse osmosis (RO) plants, softeners and filters. Contact STEIEL for choosing the configuration which better fits your needs.

DATA RECORDING / MANAGING

RW14 REMOTE CONTROL SYSTEM VIA WEB

- Remote interaction through PC, Tablet or Smartphone
- Internet connection via LAN port or WiFi module
- Standard model with one RS232 port
- Options: up to 3 additional serial ports, 2 analogic and 4 digital inputs
- Configuration and data visualization through dedicated web pages, using a common web browser
- Wall installation
- Power supply: 100...240 V~ / 50/60 Hz

ITEM	DESCRIPTION	PART NO.
RW14 LAN	Connection via LAN port, one RS232 port	81820010
	Connection via LAN port, two RS232 ports	81820020
	Connection via LAN port, three RS232 ports	81820030
	Connection via LAN port, four RS232 ports	81820040
Kit router	Router + LAN cable (10 m) + antenna cable (2 x 10 m) – only for RW14 LAN	81829001
RW14 WiFi	Connection via WiFi module, one RS232 port	81820110
	Connection via WiFi module, two RS232 ports	81820120
	Connection via WiFi module, three RS232 ports	81820130
	Connection via WiFi module, four RS232 ports	81820140
Optional module with 2 analogic inputs (4-20 mA)		
Optional module with 4 digital inputs		
Expansion board with 1 RS232 port		77001073
CAV/RW-M8-1	Serial cable with M8 connector for PSP/EF160 pumps and Compact controllers, 1.5 m	80099041
CAV/RW-M8-10	Serial cable with M8 connector for PSP/EF160 pumps and Compact controllers, 10 m	80099045
CAV/RW-MP-1	Serial cable with connector for multi-parameter units, 1.5 m	80099111
CAV/RW-MP-10	Serial cable with connector for multi-parameter units, 10 m	80099115
CAV/RW-IND-1	Serial cable with connector for S50x units, 1.5 m	80099121
CAV/RW-IND-10	Serial cable with connector for S50x units, 10 m	80099125

µMMC SERIES, DATA RECORDING ON MEMORY CARD

Items available while stock lasts!

- Recorder-instrument communication via serial line
- Can record up to 1000 days
- Data format compatible with the most common software (e.g. NotePad, Word, Excel)
- Memory card MMC or SD (included) easily readable by a PC
- High efficiency LED indicators

ITEM	DESCRIPTION	PART NO.
µMMC2	Data recorder with connector for S50x units	80509199/A
µMMC4	Data recorder with connector for EF214, MC14, MCO14 units	80509199/C
µMMC-SW	“GENERA” software for daily data processing	80790104

WATER HARDNESS ANALYSERS

- Qualitative control of the softening system
- Microprocessor-based units
- Plate mounted or IP54 housing
- Power supply: 230 V~ (standard) or 24 V
- Basic version with LED indicators, 3 alarms for threshold exceeding or fault condition, analysis START/STOP input, setting of the analysis interval and washing time
- Professional version with graphic display, 4 relay outputs configurable as alarms, commands of connected devices (washing valve, pump, cooler) or remote signal of fault conditions, 1 analogic output 0/4-20 mA, 2 digital inputs, data transfer through CAN connection or SD card

READY TO USE CONTROL SYSTEMS CUSTOMIZED ASSEMBLIES ON SUPPORT

STEIEL offers its customers a wide range of “turnkey” solutions, available on neutral panel (white), with STEIEL logo or with customer logo (even for a few units).

In addition, it is possible to have industrial equipment mounted inside closed fiberglass or steel switchboards (equipped with door with transparent window) or on painted metal frames (also with laser-cut logo).

For these particular solutions or other types of customization, contact STEIEL for a specific evaluation.

ITEM	DESCRIPTION
	High density expanded PVC panel, 650x290 mm, assembling costs included
	High density expanded PVC panel, 500x600 mm, assembling costs included
	PP panel, 495x660 mm, assembling costs included
	AISI 304 steel panel, 500x600 mm, complete with steel mounting plate and door with transparent window; assembling costs included
	High density expanded PVC panel, 595x750 mm, assembling costs included
	High density expanded PVC panel, 900x700 mm, assembling costs included
	PP panel, 900x700 mm, assembling costs included
	AISI 304 steel panel, 900x700 mm, complete with steel mounting plate and door with transparent window; assembling costs included
	Assembly on electrical panel with transparent door and support terminal board; supplied with wiring diagram and certificate

INSTRUMENTS FOR INDUSTRIAL APPLICATIONS

PRE-ASSEMBLED PANELS

In this section you can find some examples of STEIEL standard panels, for the analysis and control of the main chemical-physical parameters of the water: pH, ORP, temperature, electrical and inductive conductivity, disinfectant concentration (chlorine and chlorine dioxide), turbidity.

Customized solutions are also available upon request.

ITEM	DESCRIPTION	PART NO.
	PNL-pH High density expanded PVC panel (650x290 mm), with S507-pH/RX/T unit, SF78E2 probe-holder, EURO2010-pH glass pH electrode, CAV0 electrode cable; assembling, testing and packaging costs included	S25070533
	PNL-RX High density expanded PVC panel (650x290 mm), with S507-pH/RX/T unit, SF78E2 probe-holder, EURO2110-RX/Pt glass ORP electrode, CAV0 electrode cable; assembling, testing and packaging costs included	S25080533
	PNL Conductivity (CCK5) High density expanded PVC panel (650x290 mm), S507-CO unit, SF78M/CCK probe-holder, CCK5T-PT100 cell; assembling, testing and packaging costs included	S25040438
	PNL Conductivity (CCK1) High density expanded PVC panel (650x290 mm), S507-CO unit, SF78M/CCK probe-holder, CCK1GT-PT100 cell; assembling, testing and packaging costs included	S25040538
	PNL Conductivity (CMK) High density expanded PVC panel (500x600 mm), with S507-IN unit, SF78M/CMK probe-holder, CMK50 cell, CT-01S signal converter (range to be specified upon order); assembly, test and packaging included	
	PNL Chlorine CLE12 (1 ppm) High density expanded PVC panel (500x600 mm), with S507-ACL unit, PF17 filter-holder with mesh cartridge, CLE12/2019 cell, PNP flow sensor, PT100 temperature probe, installation kit (Kit B); assembly, test and packaging included	S35013158
	PNL Chlorine CLE12 (1 ppm) with pump High density expanded PVC panel (500x600 mm), with S507-ACL unit, PF17 filter-holder with mesh cartridge, CLE12/2019 cell, PNP flow sensor, PT100 temperature probe, PSP161-PKT/AS 0510 dosing pump, SMP18 mounting bracket, installation kit (Kit B); assembly, test and packaging included	S35013158020

ITEM	DESCRIPTION	PART NO.
	PNL Chlorine CLE16 (1 ppm) High density expanded PVC panel (500x600 mm), PSP163B-PKT/AS 0510 pump with built-in chlorine meter, SMP18 mounting bracket, PF17 filter-holder with mesh cartridge, SD-P1 down-flow probe- holder, NPN flow sensor, CLE16 chlorine cell, installation kit (Kit B); assembly, test and packaging included	S37994064B3
	PNL Chlorine / PNL-ClO₂ (2 ppm) - cold water High density expanded PVC panel (500x600 mm), with S507-CAC CLB unit, measurement cell (chlorine: CAC-CLI-B / chlorine dioxide: CAC-CDX-B), SD-CAC1 probe-holder, PNP flow sensor, PT100 probe, PF17 filter-holder with mesh cartridge, installation kit (Kit B); assembly, test and packaging included	S35010359 (Cloro)
		S350912359 (ClO ₂)
	PNL Chlorine / PNL-ClO₂ (2 ppm) - cold water High density expanded PVC panel (595x750 mm), with S507-CAC CLB unit, measurement cell (chlorine: CAC-CLI-B / chlorine dioxide: CAC-CDX-B), SD-CAC1 probe-holder, PNP flow sensor, PT100 probe, PF17 filter-holder with mesh cartridge, PSP161-PKT/AS 0510 pump, SMP18 mounting bracket, installation kit (Kit B); assembly, test and packaging included	S35010359020 (Cloro)
		S350912359020 (ClO ₂)
	PNL Chlorine + ClO₂ (2 ppm) - hot water High density expanded PVC panel (750x595 mm), with S507-CAC CLB unit, CAC-HT-B cell, SD-CAC1 probe-holder, PNP flow sensor, PT100 probe, PF16-HT filter-holder with steel cartridge, PSP161-PKT/AS 0510 pump, SMP18 mounting bracket, circulation pump, installation kit (Kit B/HT); assembly, test and packaging included	S65013068020 (Cloro)
		S65093068020 (ClO ₂)
	PNL-TURB 0-100 NTU High density expanded PVC panel (500x600 mm), with S507-TU unit, CTS07-SS cell with pre-amplifier, ATS96 automatic cleaning group; assembly, test and packaging included	S2503011
	PNL-TURB 0-500 NTU High density expanded PVC panel (500x600 mm), with S507-TU unit, CTS07-FS cell with pre-amplifier, ATS96 automatic cleaning group; assembly, test and packaging included	S2503021

INSTRUMENTS FOR INDUSTRIAL APPLICATIONS

MATRIX Series - DOSING SKIDS (MDS)

The MATRIX series skids are a professional and extremely versatile solution for the installation of chemicals dosing stations. They are built following reliability and safety standards, supplied with conformity certificate and technical file complete with mechanical and electrical diagrams.

They are typically used for the reagent dosage in cooling towers, for the legionella control in DHW circuits, for the sanitation with oxidants and, in general, for the treatment of potable, process or waste waters.

- **Fast and safe installation**, thanks to the **Plug & Play** configuration
- Installation **compliant with regulations**, guaranteed by the manufacturer
- **Error-free** electrical wiring and accessories installation
- **Conduction safety** for the operator, **environmentally safe** chemicals storage
- Pumps and instrument provided **already configured according to the requested control logic**
- Guaranteed for indoor installation or in a protected area (e.g. under shed)
- Metering lines in PVC, PVCC, PP, PVDF, depending on the chemical to be dosed
- **PROXIMA PSP** series dosing pumps, flow rate from 2 to 32 l/h, PVDF dosing head, fully configurable
- **IP65 electrical panel**
- Power supply 115 or 230 V~
- Versions with two separated metering lines or double dosage of the same product, with optional standby pump with automatic start
- The standard skid is made of **heat-sealed polypropylene sheet**, provided with electrical control panel or connection box for electrical commands; can include a measurement instrument for driving a dosing pump
- Can include only the pumps section, or pumps with electrical panel and instrument, also mounted on a **painted metallic frame** equipped with wheels and support base for reagent tanks
- The skid can be supplied **with or without front door**, with removable protection shield or with double door
- **Compartment for chemicals, safety container against accidental spills in the environment** (also available with drain valve), **product leakage alert**
- Suction from tank, internal tank (50L) or external equipped with suction lance with level probe; metering line complete with flow meter, dosing points and static mixer
- Available **standard accessories**: calibration cylinder, degassing tool, water and air washing line, delivery safety valve, anti-siphon valve, injection flow control device, drainage of the washing line
- Other **accessories on request**: LED lights, heating of the storage compartment, alarm light tower, GSM remote control, emergency push-button

Contact STEIEL for specific evaluations and for choosing the configuration which better fits to your application needs.

AUTOMATIC BLEEDING SYSTEMS FOR COOLING TOWERS

- Complete systems including conductivity controller, conductivity cell, motorized valve and hydraulic kit, with or without dosing pump
- Economic version with pump with built-in conductivity meter and specific software, conductivity cell, solenoid valve and hydraulic kit
- Versions available with different sizes for hydraulic kit
- Standard cell with K=1 and range 20 mS/cm
- Power supply standard: 230 V~

Panel with PSP161

Panel with EF161

Panel with two PSP161 pumps

Cabinet without pump

ITEM	DESCRIPTION	PART NO.
STANDARD PANEL with PSP161	PP panel (495x660 mm) with S506 unit, PSP161-PKT 0510 pump, CCK1GT-PT100 cell, motorized valve and 1" hydraulic kit	S24040503018
STANDARD PANEL with two PSP161	PP panel (900x700 mm) with S506 unit, two PSP161-PKT/AS 0510 pumps, CCK1GT-PT100 cell, motorized valve and 1" hydraulic kit	S2404050318018
STANDARD PANEL with EF161	PP panel (495x660 mm) with S506 unit, EF161-PGV 0506 pump, CCK1GT-PT100 cell, motorized valve and 1" hydraulic kit	S24040503004
STANDARD PANEL without pump	PP panel (495x660 mm) with S506 unit, CCK1GT-PT100 cell, motorized valve and 1" hydraulic kit	S24040503
STD CABINET without pump	Fiberglass cabinet (805x615x315 mm), door with transparent window and galvanized steel mounting plate; with S506 unit, CCK1GT-PT100 cell, motorized valve and 1" hydraulic kit	S04040503
ECO PANEL with EF164 EVO	Expanded PVC panel (500x600 mm) with EF164E-PGV 0506 pump with built-in conductivity meter and SW for automatic bleeding, CCK1G cell, solenoid valve and ¾" hydraulic kit	S2796060237
S506	Conductivity controller with SW for automatic bleeding of cooling towers	80250001
EV STD/PVC	Spare 1" PVC motorized valve, glued assembly type, for standard panels and cabinets	54500264
EV STD	Spare 1" brass motorized valve for standard panels, for productions until January 2020	54500255
EV ECO	Spare solenoid valve for ECO panels	54500259
CCK1GT-PT100	Conductivity cell with PTFE body, K=1, built-in PT100 sensor - spare cell for standard panels	80290003
CCK1G-5S / M8	Conductivity cell with PVC body, K=1 - spare cell for ECO panels	80290045

Panels with different power supply and 2" hydraulic kit are also available on request.

INSTRUMENTS FOR INDUSTRIAL APPLICATIONS

ANTI-LEGIONELLA SYSTEMS

Ready-to-use stations for dosing and / or monitoring filming products and disinfectants in circuits for sanitary hot water treatment.

These systems are suitable for the use of formulations commonly found in the market; it is anyway advisable to contact our technical department before proceeding with the order.

See next pages for info about chlorine dioxide generators.

BASIC SYSTEM

Tank with PSP161 dosing pump and suction lance;
to be used with a
volumetric water meter.

PROFESSIONAL SYSTEM

Panel designed for the constant monitoring and continuous disinfection of water.
Complete with an electronic unit that measures the oxidant (disinfectant) concentration, and triggers a PSP161 pump for the accurate dosing of a bactericide agent, proportional to reading. Two more PSP161 pumps dose a filming product and a bactericide, respectively, proportionally to the signal of a pulse-emitting water meter.
Options: recirculation pump and remote control system with RW14.

ITEM	DESCRIPTION	PART NO.
BASIC System	100 L tank, PSP161-PKT AS 0510 dosing pump, suction lance with PTFE ball valve and built-in level sensor	8900214514/PKT-AS
PRO System, ClO ₂	Pre-assembled panel (900x700 mm) including S507-CAC unit (for ClO ₂ or chlorine monitoring), two PSP161-PKT AS 0510 pumps for bactericide dosing, one PSP161-PKT 0510 for filming agent dosing, CAC-HT-B cell and PT100 sensor, probe-holder with flow sensor, mesh filter for hot water and connection box with integrated signal splitter; recirculation pump and RW14 not included	S650930990182222
PRO System, Chlorine	Brass electro-pump with stainless steel and carbon rotor group, for recovery of sampling line hot water (max 65 °C); flow rate max 1 m ³ /h, pressure max 3 m	S650130990182222
		94100001
	Pre-assembled panel for recovery of sampling line water; resistant to high temperature of sanitary hot water recirculation plants (max 95 °C); complete with circulation pump; flow rate max 3.4 m ³ /h; pressure max 6 m	80509089
		Version with filter
		80509088
		Version without filter
Black polyethylene (LLDPE) tank, 50 litres		
Black polyethylene (LLDPE) tank, 100 litres		
CRM-012	Pulse-emitting water meter, multi-jet, cold water, 1/2" fittings	94000101
CRM-034	Pulse-emitting water meter, multi-jet, cold water, 3/4" fittings	94000111
CRM-100	Pulse-emitting water meter, multi-jet, cold water, 1" fittings	94000121
CRM-112	Pulse-emitting water meter, multi-jet, cold water, 1.1/2" fittings	94000141

BG08 - CHLORINE DIOXIDE GENERATORS

Generator with built-in measurement system and two external dosing pumps

Protection shield for the hydraulic part, which allows easy operation on the PLC

Generator mounted on a self-supporting metallic skid

- “In situ” production of chlorine dioxide in aqueous solution, through an acidification process of chlorite
- **PLC unit** with multi-language touch-screen display for the simplified full management of the generator
- Optional measurement system, for readings in cold or hot water
- **Input for gas sensor included:** gas detector to be ordered separately
- **Multipoint proportional dosage** with up to three injection points
- Electronic-free dosing pumps, controlled by the PLC unit
- Manual priming function for pumps maintenance and calibration
- Safety controls: level sensors, flow meters and gas detector of chlorine dioxide in air
- Remote **control and management of the PLC** through Internet, included
- Production rate from 4 to 10, 20 or 40 g/h ClO₂ (depending on model)
- Power supply: 230 V~ (standard), 115 V~

BG08 GENERATORS

BG08, 10 g/h, with accumulation tank and 1 external dosing pump

BG08, 20 g/h, with accumulation tank and 1 external dosing pump

BG08, 40 g/h, with accumulation tank and 1 external dosing pump

Additional external dosing pump (up to 3 external pumps in total)

Optional S508 unit, CAC-CDX-B cell and probe holder

Optional S508 unit, CAC-HT-B cell (hot water), PT100 sensor and probe-holder with installation kit for hot water (kit B/HT)

INSTRUMENTS FOR INDUSTRIAL APPLICATIONS

ACCESSORIES AND SPARE PARTS FOR BG08 GENERATORS	PART NO.
Suction lance with level sensor, for 50 L tank, red pipe (acid)	77020040
Suction lance with level sensor, for 50 L tank, blue pipe (chlorite)	77020041
Suction lance with level sensor, for 100 L tank, red pipe (acid)	80509100
Suction lance with level sensor, for 100 L tank, blue pipe (chlorite)	80509101
Suction lance with level sensor, for 300 L tank, red pipe (acid)	80509104
Suction lance with level sensor, for 300 L tank, blue pipe (chlorite)	80509105
Safety / drip vessel for 25 L reagent tank, red	36000080
Safety / drip vessel for 25 L reagent tank, blue	36000081
Flow control with PNP sensor and cable, model for reagent pumps	94831110
Spare hydraulic part for reagent pump flow control	94831100
Flow control with PNP sensor and cable, model for water pump	94851010
Spare hydraulic part for water pump flow control	94851000
Float valve	80509115
Toxic gas detector for chlorine dioxide in air	80509196
Graduated plastic cylinder (500 ml) for pump calibration	35999120
Spare carbons for tank filter, 120 g pack	80509112
Complete spare pump for reagent dosage or external pump	95700417
Spare dosing head for reagent and external pumps	97000276
Complete spare pump for water dosage	95702005
Spare reactor bottom valve, for injection of reagents and water	97000181
O-ring for reactor bottom valve	37030106
Spare outlet fitting for accumulation tank	97000161
Kit for 2018 upgrading of generators with two external pumps	80509122
Kit for periodic maintenance of generators with 1 external pump	80509123
Kit for periodic maintenance of generators with 2 external pumps	80509124
Kit for periodic maintenance of generators with 3 external pumps	80509125
SHP01/CLO2 Plus - Portable photometer for chlorine dioxide analysis	88000038
DPD reagent for analyses with SHP01/CLO2 Plus photometer, 50 tablet pack	87000052
DPD reagent for analyses with SHP01/CLO2 Plus photometer, 250 tablet pack	87010052
Glycine reagent for analyses with SHP01/CLO2 Plus photometer, 250 tablet pack	87020007
PF17 - Filter-holder for cold water (up to 50°C), with 80 µm mesh cartridge	80710026
PF16-HT - Filter-holder for hot water (up to 80°C), with 50 µm mesh cartridge	80710030
PTFE hose, 4x6 mm, 100 m skein, sold by meter	36506003
Spare membrane-cap for CAC-CDX-B cell (CAC-ME-2, transparent)	80611002
Spare electrolyte for CAC-CDX-B cell (CAC-EL-5), 100 ml	80611025
Spare electrolyte for CAC-HT-B cell (CAC-EL-HT), 100 ml	80612005
Plexiglas protective shield for BG08 generators	80509116
Face mask for protection from toxic gases with filter for ClO ₂	80509113
Painted metallic skid for BG08 installation, equipped with wheels and support base for reagent tanks	70201007

pH and ORP ELECTRODES

EURO2010-PH AND EURO2110-RX SERIES

- Combined electrodes for industrial applications**

- Glass body, dia. 12 mm
- Gel or liquid (only for refillable model) electrolyte
- pH electrodes: range 0...14 pH, minimum conductivity of sample 50 µS/cm
- ORP electrodes: range ±2000 mV

pH Electrodes

ITEM	MEMBRANE	CONNECTION (THREAD)	NOTES	WORKING TEMPERATURE	PRESSURE MAX.	PART NO.
EURO2005-pH	Glass S	Double (S8)	Single ceramic diaphragm, plastic body	0 ... 80 °C	8 bar	80092005

	BNC/CV15	15 m	S7 screw + BNC	80099006
	BNC/CV20	20 m	S7 screw + BNC	80099007

Notes:

- To avoid interferences in the signal transmission, use cables with a maximum length of 20 meters; for longer distances, we recommend the insertion of an SG18 pre-amplifier (see page 6).
- Cables with tips:** use for connect the sensor to the S503, S504, S507, S508, MC14, EF214 instruments.
- Cables with BNC:** use for connection to the pool controllers (series EF250, EF260, EF300, EF315, EF117) and dosing pumps with built-in pH/ORP meter (PSP162, EF162 EVO, EF158, EF110).

ITEM		DESCRIPTION	PART NO.
	CV5	S7 screw connector for industrial electrodes with cable dia. 5 mm	51300501
	BNC/M	Male BNC connector	51300005

pH and ORP ELECTRODES EURO2000-PH AND EURO2100-RX SERIES

- **Combined electrodes for swimming pools**
- Shockproof, plastic body, dia. 12 mm
- Gel electrolyte KCl 3M
- pH electrodes: range 0...14 pH, minimum conductivity of sample 50 µS/cm
- ORP electrodes: range ±2000 mV

CONDUCTIVITY CELLS

CCK SERIES

- Two-electrode cells, with shielded cable (resin-bonded to the cell)
- Models with threaded body for direct in-line installation
- Models with stem body for industrial applications, also available with connector for use with portable meter
- Models with M8 connector for PSP164 and EF164 EVO pumps

* Unshielded cable

** If your installation needs a cable longer than the standard one, please contact STEIEL for a specific evaluation.
Extending the cell cable can affect measurement and it is not advisable.

CONDUCTIVITY CELLS

CMK SERIES FOR INDUCTIVE MEASUREMENTS

- Conductivity measurement with inductive method, up to 500 mS/cm
- Built-in temperature sensor, automatic temperature compensation
- Standard cable length 10 m
- Immersion installation or in down-flow probe-holder
- In-line mounting with special accessories (PP or steel)
- To be used together with special signal transmitter, available with watertight casing for wall installation or with support for mounting on DIN slot, 4-20 mA output, different options for power supply voltage and full scale values

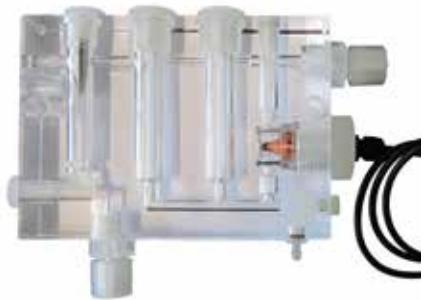

ITEM	DESCRIPTION	PART NO.
CMK50	Inductive conductivity cell with thread for installation in probe-holder, cable 10 m	80280000
CMK-AS	AISI304 stainless steel fitting, DN50, for in-line installation	80280010
CMK-ADAS	Adapter for mounting the CMK50 cell on CMK-AS	80280020
CMK-PP	PP fitting, DN50, for in-line installation	80280011
CMK-ADPP	Adapter for mounting the CMK50 cell on CMK-PP	80280021
CTI-01 (installation on DIN slot)	Signal transmitter, 230 V~, 4-20 mA output, adjustable range up to 10, 20 or 50 mS/cm	80282010
	Signal transmitter, 230 V~, 4-20 mA output, range up to 100 mS/cm	80282015
	Signal transmitter, 230 V~, 4-20 mA output, range up to 200 mS/cm	80282016
	Signal transmitter, 230 V~, 4-20 mA output, range up to 500 mS/cm	80282017
CTI-01/S (watertight casing, wall installation)	Signal transmitter, 230 V~, 4-20 mA output, range up to 5 mS/cm	80281010
	Signal transmitter, 230 V~, 4-20 mA output, range up to 10 mS/cm	80281011
	Signal transmitter, 230 V~, 4-20 mA output, range up to 20 mS/cm	80281012
	Signal transmitter, 230 V~, 4-20 mA output, range up to 50 mS/cm	80281013
	Signal transmitter, 230 V~, 4-20 mA output, range up to 100 mS/cm	80281015
	Signal transmitter, 230 V~, 4-20 mA output, range up to 200 mS/cm	80281016
	Signal transmitter, 230 V~, 4-20 mA output, range up to 500 mS/cm	80281017

Upon request, transmitters are also available with 24 V ac/dc power supply.

CLE CELL SERIES

CLE12, OPEN AMPEROMETRIC CELL

- Measurement of free chlorine, bromine and chlorine dioxide
- Two-electrode cell, copper and platinum (Cu/Pt), with anti-passivation system
- Reading up to 2 ppm, or 5 ppm with saturation error
- Cell assembled in down-flow probe-holder, with flow regulator and housings for two sensors dia. 12 mm, flow and PT100 sensors
- Probe-holder with methacrylate body, connections for hose 6x8 mm and sampling valve
- Working temperature: max 40 °C
- Supplied with installation kit (Kit B)

ITEM	DESCRIPTION	PART NO.
CLE12/2019	Open amperometric cell for measurement of chlorine (bromine and chlorine dioxide) in water, with housings for PT100 probe, flow sensor and two electrodes dia. 12 mm	80610130
CLE11	Open amperometric cell for measurement of chlorine (bromine and chlorine dioxide) in water, with housings for PT100 probe and flow sensor	80610140
CLE12-SENS	Spare Cu/Pt electrode group for CLE12, with 1 m cable Spare Cu/Pt electrode group for CLE12, with 2,5 m cable; spare part for BG08 generators	80610115 80610116
Option for cells or electrode group: M8 connector, for use with PSP163 and EF163 EVO		
Kit-sfere/CLE	Kit of Pyrex balls (spare part)	80610110
Kit elettrodo	Kit of rings and seals for the installation of one sensor dia. 12 mm	80610265
Spare methacrylate body for CLE12/2019 cell, with PP fittings and flow regulator		
Kit flow	Flow control kit for CLE12 and SD probe-holder series	80610114
Kit grounding	Grounding kit for CLE12 and SD probe-holder series	80610111
Kit B	Installation kit, including 2 PVC valves M/F ½", 2 PP fittings with ½" threaded nut, PE hose 6x8 mm (5 m)	80509915

CLE16, OPEN AMPEROMETRIC CELL

- Measurement of free chlorine, bromine and chlorine dioxide
- Three-electrode cell, stem dia. 12 mm
- Fixed cable, 1 m
- Measurement range: 0-5 ppm
- Working conditions: temperature max 45 °C, pressure max 3 bar, range pH 5-9
- Suitable to measurement in potable water and swimming pool, even in presence of electrolysis process

ITEM	DESCRIPTION	PART NO.
CLE16	Three-electrode, open amperometric cell, cable 1 m	80610126
CLE16/M8	Three-electrode, open amperometric cell, cable 1 m with M8 connector	80610127

CAC CELL SERIES

CLOSED AMPEROMETRIC CELLS

- Full range of cells with ion-selective membrane for measurements of free chlorine (free / active, organic / available, total), chlorine dioxide, chlorite, bromine, hydrogen peroxide, ozone and peracetic acid
- Four-wire direct cable, standard length 1 m
- Conductivity of the sample (aqueous solution): 50 ... 10000 µS/cm
- Model for determining chlorine dioxide & chlorine in hot water (max 70)
- Spare parts: specific membrane-caps and electrolytes

CELL	ANALYSIS OF	RANGE (ppm)	RECOMMENDED USE	TEMPERATURE / PRESSURE MAX	CONNECTION	PART NO.
CAC-CLI-XB	Active chlorine	0.01-0.5	Cooling, industrial and potable water, or with high (constant) pH value	45 °C / 1 bar	Cable 1 m	80611100
CAC-CLI-B	Active chlorine	0.02-2.0		45 °C / 1 bar	Cable 1 m	80611101
CAC-CLI-SW	Active chlorine	0.1-10.0	Analysis in seawater	45 °C / 1 bar	Cable 1 m	80611103
CAC-CLI-M1	Active chlorine	0.2-20.0	Industrial, washing and waste water	45 °C / 1 bar	Cable 1 m	80611104
CAC-CLI-M2	Active chlorine	0.5-50.0		45 °C / 1 bar	Cable 1 m	80611105
CAC-CLI-A1	Active chlorine	1-100		45 °C / 1 bar	Cable 1 m	80611106
CAC-CLI-A2	Active chlorine	10-200		45 °C / 1 bar	Cable 1 m	80611107
CAC-CLO-B	Available chlorine	0.02-2.0	Swimming pool water treated with chlorine-organic disinfectants or "in situ" salt electrolysis	45 °C / 1 bar	Cable 1 m	80611201
CAC-CLO-M1	Available chlorine	0.1-10.0		45 °C / 1 bar	Cable 1 m	80611203
CAC-CLO-M2	Available chlorine	0.2-20.0			Cable 1 m + M8	80611283
CAC-CTO-M1	Total chlorine	0.05-5.0	Potable, industrial and waste water	45 °C / 1 bar	Cable 1 m	80611302
CAC-CTO-M2	Total chlorine	0.1-10.0			Cable 1 m	80611303
CAC-CDX-B	Chlorine dioxide	0.02-2.0	Chlorine dioxide in cold water	45 °C / 1 bar	Cable 1 m	80611401
CAC-BRO-M	Bromine (BCDMH)	0.1-10.0			Cable 1 m + M8	80611481
CAC-HYP-XB	Hydrogen peroxide	0.5-50.0	All types of water, even dirty or chemically contaminated	45 °C / 1 bar	Cable 1 m	80611605
CAC-HYP-B		2-200		45 °C / 1 bar	Cable 1 m	80611607
CAC-HYP-M		20-2000		45 °C / 1 bar	Cable 1 m	80611608
CAC-OX3-B	Ozone	0.02-2.0	Potable and pool water	45 °C / 1 bar	Cable 1 m	80611701
CAC-PAA-B	Peracetic acid	1-200	Aseptic filling for food use	45 °C / 1 bar	Cable 1 m	80611807
CAC-PAA-M		10-2000		45 °C / 1 bar	Cable 1 m	80611808

CELL	ANALYSIS OF	RANGE (ppm)	RECOMMENDED USE	TEMPERATURE / PRESSURE MAX	CONNECTION	PART NO.
CAC-CLT-XB	Chlorite	0.01-0.5	Potable and washing water	45 °C / 1 bar	Cable 1 m	80611900
CAC-CLT-B	Chlorite	0.02-2.0		45 °C / 1 bar	Cable 1 m	80611901

Spare membrane-caps and electrolytes

ITEM	DESCRIPTION	SPARE PART FOR CELLS	PART NO.
CAC-EL-1	Spare electrolyte, 100 ml	CAC-CLI-XB, CAC-CLI-B, CAC-CLI-SW	80611021
CAC-EL-2	Spare electrolyte, 100 ml	CAC-CLI-M1, CAC-CLI-M2, CAC-CLI-A1, CAC-CLI-A2	80611022
CAC-EL-3	Spare electrolyte, 50 ml	CAC-CLO and CAC-CTO Series	80611023
CAC-EL-4	Spare electrolyte, 50 ml	CAC-BRO-M	80611024
CAC-EL-5	Spare electrolyte, 100 ml	CAC-CDX-B	80611025
CAC-EL-6	Spare electrolyte, 100 ml	CAC-OX3-B	80611026
CAC-EL-7	Spare electrolyte, 50 ml	CAC-HYP Series	80611027
CAC-EL-8	Spare electrolyte, 100 ml	CAC-PAA Series	80611028
CAC-EL-9	Spare electrolyte, 50 ml	CAC-CLT Series	80611029
CAC-EL-HT	Spare electrolyte, 100 ml	CAC-HT-B	80612005
CAC-ME-1	Membrane-cap, blue	CAC-CLI-XB, CAC-CLI-B, CAC-CLI-SW, CAC-CTO-XB, CAC-BRO-M	80611001
CAC-ME-2	Membrane-cap, transparent	CAC-CLI-M1, CAC-CLI-M2, CAC-CLI-A1, CAC-CDX-B, CAC-OX3-B	80611002
CAC-ME-3	Membrane-cap, white	CAC-CLI-A2, CAC-PAA Series	80611003
CAC-ME-4	Membrane-cap, orange	CAC-CLO and CAC-CTO Series	80611004
CAC-ME-5	Membrane-cap, grey	CAC-HYP Series	80611005
CAC-ME-6	Membrane-cap, black	CAC-CLT Series	80611006
Probe regeneration service, with new membrane-cap and electrolyte		All cells for analysis in cold water	
		CAC-HT cell	

CP CELL SERIES

SPARE ELECTROLYTES AND MEMBRANE-CAPS (items available till stock lasts)

ITEM	DESCRIPTION	PART NO.
CP-CLI-RE	Electrolyte for CP-CLI cells, 100 ml bottle	80610232
CP-CLJ-RE	Electrolyte for CP-CLJ cells, 100 ml bottle	80610235
CP-CLO-RE	Electrolyte for CP-CLO cells, 100 ml bottle	80610231
CP-CTO-RE	Electrolyte for CP-CTO cells, 100 ml bottle	80610236
CP-BC1-RE	Electrolyte for CP-BC1 cells, 100 ml bottle	80610234
CP-X-HT-RE	Electrolyte for CP-x/HT cells, 50 ml bottle	80610230
CP-1-RM	Spare membrane-cap for CP-CLO and CP-CTO cells	80610241
CP-2-RM	Spare membrane-cap for CP-CLI and CP-BC1 cells	80610242
CP-4-RM	Spare membrane-cap for CP-CLJ cell	80610244
Self-cleaning system for CP cell series		80610200

TEMPERATURE SENSORS

- Series of temperature probes, of different materials and shapes
- Models with anti-acid Pyrex stem body, steel models, probes with threaded body for installation in probe-holder or in-line mounting
- Sensor PT100, PT1000 or NTC10K
- Welded cable

ITEM	DESCRIPTION	PART NO.
PT100S	Probe Pt100, anti-acid Pyrex body, dia. 12 mm, cable 2 meters	80390001
PT100S2	Probe Pt100, anti-acid Pyrex body, dia. 12 mm, double sensor, cable 5 meters	80390002
PT100A	Probe Pt100, stainless steel, air measurements, with adjustable flange, dia. 8 x L 600 mm	80390005
PT100I	Probe Pt100, stainless steel, dia. 8 mm, immersion installation, 1/2" GAS connection	80390003
PT100P	Probe Pt100, stainless steel, dia. 8 mm, with pocket, immersion installation, 1/2" GAS connection	80390004
PT101-CP1	Probe Pt100, threaded PP body, max working temperature 100°C	Cable 0.75 m
PT101-CP2		Cable 1.5 m
PT101-CP3		Cable 2.5 m
PT1000	Probe Pt1000 for SHP series of portable meters, AISI316 sleeve, dia. 4 x L 200 mm, with spiral cable	80390060
NTC-S	Probe NTC-10K, anti-acid Pyrex body, dia. 12 mm	80390000
NTC-I	Probe NTC-10K, stainless steel, dia. 8 mm, immersion installation, connection 1/2" GAS	80390029

TURBIDITY CELLS

- Turbidity cells compliant to the ISO7027 international standards
- SS (Side Scattering) and FS (Forward Scattering) models
- Complete system including cell and pre-amplifier, assembled on a panel
- Liquid inlet and outlet with 1/4" GAS connection on 12 mm hose-holder
- Light source: high efficiency red LED
- Optional auto-cleaning system
- Signal output: 4-20 mA

ITEM	DESCRIPTION	PART NO.
CTS07-SS	Panel with turbidity cell, range up to 100.0 FTU (NTU)	85700040
CTS07-FS	Panel with turbidity cell, range up to 500.0 FTU	85700041
ATS96	Automatic cleaning system for cells 100 FTU and 500 FTU	85700035

SOLUTIONS

- Full range of solutions for the calibration and periodic maintenance of sensors.

ITEM	90 ml BOTTLE	500 ml BOTTLE
	PART NO.	PART NO.
Buffer solution pH4	80090095	80090093
Buffer solution pH7	80090096	80090094
Buffer solution pH9	80090097	80090100
ORP solution 220 mV @ 25°C	80190091	80190090
Electrode storage solution	-	80090091
Solution 147 µS/cm @ 25°C	80290156	80290155
Solution 1409 µS/cm @ 25°C	80290154	80290153
Solution 12280 µS/cm @ 25°C	80290152	80290151
Turbidity solution 100 FTU	-	85700100
Turbidity solution 400 FTU	-	85700101
Turbidity solution 4000 FTU	-	85700102

Note: the turbidity standard solutions are formazine-based, with a shelf life of 1 month.

ITEM	PART NO.	
KRE, Kit of solutions for cleaning and storage of pH & ORP electrodes	80099902	
Kit refilling for refillable electrodes	Small bottle (empty)	36000100
	Hose, sold by meter	36502111
Electrolyte for refillable electrodes, 250 ml bottle	80090088	

PROBE-HOLDERS

S92 / S94 SERIES, FOR IN-LINE INSTALLATION

- Probe-holders for direct in-line installation of one sensor

ITEM	MATERIAL	CONNECTION	PRESSURE MAX	TEMPERATURE MAX	PART NO.
S92/T	PP	½" GAS	2 bar	70 °C	80820005
S92/P	PVC with PVC protection	½" GAS	2 bar	45 °C	80820001
S94/I	Stainless steel	½" GAS	2 bar	120 °C	80820002
S92/PG13.5 PVC	PVC ($\Delta L=65$ mm)	PG13.5 / 3/4" GAS	5 bar	45 °C	70100211
S92/PG13.5 PP	PP white ($\Delta L=65$ mm)	PG13.5 / 3/4" GAS	5 bar	70 °C	70100311

ITEM	DESCRIPTION	PART NO.
Collar 50	DN50 clamp, to be used with S92 models with ½" connection	36307706
Collar 63	DN63 clamp, to be used with S92 models with ½" connection	36307707

S86 SERIES, FOR IMMERSION INSTALLATION

- Probe-holders for immersion installation of one or two sensors
- External diameter 60 mm
- Models for CCK or CMK with ½" connection
- Adjustable flange

ITEM	MATERIAL	FLANGE MAX (mm)	SENSOR(S)	TEMPERATURE MAX	PART NO.
S86-60	PVC	710	1 x CCK o CMK	40 °C	80800004

S86-1002M	PP	1000	2 x dia. 12 mm	80 °C	80800018

ITEM	PART NO.
Self-cleaning kit	80099900

SF17 / SF78 SERIES, DOWN-FLOW MODELS WITH CUP

- Probe-holders for installation of one, two or three sensors
- Filter-holder for cold water and for hot water
- Supplied with mounting bracket, IN-OUT connections, and filtering cartridge ("PF" models only)
- Model SF17 supplied with installation kit (Kit B)

SF17 SF78E SF78M PF17 PF16-HT

ITEM	MATERIAL	FITTINGS	SENSOR(S)	PRESSURE MAX	TEMPERATURE MAX	PART NO.
SF17	Transparent SAN	PP, for hose 6x8 mm Hose-fitting 1/4"	1 x dia. 12 mm	2 bar	50 °C	80810011
SF78E2	Polycarbonate		2 x dia. 12 mm	2 bar	40 °C	80810003
SF78E3	Polycarbonate		3 x dia. 12 mm	2 bar	40 °C	80810004
SF78E/CCK	Polycarbonate		1 x CCK	2 bar	40 °C	80810005
SF78M3	PP	Hose-fitting 1/2"	3 x dia. 12 mm	2 bar	80 °C	80810002
SF78M/CCK	PP		1 x CCK	2 bar	80 °C	80810006
SF78M/CMK	PP		1 x CMK	2 bar	80 °C	80810000
PF17	Transparent SAN	PP, for hose 6x8 mm	-	8 bar	50 °C	80710026
PF16-HT	Polyamide	PP, for hose 6x8 mm	-	15 bar	80 °C	80710030

DESCRIPTION	PART NO.
Filtering PP cartridge with washable PA mesh, 80 µm, to be used with models SF17 / PF17	80710034
Transparent SAN cup, PP threaded head with brass inserts and NBR70 seals; spare part for SF17 / PF17	80710031
Mounting bracket for SF17 / PF17	80710032
Filtering cartridge with washable AISI304 mesh, 50 µm, to be used with model PF16-HT	80710025
Polyamide filter-holder cup; spare part for PF16-HT	80710021
Mounting bracket for PF16-HT	80710022
PP connection with O-ring for hose 6x8 mm; spare part for SF17 / PF17 / PF16-HT	97000164
Spare polycarbonate cup for SF78E series	33000010
Kit B: Installation kit, including 2 PVC valves M/F 1/2", 2 PP fittings with 1/2" threaded nut, PE hose 6x8 mm (5 m)	80509915
Kit B/HT: Installation kit, including 2 PP valves M/F 1/2", 2 PP fittings with 1/2" threaded nut, PE hose 6x8 mm (5 m); max 70 °C	80509916

SD SERIES, DOWN-FLOW MODELS WITH METHACRYLATE BODY

- Models with housings for PT100 sensor, and micro-magnetic sensor for water flow control
- PP fittings for hose 6x8 mm**
- Supplied with installation kit (Kit B)
- If the probe-holder is intended to be used with hot water (max 70 °C), you also need to buy two PP valves (part no. 36316592)

ITEM	SENSOR(S)		PRESSURE MAX	TEMPERATURE MAX	PART NO.			
	MEASUREMENT	PT100 + FLOW

ITEM	DESCRIPTION				PART NO.			
Kit electrode	Kit of threaded rings & seals for the installation of one sensor dia. 12 mm				80610265			
Kit cell	Kit of threaded rings & seals for the installation of one CAC cell				80610264			
Kit flow		Flow control kit for CLE12 and SD probe-holder series			80610114			
Kit grounding		Grounding kit for CLE12 and SD probe-holder series			80610111			
Kit B		Installation kit, including 2 PVC valves M/F 1/2", 2 PP fittings with 1/2" threaded ring, PE hose 6x8 mm (5 m)			80509915			
Kit B/HT		Installation kit, including 2 PP valves M/F 1/2", 2 PP fittings with 1/2" threaded ring, PE hose 6x8 mm (5 m); max 70 °C			80509916			
Valve HT	PP valve M/F 1/2", for hot water (max 70 °C)				36316592			
Hose PE 6x8	PE hose, 6x8 mm, 100 m skein, sold by meter				36501008			

FLOW SENSORS FOR PROBE-HOLDERS

ITEM	DESCRIPTION	PART NO.
IL-SF	 "In-line" flow sensor	97009202
Flow control SDE	 Flow sensor for SDE	97009203
	SDE electrode-holder with pre-assembled flow sensor; connections for hose 8x12 mm; supplied with installation kit (Kit B 8x12)	80610248
SD-SF/PNP		54500009
SD-SF/NPN		54500010
SD-SF/NPN M8		80610000

PORABLE INSTRUMENTS

SHP02 SERIES

- Portable digital instruments
- Manual or automatic temperature compensation
- Two-row alphanumeric LCD, with backlight
- Models for measurements of pH/redox/temperature and conductivity
- Supplied in hard carrying case, w/ measurement sensors & calibration solutions (pH/ORP only)
- Battery-powered (1 x 9V, included)

ITEM	DESCRIPTION	PART NO.
SHP02-pH/RX	pH/ORP meter supplied with plastic pH electrode, PT1000 probe and calibration solutions	S49070143
	pH/ORP meter supplied with plastic ORP electrode and calibration solution	S49080143
	pH/ORP meter supplied with plastic pH and ORP electrodes, PT1000 probe and calibration solutions	S49030343
	pH/ORP meter supplied with glass pH and ORP electrodes, PT1000 probe and calibration solutions	S49030243
SHP02-CO	Conductivity meter with adjustable cell constant and automatic /manual measurement range; with CCK0,1P cell (200 mS/cm)	S49041243
	Conductivity meter with adjustable cell constant and automatic /manual measurement range; with CCK1P cell (20 mS/cm)	S49041343
	Conductivity meter with adjustable cell constant and automatic /manual measurement range; with CCK10P cell (2000 µS/cm)	S49041443

SHP01 PLUS SERIES

- Portable digital photometers
- Backlit LCD, automatic selection of wavelength
- IP67 protection, suitable to field use
- Supplied in hard carrying case, with plastic cuvettes, crushing rods and starting kit of reagents
- Battery-powered (2 x 1.5V AA, included), with automatic shut-down

ITEM	DESCRIPTION	PART NO.
SHP01/3 Plus	Analysis of free & total chlorine (0-5 ppm), pH (6.5-8.4 pH), cyanuric acid (2-200 ppm)	88000037
SHP01/6 Plus	Analysis of free & total chlorine (0-5 ppm), bromine (0-5 ppm), pH (6.5-8.4 pH), cyanuric acid (2-200 ppm), alkalinity (10-500 ppm with Alkaphot), calcium hardness (5-500 ppm with Calcicol)	88000050
SHP01/NH Plus	Analysis of ammonia	88000026
SHP01/CLO2 Plus	Analysis of chlorine dioxide (0-10 ppm), free and total chlorine (0-5 ppm)	88000038
SHP01/O3 Plus	Analysis of ozone in water (0-3 ppm)	88000036
SHP01/AS	Digital instrument for arsenic analysis	88000027
SHP01/TURB	Portable turbidity meter (0.01-1050 NTU)	88000025
CUV-RI-SHP01	Plastic cuvettes for SHP01 Plus photometers, 5 pcs.	88000042
Crush-kit	Crushing / stirring rods, 10 pcs.	87000001

S7000 PLUS SERIES

- Portable digital photometers for professional use
- Backlit LCD, automatic selection of wavelength, several analysis methods and internal data log
- IP67 protection, suitable to field use
- Models with USB and Bluetooth SMART interfaces
- Supplied in hard carrying case, with glass cuvettes and crushing rods
- Battery-powered (3 x 1.5V AA, included), with automatic shut-down

ITEM	DESCRIPTION	PART NO.
S7009 Plus	Multi-parameter photometer for pools and spa, internal data log up to 100 tests, USB and Bluetooth SMART interfaces	88000032
S7025 Plus	Multi-parameter photometer for pools and spa, internal data log up to 1000 tests, USB and Bluetooth SMART interfaces	88000029
S7100 Plus	Multi-parameter photometer for analysing potable water, wastewater and process water; selectable measure unit	88000031
S7500 Plus	Multi-parameter photometer, internal data log up to 500 tests, USB and Bluetooth SMART interfaces, full range of analyses for wastewater and process water, up to 30 custom methods may be memorized	88000028
CUV-RI-G	Glass cuvettes for S7000 Plus photometers, 5 pcs.	88000040
Crush-kit	Crushing / stirring rods, 10 pcs.	87000001

SHP EVO TESTING PLATFORM

- The next generation measurement, with patented technology of single-use sensors
- Multiparameter testing platform for the analysis of main disinfection parameters: chlorine dioxide, chlorine, chlorite and peracetic acid
- A sophisticated electrochemical technique which removes complexity for the user
- Reduced chance of errors for reliable and highly repeatable results
- Traceable data with integrated data log that can store up to 10'000 results
- No glassware required
- Electronic measurement not affected by ambient light, sample colour, turbidity or floating particles
- Supplied in soft carrying case including check standards, USB cable and international power adapter (sensors to be ordered separately)

ITEM	DESCRIPTION
SHP EVO	Multiparameter platform for chlorine dioxide, free & total chlorine, chlorite and peracetic acid analyses
Chlorine sensors - Low Range	Sensors for 100 analyses of free (10 ppm) & total (75 ppm) chlorine
	Sensors for 500 analyses of free (10 ppm) & total (75 ppm) chlorine
Chlorine sensors - High Range	Sensors for 100 analyses of free (25 ppm) & total (500 ppm) chlorine
	Sensors for 500 analyses of free (25 ppm) & total (500 ppm) chlorine
Chlorine dioxide & chlorite sensors	Sensors for 100 analyses of ClO ₂ (50 ppm) & chlorite (50 ppm)
	Sensors for 500 analyses of ClO ₂ (50 ppm) and chlorite (50 ppm)
Peracetic acid sensors	Sensors for 100 analyses of peracetic acid (2000 ppm)
	Sensors for 500 analyses of peracetic acid (2000 ppm)
Reagent 1 for chlorite analysis	
Reagent 2 for chlorite analysis	
Reagent glycine, to eliminate chlorine and copper interference in chlorine dioxide and chlorite analysis	

TABLET REAGENTS FOR PHOTOMETERS

ELECTROMAGNETIC DOSING PUMPS WITH DIAPHRAGM HORIZONTAL INSTALLATION PROXIMA PSP SERIES, PROFESSIONAL LINE

- Advanced, **multifunctional electronics**, with backlit alphanumeric display
- Mechanical adjustment** of stroke length (injection volume)
- Multilingual interface (Italian, English, French, Spanish, German)
- Two configuration levels, standard and advanced, password-protected
- Dosing schedule at set hours and days (internal clock)
- Counters of injected litres, working hours and strokes of the membrane
- “Service” menu**
- “Autoset” function**
- Self-priming** (only available with optional injection flow control)
- Internal system for **overheating control / safety**
- Dosing chamber with **anti-spill system**
- Multi-voltage power supply: 100-240 V~ (cable w/ Schuko plug)
- Standard digital inputs for external consent and level control
- Optional input for injection flow control
- Optional output, to be chosen among: relay, mA, pulse repetition (SSR)
- Optional RS485 port with **Modbus RTU** communication protocol
- Dosing head with **FDA certification** can be requested upon order
- These pumps are supplied with standard accessory kit (foot filter; injection valve; hoses for suction, delivery and bleed lines), fitting kit, cables with M8 connector for input / output wiring

MODEL	DESCRIPTION
PSP161	Multifunctional pump, with pulse and mA inputs
PSP162	Pump with pH/ORP meter and electrode input on BNC
PSP163A	Pump with chlorine meter and input for CLE12 cell
PSP163B	Pump with chlorine meter and input for CLE16 cell
PSP164	Pump with conductivity meter and input for two-electrode cell with integrated NTC sensor

Technical Characteristics

MODEL	STANDARD INPUTS			OPTIONS UPON REQUEST	
	Level	Ext. Consent / Pulse	Analogic Input	Injection Flow Control	Relay, mA, Pulse Rep. Output or Serial Port

PSP162	x	x	pH/ORP (BNC)	x	x
PSP163A	x	x	Chlorine (with CLE12 cell) *	x	x
PSP163B	x	x	Chlorine (with CLE16 cell) *	x	x
PSP164	x	x	Electrical Conductivity *	x	x

* Range to be specified upon order.

Dosing Head Materials

TYPE	DOSING HEAD	VALVE BODY	VALVE BALL	SEALS
PKT	PVDF	PVDF	CERAMIC	PTFE
PTT	PVDF	PVDF	PTFE	PTFE
MKV	METHACRYLATE	PVC	CERAMIC	FPM

Upon request, these pumps can also be provided with a different colour housing and / or customized front panel.

Available sizes

VERSION	FLOW RATE	PRESSURE MAX	HOSE	DOSING HEAD
0216	2 l/h	16 bar	4x6 mm	PKT
0416 (*)	4 l/h	16 bar	4x6 mm	PKT
0425 (*)	4 l/h	25 bar	4x6 mm	PKT
0510	5 l/h	10 bar	4x6 mm	PKT
0516	5 l/h	16 bar	4x6 mm	PKT
0807	8 l/h	7 bar	5x8 mm	PKT
0810	8 l/h	10 bar	5x8 mm	PKT
1304	13 l/h	4 bar	5x8 mm	PKT
1307	13 l/h	7 bar	5x8 mm	PKT
2002	20 l/h	2 bar	5x8 mm	PKT
2004	20 l/h	4 bar	5x8 mm	PKT
3202	32 l/h	2 bar	9x12 mm	PKT

(*) Size available upon order

Note: the hydraulic specifications refer to standard dosing heads, dosage of no viscous liquids, temperature 25 °C, mechanical stroke 100%, injection rate 180 pulses/minute.

DESCRIPTION

- Optional self-bleeding dosing head (only for 0216, 0510, 0516 models)
- Optional MKV dosing head (only for 0216, 0510, 0516 models)
- Optional PKT dosing head for viscous liquids, up to 500 mPa·s
- Optional PTT dosing head for viscous liquids, up to 500 mPa·s
- Optional “high viscosity” (up to 3000 mPa·s) dosing head, for pumps with flow rate $\geq 5 \text{ l/h}$
- Optional dosing head with FDA certification
- Optional valves with PTFE ball
- Optional relay output, complete with connection cable
- Optional mA output, complete with connection cable
- Optional pulse repetition output
- Optional RS232 serial port
- Optional RS485 serial port with Modbus communication protocol
- Optional injection flow control input
- Optional pump with PTFE hose 4x6 mm (10 m)
- Optional pump with PTFE hose 5x8 mm (10 m)
- Optional pump with PTFE hose 9x12 mm (10 m)

PKT standard dosing head

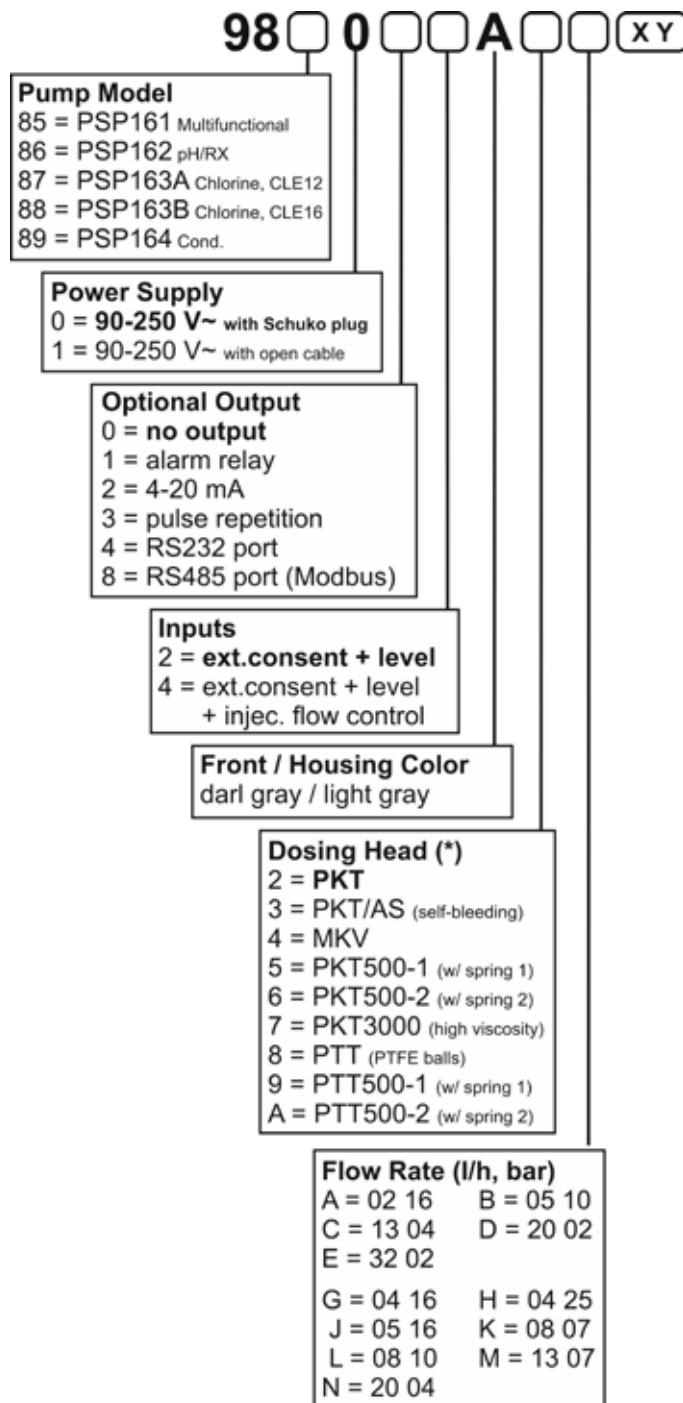

MKV dosing head

Head for high viscosity (HV)

Coding system

Using the below diagram, you can build the pump part number, with the desired characteristics. Options in bold refer to the standard version of the pump.

(*) Dosing head - Notes:

- PKT/AS = PKT dosing head with self-bleeding option, available for models 0216, 0510, 0516
- MKV = methacrylate dosing head, available for models 0216, 0510, 0516
- PKT500-1 / PTT500-1 = PKT or PTT head with spring 1, suitable for dosing liquids of medium viscosity, for pumps with flow rate $\leq 5 \text{ l/h}$
- PKT500-2 / PTT500-2 = PKT or PTT head with spring 2, suitable for dosing liquids of medium viscosity, for pumps with flow rate $\geq 8 \text{ l/h}$
- PKT3000 = PKT head for dosing high-viscosity liquids (up to 3000 mPa·s), for pumps with flow rate $\geq 5 \text{ l/h}$

The "XY" field is used only for models PSP163 and PSP164, to indicate measurement range and cell constant. Contact STEIEL for further details.

PKT/AS dosing head with self-bleeding option, for versions 0510 and 0516		9700311B/PKT	
Optional PKT dosing head for viscous liquids, up to 500 mPa·s			
Optional PTT dosing head for viscous liquids, up to 500 mPa·s			
Optional "high viscosity" (up to 3000 mPa·s) dosing head, for pumps with flow rate $\geq 5 \text{ l/h}$			
Standard kit 4x6		97003200/PKT	
Standard kit 5x8		97003201/PKT	
Standard kit 9x12		97003202/PKT	
Optional valves with PTFE ball			

ROTATING BRACKET

- Exclusive new STEIEL bracket with **rotating support**
- Wall-mounting of PROXIMA PSP pumps
- Rotation up to 360°** for easy operations on the pump dosing head
- Slots for suction and drain **tubes housing**
- Supplied complete with screws and dowels for wall mounting, screws and nuts for fixing pump on bracket

ITEM	DESCRIPTION	PART NO.
SMP18		Mounting bracket with rotating support for PROXIMA PSP dosing pumps
		97000504

“FLOW CONTROL” SENSOR

- New flow sensor, designed and patented by STEIEL**
- Accurate and reliable monitoring** of the injection liquid flow
- Supplied assembled, tested and complete with cable with M8 connector
- Direct mounting on delivery valve or with proper accessory (70100340) in case of dosing head with self-bleeding option
- Connection to the FLOW (injection flow) input of the pump
(contact closed for normal operation; contact open upon fault / alarm)
- Working conditions: temperature 1...55 °C, pressure 0.5...25 bar, density of the dosed liquid max 1.25 g/cm³**
- Three models available, depending on the requested flow rate

Warning! To choose the correct sensor, it is necessary to know the flow rate at the sensor inlet.

The nominal flow rate (Q_n) of the pump is that of a standard dosing head, which works at standard conditions, i.e. dosing a no viscous liquid at an ambient temperature of 25 °C and maximum working frequency.

Under these conditions, the nominal flow rate is obtained from the characteristic curve of the specific model, and corresponds to the effective one (Q_e).

For the PROXIMA PSP series, which also includes the mechanical stroke adjustment, follow the instruction below:

- Minimum stroke for standard heads: 50%
- Minimum stroke for heads with self-bleeding option: 60%
- Calculate the actual flow rate at the flow sensor inlet by multiplying the effective (actual) flow rate by the percentage of stroke adjustment: $Q_e = Q_n \times \% \text{ stroke}$

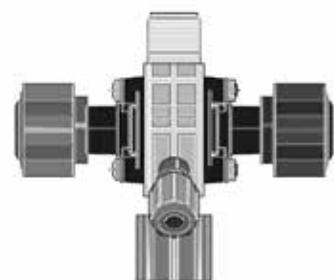

Furthermore, in the case of dosing **head with self-bleeding option**, the effective flow rate is lower than the nominal one and is calculated by applying the following correction: $Q_e = Q_n \times 0.85 \times \% \text{ stroke}$

DESCRIPTION	ACTUAL FLOW RATE (Q_e)	PART NO.
Flow sensor with connections for PROXIMA PSP series pumps, NPN sensor and 50 cm cable with M8 connector	0.8 ... 2 l/h	94812221
	2 ... 7 l/h	94832221
	7 ... 20 l/h	94852221

ITEM	DESCRIPTION	PART NO.
Adapter AS / Flow Control		70100340
Adapter AS / MF valve		70100341

MULTIFUNCTIONAL VALVE

- Protect the dosing line from over-pressures** in case of interruptions along the line
- Prevent the siphon effect** from the suction tank
- Help the pump priming** in case of start in the presence of back pressure
- Useful to vent the dosing line** during maintenance
- Working temperature: -10 ... +45 °C
- Supplied with double kit of seals, FPM and EPDM
- Hydraulic connections for direct installation on the delivery valve of the PROXIMA PSP pumps
- Assembly with special adapter in case of dosing head with self-bleeding option

DESCRIPTION	PART NO.
MF valve, purge fitting for 4x6 hose, opening pressure 16 bar; to be used with PROXIMA PSP models 0216, 0416, 0510, 0516, 0807, 0810, 1304, 2002	97003910
MF valve, purge fitting for 4x6 hose, opening pressure 10 bar; to be used with PROXIMA PSP models 0216, 0416, 0510, 0516, 0807, 0810, 1304, 2002	97003911
MF valve, purge fitting for 4x6 hose, opening pressure 6 bar; to be used with PROXIMA PSP models 0216, 0416, 0510, 0516, 0807, 0810, 1304, 2002	97003912
MF valve, purge fitting for 4x6 hose, opening pressure 10 bar; to be used with PROXIMA PSP models 0425, 1307, 2004, 3202	97003921
MF valve, purge fitting for 4x6 hose, opening pressure 6 bar; to be used with PROXIMA PSP models 0425, 1307, 2004, 3202	97003922

Assembly of the flow sensor and multifunctional valve directly on the pump delivery valve, on a standard dosing head.

Example of assembly on "AS" head with special adapter.

ELECTROMAGNETIC DOSING PUMPS WITH DIAPHRAGM WALL INSTALLATION

EF150 SERIES, BASIC LINE

- Three-digit, red LED display
- ON/OFF basic model with adjustment of the dosing frequency
- Three flow rates available; hose 4x6
- PP (standard) or PVDF (upon request) dosing head, with Pyrex ball valves
- Dosing head with self-bleeding option
- Dosing-shot, electronic-free version
- Power supply: 230 V~
- Housing colour: green (standard) and blue
- These pumps are supplied with standard accessory kit (foot filter; injection valve; hoses for suction, delivery and bleed lines) and bracket for wall installation

Optional PVDF dosing head									
Optional self-bleeding dosing head (only for PVDF version and models 0506 & 1002)									

These pumps can also be provided with a different colour housing and / or customized front panel.

EF155 SERIES, SEMI-PROFESSIONAL LINE

- Three-digit, red LED display**
- Input for level control**, optional input for external sensor
- ON/OFF basic model, version with pause-work schedule, pump with pulse input, model with built-in pH/ORP meter**
- Three flow rates available; hose 4x6
- PP (standard) or PVDF (upon request) dosing head, with Pyrex ball valves
- Dosing head with self-bleeding option
- Power supply: 230 V~ (with Schuko plug, upon request)
- Housing colour: grey (standard), green and blue
- These pumps are supplied with standard accessory kit (foot filter; injection valve; hoses for suction, delivery and bleed lines) and bracket for wall installation

ITEM	DESCRIPTION	DOSING HEAD	SEALS	FLOW RATE	PART NO.
EF161 PGV 0212	Multifunctional pump with pulse and 4-20 mA inputs	PVDF	FPM	2 l/h @ 12 bar	972502100
EF161 PGE 0212			EPDM		972502110
EF161 PGV 0506	Pump with built-in pH/ORP meter and electrode input on BNC connector	PVDF	FPM	5 l/h @ 6 bar	972502101
EF161 PGE 0506			EPDM		972502111
EF161 PGV 1002	Pump with built-in pH/ORP meter and electrode input on BNC connector	PVDF	FPM	10 l/h @ 2 bar	972502102
EF161 PGE 1002			EPDM		972502112
EF162 PGV 0212	Pump with built-in pH/ORP meter and electrode input on BNC connector	PVDF	FPM	2 l/h @ 12 bar	973502100
EF162 PGE 0212			EPDM		973502110
EF162 PGV 0506	Pump with built-in pH/ORP meter and electrode input on BNC connector	PVDF	FPM	5 l/h @ 6 bar	973502101
EF162 PGE 0506			EPDM		973502111
EF162 PGV 1002	Pump with built-in pH/ORP meter and electrode input on BNC connector	PVDF	FPM	10 l/h @ 2 bar	973502102
EF162 PGE 1002			EPDM		973502112

ITEM	DESCRIPTION	DOSING HEAD	SEALS	FLOW RATE	PART NO.
EF163A PGV 0212	Pump with built-in chlorine meter and input for CLE12 cell	PVDF	FPM	2 l/h @ 12 bar	974502100
EF163A PGE 0212			EPDM		974502110
EF163A PGV 0506		PVDF	FPM	5 l/h @ 6 bar	974502101
EF163A PGE 0506			EPDM		974502111
EF163A PGV 1002		PVDF	FPM	10 l/h @ 2 bar	974502102
EF163A PGE 1002			EPDM		974502112
EF163B PGV 0212	Pump with built-in chlorine meter and input for CLE16 cell	PVDF	FPM	2 l/h @ 12 bar	975502100
EF163B PGE 0212			EPDM		975502110
EF163B PGV 0506		PVDF	FPM	5 l/h @ 6 bar	975502101
EF163B PGE 0506			EPDM		975502111
EF163B PGV 1002		PVDF	FPM	10 l/h @ 2 bar	975502102
EF163B PGE 1002			EPDM		975502112
EF164 PGV 0212	Pump with built-in conductivity meter and input for two-electrode cell	PVDF	FPM	2 l/h @ 12 bar	976502100
EF164 PGE 0212			EPDM		976502110
EF164 PGV 0506		PVDF	FPM	5 l/h @ 6 bar	976502101
EF164 PGE 0506			EPDM		976502111
EF164 PGV 1002		PVDF	FPM	10 l/h @ 2 bar	976502102
EF164 PGE 1002			EPDM		976502112

DESCRIPTION

Optional PTFE seals

Optional ceramic balls

Optional self-bleeding dosing head (only for PVDF version and models 0506 & 1002)

Optional relay output

Optional mA output

Optional pulse repetition output

Optional RS232 serial port

Optional injection flow control

These pumps can also be provided with a different colour housing and / or customized front panel.

EF150, EF155, EF160 SERIES, LIST OF SPARE PARTS

ITEM	DESCRIPTION	PART NO.
EFK1 SGV 0212		Spare dosing head, SGV 0212
EFK1 SGE 0212		Spare dosing head, SGE 0212
EFK1 SGV 0506 / 1002		Spare dosing head, SGV 0506 / 1002
EFK1 SGE 0506 / 1002		Spare dosing head, SGE 0506 / 1002
EFK1 PGV 0212		Spare dosing head, PGV 0212
EFK1 PGE 0212		Spare dosing head, PGE 0212
EFK1 PGV 0506 / 1002		Spare dosing head, PGV 0506 / 1002
EFK1 PGE 0506 / 1002		Spare dosing head, PGE 0506 / 1002
EFK1/AS PGV		Dosing head with self-bleeding valve (only PVDF, models 0506 & 1002)
EFK1/AS PGE		
EFK2 SGV		Kit valves, suction and delivery, SGV
EFK2 SGE		Kit valves, suction and delivery, SGE
EFK2 PGV		Kit valves, suction and delivery, PGV
EFK2 PGE		Kit valves, suction and delivery, PGE
Kit fittings		Kit PVDF, including hose-holder, locking ring and threaded nut (10 pc.)
EFK3 SGV		Kit valves, suction / delivery / purge, and O-ring for dosing head - SGV
EFK3 SGE		Kit valves, suction / delivery / purge, and O-ring for dosing head - SGE
EFK3 PGV		Kit valves, suction / delivery / purge, and O-ring for dosing head - PGV
EFK3 PGE		Kit valves, suction / delivery / purge, and O-ring for dosing head - PGE
EFK4 FPM 0212		97002020
EFK4 FPM 0506 / 1002		97002021
EFK4 EPDM 0212		97002040
EFK4 EPDM 0506 / 1002		97002041
EFK5 SV		97002026
EFK5 SE		97002046
EFK5 PV		97002025
EFK5 PE		97002045
EFK6 SGV		97002010/SGV
EFK6 SGE		97002010/SGE
EFK6 PGV		97002010/PGV
EFK6 PGE		97002010/PGE

ITEM	DESCRIPTION	PART NO.
Foot filter SGV		Foot filter PP / FPM
Foot filter SGE		Foot filter PP / EPDM
Foot filter PGV		Foot filter PVDF / FPM
Foot filter PGE		Foot filter PVDF / EPDM
Injection valve SGV		Injection valve PP / FPM
Injection valve SGE		Injection valve PP / EPDM
Injection valve PGV		Injection valve PVDF / FPM
Injection valve PGE		Injection valve PVDF / EPDM
Optional PTFE seals		
Optional ceramic balls		
Magnet		Magnet for pumps 0212
		Magnet for pumps 0506
		Magnet for pumps 1002
Mounting bracket		Bracket with screws for wall installation of pumps with EF150 / EF155 / EF160 housing
SMP19		Bracket with screws for horizontal installation (on tank) of pumps with EF150 / EF155 / EF160 housing

LEVEL PROBES

DESCRIPTION	PART NO.
	SLP2 - Level probe with 2 m cable and connector for pumps EF110, EF125, EF145, EF150, EF155
	SLP3 - Level probe with 2 m cable and M8 connector for pumps PROXIMA PSP and EF160 series
	Level probe with built-in PVDF foot filter, connection for hose 4x6 mm, 2 m cable and connector for pumps EF110, EF125, EF145, EF150, EF155
	Level probe with built-in PVDF foot filter, connection for hose 4x6 mm, 2 m cable and M8 for pumps PROXIMA PSP and EF160 series

ACCESSORIES FOR ELECTROMAGNETIC DOSING PUMPS

ITEM	DESCRIPTION	PART NO.
Dosing Extension		Anti-siphon, PVDF, short dosing extension, with Hastelloy C spring pre-loaded @ 1 bar, 1/2" connection and fittings for hose 4x6, 5x8, 9x12; pressure max 16 bar @ 25°C, PTFE seals
		Version with FEP coated spring
CAV2M8D		PVC cable with M8 female connector, L = 2 m
CAV2M8-M8		PVC cable with double M8 female connector, L = 2 m
CON16/F		M8 female connector
Signal Splitter 2		Two-channel signal splitter
		Two-channel signal splitter, model with 230 V power supply
Signal Splitter 4		Four-channel signal splitter
		Four-channel signal splitter, model with 230 V power supply

HOSES FOR DOSING PUMPS

MATERIAL	ID x OD (mm)	SKEIN	PART NO.
PVC Crystal	4 x 6	100 m	36502103
	5 x 8	100 m	36502106
	9 x 12	50 m	36502115
PE semi-rigid	4 x 6	100 m	36501003
	5 x 8	100 m	36501006
	9 x 12	100 m	36501015
PTFE (*)	4 x 6	100 m	36506003
	5 x 8	50 m	36506006
	9 x 12	25 m	36506015

(*) The skein length of PTFE hoses could differ from the standard one. Ask for check upon order.

SUCTION LANCES

- **Adjustable length** suction lances
- Suitable to dosing stations with tanks up to 1000 litres
- **Flow rate max 100 litres/h**
- Mounting with 1" threaded ring or sleeve
- **Built-in check ball valve**
- PP-PVC-NBR body, FPM (standard) or EPDM seals
- **Level probe with totally protected cable** and soldering connector
- Ring colour: black (standard), blue, red, yellow
- Connection for hose 4x6 (standard), 5x8, 9x12 mm
- Working temperature max 50 °C

ITEM	LENGTH (mm)		TANK	PART NO.
	TOTAL (B)	ADJUSTABLE (A)		
Suction lance with soldering connector for level probe (for EF150 / EF155), FPM seals, Pyrex ball valve, connection for hose 4x6 mm and black ring	400	115...300	25 L	94912100
	490	115...390	50 L	94912101
	700	115...600	100 L	94912102
	940	115...840	150-300 L	94912103
	1420	115...1320	500-1000 L	94912104
Suction lance with M8 connector for level probe (for EF160 EVO / PSP series), FPM seals, Pyrex ball valve, connection for hose 4x6 and black ring	400	115...300	25 L	94932100
	490	115...390	50 L	94932101
	700	115...600	100 L	94932102
	940	115...840	150-300 L	94932103
	1420	115...1320	500-1000 L	94932104

ITEM
Optional lance with EPDM seals
Optional lance with PTFE ball valve
Optional lance with ceramic ball valve
Optional lance with connection for hose 5x8 mm
Optional lance with connection for hose 9x12 mm
Optional lance with blue, red or yellow ring

INJECTION EXTENSION

- Adjustable length, injection extension, for use up to 6 bar
- PVC body, FPM seals, ½" GAS connections

ITEM	PART NO.
Adjustable and removable injection extension. L max = 250 mm. Connections ½".	97009015

MOTOR DOSING PUMPS WITH DIAPHRAGM ST SERIES

- Electronic-free, motor pumps, with **mechanical adjustment of the stroke length**
- **Rigid, multi-layer membrane**; parts in contact with the liquid are in PTFE for ensure the maximum chemical compatibility
- Simple use, basic maintenance
- Safe operation, without external moving parts
- **Flow rates from 14 up to 1000 l/h** at the maximum counterpressure
- **Pressure from 3 to 8 bar**, depending on model
- Manual micrometric adjustment of stroke (injection volume)
- Aluminium pump housing, mechanical parts in oil bath
- **Available standard heads: PP, PVDF and AISI316L** (other materials upon request, for special use)
- **Standard motor: asynchronous, three-phase**, 230/400 V, 50 Hz (optional single-phase)

STANDARD VERSIONS, MATERIALS OF WET PARTS

VERSION	DOSING HEAD	VALVE BALL	CAGE	VALVE SEAT	CASING	DIAPHRAGM	SEALS	INTENDED USE

DESCRIPTION
Optional single-phase, asynchronous motor, 0.37 kW, 230 V, 50 Hz
Optional 3-phase, asynchronous motor, 0.37 kW, 230/400 V, 50 Hz, pumps ST14 ... ST250 (P max 10 bar)
Optional EPDM seals
Optional PTFE seals
Optional ceramic valves
Deduction for pumps without motor

Versions are also available with ATEX II motor.

PERISTALTIC DOSING PUMPS

EF100 SERIES, PUMPS WITH FIX FLOW RATE & OPEN CASING

- PP/talc housing, polycarbonate front panel, PBT roller-holder with Delrin (self-lubricant) rollers, PP fittings
- Internal tube: Santoprene
- Panel installation
- Power supply: 230 V~ or 24 V- (see table)

ITEM	DESCRIPTION
EF100/A	EF100 pump @ 230 V~. Specify the flow rate (0.6, 1.2, 1.8, 2.4 l/h @ 1 bar)
EF100/C	EF100 pump @ 24 V-. Flow rate 2.4 l/h @ 1 bar

EF105 SERIES, PUMPS WITH FIX FLOW RATE & CLOSED CASING

- PP casing reinforced with glass fibre, polycarbonate front panel, PBT roller-holder with Delrin (self-lubricant) rollers, PP fittings
- Internal tube: Santoprene or silicone
- Wall installation with supplied mounting bracket
- Power supply: 230 V~ or 24 V- (see table)
- Available colours: green (standard) and blue
- Supplied with standard accessory kit (part no. 96000100)

ITEM	DESCRIPTION
EF105/A	EF105 pump @ 230 V~. Specify flow rate (1.5, 3 l/h @ 1 bar); Santoprene (S) internal tube
	EF105 pump @ 230 V~. Specify flow rate (1.5, 3 l/h @ 1 bar); silicone (N) internal tube
	EF105 pump @ 230 V~. Specify flow rate (4, 6 l/h @ 1 bar), and internal tube material (S=Santoprene, N=silicone)
EF105/C	EF105 pump @ 24 V-. Specify flow rate (1 l/h @ 3 bar; 4, 6, 12 l/h @ 1 bar), and internal tube material (S=Santoprene, N=silicone)
EF105/C-200-S	EF105 pump @ 24 V-. Flow rate 20 l/h @ 1 bar, Santoprene (S) internal tube

EF106 SERIES, PUMPS WITH ADJUSTABLE FLOW RATE & CLOSED CASING

- PP casing reinforced with glass fibre, polycarbonate front panel, PBT roller-holder with Delrin (self-lubricant) rollers, PP fittings
- Internal tube: Santoprene or silicone
- Wall installation with supplied mounting bracket
- Flow rate adjustment via front trimmer
- Power supply: 230 V~ o multi-voltage 20-230 V~ (see table)
- Available colours: green (standard) and blue
- Supplied with standard accessory kit (part no. 96000100)

ITEM	DESCRIPTION
EF106/A	EF106 pump @ 230 V~. Specify max flow rate (1 l/h a 3 bar; 4, 6 l/h @ 1 bar), and internal tube material (S=Santoprene, N=silicone)
EF106/M	EF106 pump with 20-230 V~ multi-voltage power supply. Specify max flow rate (1 l/h @ 3 bar; 4, 6 l/h @ 1 bar), and internal tube material (S=Santoprene, N=silicone)

PERISTALTIC PUMPS - LIST OF SPARE PARTS

ITEM	DESCRIPTION	PART NO.
Standard accessory kit		Kit of accessories for peristaltic pumps: 4x6 PVC Crystal hose (2 m), 4x6 PE hose (2 m), injection valve and foot filter 96000100
Injection valve		Injection valve for peristaltic pumps 97002012/SLV
Foot filter		Foot filter for peristaltic pumps 97002013/SLV
Dosing head		Dosing head complete with inserts for EF100 / EF110 / EF125 pumps 96000140
		Green dosing head complete with inserts for EF105 / EF106 pumps 96000145
		Blue dosing head complete with inserts for EF105 / EF106 pumps 96000141
Front panel		Protective front panel for EF100 / EF110 / EF125 pumps 96000130
		Protective front panel for EF105 / EF106 96000131
Internal tube		Santoprene tube for EF100 pumps 96000201
		Santoprene tube for EF105 / EF106 pumps, 1l/h @ 3 bar 96000230
		Santoprene tube for EF105 / EF106 pumps @ 1 bar 96000232
		Silicone tube for EF105 / EF106 pumps, 1l/h @ 3 bar 96000240
		Silicone tube for EF105 / EF106 pumps @ 1 bar 96000242
Roller-holder		Roller-holder for EF100 pumps 96000401
		Roller-holder for EF105 / EF106, Santoprene 96000411
		Roller-holder for EF105 / EF106, silicone 96000410
Motor (specify the model for which you need the spare part)		Spare motor for EF100 / EF110 / EF125 pumps
		Spare motor for EF105 / EF106 pumps

DOSING ACCESSORIES

STIRRERS FOR AQUEOUS SOLUTIONS

- Electromechanical stirrers, **slow (70 rpm)** and **fast (1400 rpm)** series
- Models with **PVC or AISI A2 steel** shaft and screw
- Three-phase 380-420 V~ or single-phase 220-240 V~ motor
- Several shaft lengths available
- **Manual PVC** stirrers
- Three models available, with different length

ALS SERIES - SLOW STIRRING MODELS

ITEM	MATERIAL OF SHAFT & SCREW	LENGTH OF SHAFT (cm)	TANK	MOTOR	PART NO.
ALS-06TP	PVC	60	100 L	Three-phase	890000021
ALS-07TP	PVC	70	150 L	Three-phase	890000022
ALS-08TP	PVC	80	300 L	Three-phase	890000023
ALS-09TP	PVC	90	500-1000 L	Three-phase	890000024

AVS SERIES - FAST STIRRING MODELS

ITEM	MATERIAL OF SHAFT & SCREW	LENGTH OF SHAFT (cm)	TANK	MOTOR	PART NO.
AVS-06TP	PVC	60	100 L	Three-phase	890000029
AVS-07TP	PVC	70	150 L	Three-phase	890000030
AVS-08TP	PVC	80	300 L	Three-phase	890000031
AVS-09TP	PVC	90	500-1000 L	Three-phase	890000032

ITEM

Optional with AISI A2 steel shaft & screw

Optional stirrers with single-phase motor, 220-240 V~

AM SERIES - MANUAL STIRRERS

ITEM	MATERIAL OF SHAFT & SCREW	TANK	PART NO.
AM-1	PVC	100-150 L	890000060
AM-2	PVC	300 L	890000022
AM-3	PVC	500-1000 L	890000064

MIXERS FOR INDUSTRIAL USE

- Electromechanical mixers, **slow (70 / 108 rpm)** and **fast (700 / 950 / 1400 rpm)**
- Models with shaft and screw in **PP, PVC, PVDF** (on request) or **AISI 304**
- Parts in contact with the liquid are coated with **corrosion-resistant** thermoplastic material or stainless steel (depending on model)
- **Three-phase motor 400 V~ 50 Hz** (standard) or single-phase 230 V~
- **ATEX II motor** available on request for some models
- Several shaft lengths available, for tanks from 50 up to 1000 litres
- Slow mixers: **high efficiency impeller, multiple impellers** on request; max liquid viscosity 500 cPs
- Fast mixers: **reversible marine impeller** (PP, PVC, PVDF) or three blades (for AISI 304 models); max liquid viscosity 50 cPs

MLS SERIES - SLOW STIRRING MODELS (with gear reducer)

ITEM	MATERIAL OF SHAFT & SCREW	LENGTH OF SHAFT (cm)	TANK	MOTOR	VELOCITÀ (rpm)
Mixer MLS-036	PP or PVC	360	50 L	Three-phase / 0.18 kW	108
	AISI 304				
Mixer MLS-055	PP or PVC	550	100 L	Three-phase / 0.18 kW	108
	AISI 304				
Mixer MLS-075	PP or PVC	750	150 L	Three-phase / 0.12 kW	70
	AISI 304				
Mixer MLS-085	PP or PVC	850	300 L	Three-phase / 0.18 kW	108
	AISI 304				
Mixer MLS-105	PP or PVC	1050	500 L	Three-phase / 0.18 kW	70
	AISI 304				
Mixer MLS-110	PP or PVC	1100	1000 L	Three-phase / 0.25 kW	108
	AISI 304				

MVS SERIES - FAST STIRRING MODELS (without gear reducer)

ITEM	MATERIAL OF SHAFT & SCREW	LENGTH OF SHAFT (cm)	TANK	MOTOR	VELOCITÀ (rpm)
Mixer MVS-038	PP or PVC	380	50 L	3-phase / 0.09 kW	1400
	AISI 304			3-phase / 0.12 kW	950
Mixer MVS-055	PP or PVC	550	100 L	Three-phase / 0.12 kW	950
	AISI 304				
Mixer MVS-075	PP or PVC	750	150 L	Three-phase / 0.12 kW	950
	AISI 304				
Mixer MVS-085	PP or PVC	850	300 L	Three-phase / 0.18 kW	950
	AISI 304				
Mixer MVS-105	PP or PVC	1050	500 L	Three-phase / 0.18 kW	700
	AISI 304				
Mixer MVS-110	PP or PVC	1100	1000 L	Three-phase / 0.37 kW	700
	AISI 304				

ITEM

Optional single-phase motor 230 V~

DOSING ACCESSORIES

TANKS, CONTAINERS AND ACCESSORIES

- Series of semi-transparent polyethylene (LLDPE) tanks
- **Drain outlet**
- **Visual indication of liquid level**
- Filling hole with screw cap
- Series of safety / drip containers
- Assembled, complete dosing stations

ACCESSORIES

ITEM	PART NO.
T25, polyethylene hopper, 25 litres, filling hole with screw cap	36000002
PVC half-moon panel for S100 and S150 tanks, with screws and fittings	89000075
PVC half-moon panel for S300 and S500 tanks, with screws and fittings	89000076
PVC half-moon panel for S1000 tank, with screws and fittings	89000077

The tanks can be supplied already assembled with the accessories that best fit your needs, in order to provide a tailor-made dosing station. Contact STEIEL for specific proposals.

ELECTROMAGNETIC FLOW METERS

- Accurate and bidirectional measurements**
- Robust, fully welded and potted construction, with **flanged connections**
- External coating for offshore or subsoil installation
- AISI304 flow tube, painted carbon steel flanges, Hastelloy C electrodes**
- Protection rate: IP68 (continuous immersion at 1.5 m)
- “Zero diameters” models for installations also in curves or reduced spaces,** negligible pressure loss
- Approved for drinking water, WRAS, FDA, DM174**
- Flanges PN16 (PN10 on request)
- Compact standard version, with integrated converter
- Version upon request with separated converter (at a max distance of 100 m)
- Converter with aluminium IP68 housing, graphical LCD, 4-20 mA analogic output, pulse output, RS485 serial port with Modbus RTU communication protocol, 90 ... 264 V~ power supply

STANDARD INSTALLATION (U5-D3) FLOW METERS

ITEM	DIAMETER		INTERNAL COATING	TEMPERATURE OF THE LIQUID	PART NO.
STM2200-012	1/2"	DN15	PTFE	-40 ... +130 °C *	9420000000

STM2300-400	4"	DN100	Ebanite	-40 ... +80 °C	9430008010
STM2300-500	5"	DN125	Ebanite	-40 ... +80 °C	9430009010
STM2300-600	6"	DN150	Ebanite	-40 ... +80 °C	9430010010

Meters are also available with larger diameters and different materials for flow tube, flanges and electrodes. Contact STEIEL for specific evaluations.

ITEM
Optional version with separated converter
Converter-meter connection cable (lengths multiple of 5 m)

DOSING ACCESSORIES

PULSE-EMITTING WATER METERS

- Full range of volumetric water meter with reed standard pulse emitting device, MID approved according to the European Directive 2004/22/CE (modules B+D)**
- Models with single-jet (CRU series) and multi-jet (CRM series) turbine
- Woltmann models with helical vane (CFW series), and removable measurement unit
- Accuracy class 2, direct reading with 5 counter rollers, dry dial, magnetic transmission, different pulse rate options (litres/pulse), reed emitting device with 2 meter standard cable
- Product code to be completed with the desired pulse rate**

TURBINE WATER METERS WITH THREADED CONNECTIONS

ITEM	CONNECTIONS		LENGTH	JET	TEMPERATURE MAX	PRESSURE MAX	PART NO.

CFW-1000	10"	DN250	450 mm	50 °C	16 bar

Upon request, flanged models are also available for use with sanitary hot water, up to 130°C.

ITEM	PART NO.
Pulse-emitting sensor for CFW series water meters	94002002

For each model of water meter you can choose different pulse rate, by completing the product part number as follows:

X	K REED (Litres/pulse)	FREQUENCY OF EMITTED PULSES	TURBINE MODELS	FLANGED MODELS
0	K0.25	4 imp / 1 L	All models	-
1	K1	1 imp / 1 L	All models	-
2	K2.5	4 imp / 10 L	All models	-
3	K10	1 imp / 10 L	All models	DN50, DN65, DN80
4	K25	4 imp / 100 L	All models	-
5	K100	1 imp / 100 L	All models	DN100, DN125, DN150
6	K250	4 imp / 1000 L	All models	-
7	K1000	1 imp / 1000 L	All models	DN200, DN250

DOSING UNIT FOR GRANULAR PRODUCTS

POOL-CHEM FLEX

- Dissolution and dosage of granular products
- Folding system for loading standard drums from 15 to 40 kg
- **Production rate: 3 kg/h** (standard metering screw) **or 6 kg/h** (bigger screw)
- **On-board electronic controller**
- Independent operation or controlled by analysis unit
- **Standard version with 4-20 mA input** (ON-OFF input upon request)

ITEM	DESCRIPTION	PART NO.
POOL-CHEM FLEX std.	System for the dissolution and dosage of granular chemicals; standard metering screw 3 kg/h; 4-20 mA	80508001
POOL-CHEM FLEX plus	System for the dissolution and dosage of granular chemicals; bigger metering screw 6 kg/h; 4-20 mA	80508002
S210	Electronic controller for Pool-Chem Flex	80508015
Suction Kit	PVC shaft, PVC Crystal hose, level control and cap	77020012
Acid Pump	Peristaltic pump for acid dosage, with mounting kit	77020011
Circ. Pump	Circulation pump, AISI316, 230 V~	54500243
Cyclone	Complete cyclone	77020002
Ejector Group	Ejector, check valve, flow-switch, hose tail (the group is supplied assembled, wired and tested)	77020003
Cartridge	Filter cartridge, 9" mesh	80710013
Valve	Float valve for Pool-Chem Flex	80508006
Level Sensor	Sensor for min and max level of the water tank	97009005
Striker	Complete striker group, wired and tested	77020006
Standard Screw	Complete metering screw group (3 kg/h), assembled and tested	77020007
Plus Screw	Complete metering screw group (6 kg/h), assembled and tested	77020015
Guide	Metering screw guide	77020012
Motor	Spare gear motor for metering screws	54500230
Heater	Heating nozzle group complete with cable	77020008
Chlorine sensor	Sensor for detection of powder chlorine	54500007
Guide Tube	Guide tube for powder chlorine	70200025

PROPORTIONAL VOLUMETRIC DOSING DOSAMIX

- Dispenser for water treatment applications
- Mixing and dosing of additives and disinfectants
- Precise and constant percentage dosing**
- Integrated mixing chamber
- Hydraulic supply that exploits the pressure and flow rate of the mains water
- Working pressure 0.3 ... 6 bar; water temperature 5 ... 40 °C**
- Quick installation, 3/4" BSP connections
- AISI316 ball valve, AISI316 metal parts
- Simple maintenance
- Supplied with installation bracket and reinforced suction hose (1.5 m)

ITEM	FLOW RATE	DOSAGE *	PART NO.
DOSAMIX 075	5 ... 750 litres/h ; 0.005 ... 0.75 m ³ /h	0.2 ... 2 %	95000010
DOSAMIX 150	5 ... 1500 litres/h ; 0.005 ... 1.50 m ³ /h	0.2 ... 2 %	95000011
DOSAMIX 250	10 ... 2500 litres/h ; 0.010 ... 2.50 m ³ /h	0.2 ... 2 %	95000012
DOSAMIX 300	10 ... 3000 litres /h ; 0.010 ... 3.00 m ³ /h	0.2 ... 2 %	95000013

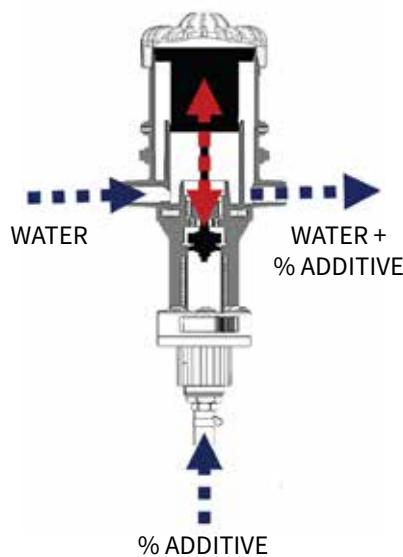

* Other dosage percentage ranges available on request (0.03 ... 2 % ; 0.5 ... 4 % ; 1 ... 5 % ; 1 ... 10 %).

ITEM

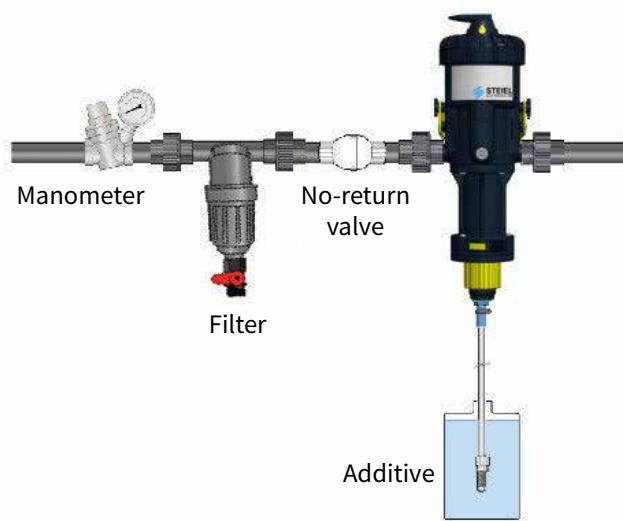

Kit ON-OFF : cap with valve for on-off dosage

Kit filter + regulator + manometer (no-return valve not included)

Operation

Typical installation

COLORIMETRIC ANALYSIS

MCO14 DIGITAL COLORIMETRIC UNIT

- Basic measurements always provided: **pH, ORP, free chlorine** (colorimetric analysis)
- Additional measurements: **temperature, total chlorine** (colorimetric analysis) and **combined chlorine** (calculated)
- Housing for reagent bottles (and level probes)
- **Two configuration levels** (standard and advanced), with password
- Multilingual menu
- Relays for ON/OFF or proportional control, or NO/NC alarm
- Two current outputs, 0-20 or 4-20 mA
- OFF input, configurable NO or NC, for disabling outputs
- Two (or three) level inputs for monitoring reagents to be dosed
- Data log downloadable through serial line (internal data logger)
- Serial port, with galvanic insulation, for communication with PC, RW14 or μMMC4
- Optional RS485 serial port with Modbus RTU communication protocol
- Power supply: 230 V~ (standard), 115 V~
- **Version with K4 and K5 pulse outputs, upon order**

ITEM	DESCRIPTION	PART NO.
MCO14/3	Measurements of pH, ORP and free chlorine; RCO-R1 and RCO-R2 reagents required (not included)	816301049901
MCO14/5	Measurements of pH, ORP, temperature, free and total (combined) chlorine; RCO-R1, RCO-R2, RCO-R3 reagents required (not included)	816301049904
RCO-R1	Reagent 1 for free chlorine analysis with DPD1 method, 1 L	80090103
RCO-R2	Reagent 2 for free chlorine analysis with DPD1 method, 1 L	80090104
RCO-R3	Reagent 3 for total chlorine analysis with DPD3 method, 0.5 L	80090105
EV-MCO07	Solenoid valve for hydraulic group	80509910
TB-MCO07	Santoprene tube for peristaltic pump	96000200
Pump	Spare peristaltic pump; flow rate 0.25 l/h, Santoprene internal tube, 24 V-	80509912
MX-MCO07	Mixer for hydraulic group	80509901
FT-MCO07	Impurity filter for colorimetric units	70109069
Valve	Spare valve, 1/4" M/F	36306590
Optic Group	Spare complete optic group for MCO14 units	80509913
Cap for bottle of reagent 1, with level sensor		96000116
Cap for bottle of reagent 2, with level sensor		96000121
Cap for bottle of reagent 3, with level sensor		96000122
Kit A	Installation kit: 1 valve M/F 1/2", 2 fittings with 1/2" ring nut, PVC Crystal hose 8x12 mm (5 m)	80509907

For pH, ORP and temperature sensors, please refer to the specific section "Sensors & Accessories".

MULTI-PARAMETRIC UNITS

EF214 DIGITAL UNITS

- **Inputs for 5 simultaneous measurements** (temperature always provided)
- Measurement of pH, ORP, chlorine, conductivity, turbidity, etc.
- **Available double input for CAC cells**
- **Two configuration levels** (standard and advanced), with password
- Multilingual menu
- Relays for ON/OFF or proportional control, or NO/NC alarm
- Two current outputs, 0-20 or 4-20 mA
- OFF input, configurable NO or NC, for disabling outputs
- Flow sensor input for disabling outputs upon lack of water flow to the sensors
- Two level inputs for monitoring reagents to be dosed
- Data log downloadable through serial line (internal data logger)
- Serial port, with galvanic insulation, for communication with PC, RW14 or μMMC4
- Optional RS485 serial port with Modbus RTU communication protocol
- The unit is generally supplied prewired and assembled on a panel, complete with measurement sensors, dosing pumps and data recording system
- Power supply: 230 V~ (standard), 115 V~ / 50/60 Hz

ITEM	DESCRIPTION
EF214 /3 std.	EF214, 3 channels (pH/RX/CLE12) + temperature, RS232
EF214 /3 std.	EF214, 3 channels (pH/RX/CAC) + temperature, RS232
EF214 /4 std.	EF214, 4 channels + temperature, RS232

EF315 DIGITAL UNITS FOR pH/CHLORINE CONTROL IN SWIMMING POOLS

- **Two inputs for simultaneous measurements** (temperature always provided)
- Measurement of pH, ORP, chlorine (CLE12 or CAC signal)
- Multilingual menu
- Control outputs for driving “dosing-shot” pumps / 230 V / pulses
- Flow sensor input for disabling outputs upon lack of water flow to the sensors
- Two level inputs for monitoring reagents to be dosed
- Optional serial port
- **Configurable maintenance schedule**
- The unit is generally supplied prewired and assembled on a panel, complete with measurement sensors, dosing pumps and data recording system
- Power supply: 230 V~ (50/60 Hz)

ITEM	DESCRIPTION
EF315 pH/RX/T	EF315 with pH, ORP and temperature inputs
EF315 pH/CL/T	EF315 with pH, CLE12 and temperature inputs
EF315 pH/CAC/T	EF315 with pH, CAC signal and temperature inputs
Optional RS232 serial port for communication with RW14	

READY TO USE CONTROL SYSTEMS

CUSTOMIZED ASSEMBLIES ON PANEL

ITEM	DESCRIPTION
	High density expanded PVC panel, 650x290 mm, assembling costs included
	High density expanded PVC panel, 500x600 mm, assembling costs included
	High density expanded PVC panel, 595x750 mm, assembling costs included
	High density expanded PVC panel, 900x700 mm, assembling costs included

CONTROL of pH and CHLORINE

- Two-parameter control panel, ready-to-use, including dosing pumps with built-in meter, measurement sensors, probe-holder, flow sensor, mesh filter and connection box
- Version pH/chlorine with EF163A (chlorine) and EF162 (pH) pumps
- Version with two EF162 pumps, pH and ORP
- Supplied with standard accessories for two dosing pumps and calibration solutions
- Panel dimensions: 500x600 mm
- Power supply: 230V~

ITEM	PART NO.
Panel PNL-EF162pH-EF162RX 1002, pH electrode, ORP electrode, flow sensor; assembling costs included	E3703022443939
Panel PNL-EF162-EF163A 1002, pH electrode, CLE12 cell (5 ppm), flow sensor; assembling costs included	E370121003939

COMPACT SYSTEMS

EF300 / EF270 / EF260 SERIE, FOR pH / CHLORINE CONTROL

- All models feature a pH input with BNC connector for electrode**
- Chlorine measurement may be indirect** (via ORP, with electrode input on BNC connector) **or direct** (input for CLE12 or CAC cell, depending on model)
- Standard chlorine range : 0-5 ppm (others upon request)
- Two control outputs for adjustment of pH and chlorine levels, available in various configurations
- Multilingual menu
- Digital inputs: OFF/FLOW input, and two level inputs for monitoring reagents to be dosed
- RS232 serial port for communication with RW14
- Two different casing sizes, L (large 350 x 380 x 175 mm) and S (small 290 x 280 x 175 mm)**
- Power supply: 230 V~ (standard)
- Supplied with standard accessories for dosing heads (if present) and calibration solutions

ITEM	CHLORINE SENSOR	PROBE-HOLDER	PT100	RS232 PORT	CONTROL OUTPUTS	CASE	PART NO.

EF267	RX/Pt	x	-	-	One dosing head PGV 1002 + one 230V output (relay)	S	84010010310
DESCRIPTION							
Optional software EF310 in EF300 pH/Chlorine							
Optional EF266 / EF267 with RX/Au electrode							

EF253 / EF254, pH or ORP CONTROL

- **Single-parameter, compact units** for the analysis and adjustment of pH and ORP levels in swimming pools
- Digital inputs: OFF/FLOW and LEV (level)
- Small casing, size 290 x 280 x 175 mm
- Power supply: 230 V~
- Supplied with standard accessories for dosing head, electrode holder with DN50 clamp for direct in-line installation of the electrode, calibration solutions

ITEM	SENSOR	DOSING HEAD	PART NO.
EF253 pH	pH electrode with 2.5 m cable and BNC	Peristaltic	840060459
EF253 RX	RX/Pt electrode with 2.5 m cable and BNC	Peristaltic	840060559
EF254 pH C11	pH electrode with 2.5 m cable and BNC	Electromagnetic PGV 0506	840070406
EF254 pH C12		Electromagnetic PGV 1002	840070410
EF254 RX C11	RX/Pt electrode with 2.5 m cable and BNC	Electromagnetic PGV 0506	840070506
EF254 RX C12		Electromagnetic PGV 1002	840070510

EF110 / EF158, DIGITAL PUMPS WITH pH/ORP METER

- Designed for wall installation
- User selectable pH or ORP range
- Electrode input on BNC connector
- Input for level sensor
- Available pH and ORP kits
- Power supply: 230 V~

ITEM	DESCRIPTION	PART NO.
EF110	Version with peristaltic pump, 1.8 l/h @ 1 bar, IP54	95930503
EF158 0212	Version with electromagnetic pump, 2 l/h @ 12 bar, PP head / FPM seals, IP65	968001320
EF158 0506	Version with electromagnetic pump, 5 l/h @ 6 bar, PP head / FPM seals, IP65	968001321
EF158 1002	Version with electromagnetic pump, 10 l/h @ 2 bar, PP head / FPM seals, IP65	968001322
Optional PVDF dosing head for EF158 models		
Kit-pH	pH electrode (2.5 m cable and BNC), electrode holder with DN50 clamp, pH4 and pH7 buffers (90 ml each)	80099903
Kit-RX/Pt	RX/Pt electrode (2.5 m cable and BNC), electrode holder with DN50 clamp, 220 mV calibration solution (90 ml)	80099904
Kit-RX/Au	RX/Au electrode (2.5 m cable and BNC), electrode holder with DN50 clamp, 220 mV calibration solution (90 ml)	80099905

WATER DISINFECTION WITH HYDROGEN PEROXIDE

- Professional digital peristaltic pump, with Santoprene internal tube
- Standard flow rate 2.4 l/h @ 1 bar (other options upon request)
- **Software designed for pool water disinfection with hydrogen peroxide**
- LCD with backlight and multilingual menu
- **Manual, semi-automatic or automatic working mode**
- Daily dosing program with automatic adjustment depending on water temperature
- Temperature input for Pt100 sensor (not included, to be ordered separately)
- Input for level sensor
- Power supply: 230 V~

ITEM	DESCRIPTION	PART NO.
EF125	Digital peristaltic pump for H ₂ O ₂ dosage; 2.4 l/h @ 1 bar	983002304

WATER DISINFECTION WITH OZONE

- Three models with different ozone production rates
- Modular systems
- Corona-discharge technology
- Effective and environmentally safe ozone generators
- Available installation kit and booster pump
- Power supply: 110 ... 250 V~

ITEM	DESCRIPTION	PART NO.
S21	Ozone system with production rate max 0.25 g/h	85202101
S22	Ozone system with production rate max 0.5 g/h	85202102
S23	Ozone system with production rate max 1.0 g/h	85202103
3OX-KIT	Installation kit, including: Venturi injector, contact chamber, degassing system, 5 m of 7x10 PVC Crystal hose, tube for connecting the generator to Venturi injector (with two check valves), hydraulic fittings, 1 flow meter and 1 spare check valve	85200101
3-OX PUMP	Booster pump for ozone systems	54500241
Spare contact chamber		85200006
Spare ozone module (cell)		85200301
Spare check valve for ozone systems		85200104
Flow meter for ozone systems		85200004
3OX-MDV	Charcoal filter for the excess ozone removal	85200005
3OX-IV	Venturi injector for ozone systems	85200002
3OX-AV	Venturi injector adapter for ozone systems	85200003
3OX-TU	Ozone tube 1/4" x 3/8"; sold by meter	85200007

EF117, CONTROL UNIT FOR SALT CHLORINATOR

- Digital unit with built-in redox meter
- Double-pitch Schuko socket for powering a dosing unit (e.g. salt chlorinator)
- Electrode input on BNC connector
- LED display
- Prewired power cable with Schuko plug
- Power supply: 230 V~

ITEM	DESCRIPTION	PART NO.
EF117	Control unit for salt chlorinators, with ORP meter	95940520

EF-J KIT, GROUNDING KIT

- Eliminates interferences or electric noise coming from plastic pipes (no conductive)
- Available two sizes, DN50 and DN63
- Complete with gaskets, screws and cable lugs for electric wirings

ITEM	DESCRIPTION	PART NO.
EFJ_KIT50_MT	Grounding kit with DN50 clamp	85007820
EFJ_KIT63_MT	Grounding kit with DN63 clamp	85007821

TE07, TEMPERATURE CONTROL

- Digital thermometers, range 0-50 °C
- Adjustable threshold, relay output
- Casing IP56
- Power supply: 230 V~

ITEM	DESCRIPTION	PART NO.
TE07 / SI	Digital thermometer with built-in temperature sensor, installation through ½" threaded sensor	80320005
TE07 / SE	Digital thermometer with prewired external probe (3 m cable), wall installation	80320010

POOL TIMER PLUS, TIMED DOSAGE

- Timed dosing system
- Timer for weekly scheduling the daily dosing times
- Built-in peristaltic pump, with Santoprene internal tube
- Power supply: 230 V~

ITEM	DESCRIPTION	PART NO.
Pool Timer Plus	Compact system for timed dosage, complete with configurable timer and peristaltic pump (4 l/h)	95050023

SIZING GUIDE FOR DOING PUMPS

The chlorine dosing pump has to be sized according to the expected chlorine demand of the swimming pool, which is affected by several factors, as the pool volume, the filtration flow rate, the private or public use, the indoor or outdoor location, the chlorine concentration in the dosed disinfectant.

In other words, to keep a disinfectant level of about 1 ppm, an outdoor swimming pool requires more chlorine than an indoor one, and a public pool will demand more chlorine than a private one.

To simplify, suppose the following average demand of chlorine:

Use	Private	Public
Indoor pool	1.5 ppm	2 ppm
Outdoor pool	2.5 - 3.5 ppm	3 - 4 ppm

The needed dosing flow rate for the chlorine pump is calculated as follows:

$$\text{Dosing flow rate (l/h)} = [\text{filtration flow rate (m}^3/\text{h}) \times \text{chlorine-demand (ppm)}] / [\text{chlorine conc. (\%)} / 10]$$

It is recommended to choose a pump with a flow rate bigger (double) than the calculated theoretical value.
For the pH correction, the acid dosing pump is sized proportionally to the estimated chlorine consumption.

Here below you can find an useful guide for selecting the pump right size for an outdoor swimming pool with a complete recirculation of about 3 hours, depending on the pool volume and chlorine concentration in the dosed product.

Pool volume m ³	Circul. flow rate m ³ /h	Sodium hypochlorite Concentration 14%		Calcium hypochlorite 65% (1:10) Concentration 6.5%		Di-chloro 55% (diluted 1:10) Conc. 5,5%		Electrolytic Chlorine Concentration 2%		Sulphuric acid 30-36%	
		Private	Public	Private	Public	Private	Public	Private	Public	Private	Public

WATER DISINFECTION SYSTEMS WITH UV RADIATIONS

STEIEL offers a full range of systems for water sterilization and debacterization with UV-C radiations.

Models are available for treating installations with a flow rate from 1 to 1000 m³/h, with stainless steel (AISI304 or AISI316L) or HDPE vessel, with mercury vapour (low or medium pressure) or amalgam lamps.

Each system is equipped with a microprocessor-based control unit.

The below tables provide to the customer an useful guide for choosing the model which better fits its needs, depending on the type and flow rate of the water to be treated.

EF-U200 AND EF-U900 SERIES

- Microprocessor-based control unit with counter of lamp working hours, remote ON/OFF, alarm relay and switching on / off timer
- Starter with stabilization function of the power voltage
- Working pressure max: 9 bar for steel vessels, 6 bar for HDPE vessels
- Power supply: 230 V~ (standard)
- Low pressure, mercury vapour lamps**
- Models with **AISI316L steel vessel**
- Models with **HDPE vessel**: optional radiation sensor ("H" version)

Models with AISI316L vessel - Sized for swimming pools with recirculation system

UV-S510 AND UV-S700 SERIES - BACTERICIDE ACTION WITH AMALGAM LAMPS

- UV-S700 series (models 701, 702, 703): microprocessor-based control unit with graphic LCD, available standard version (with monitoring of lamp operation, alarm relay, and counter of lamp total and working hours) or "H" version (with monitoring of irradiation / temperature of water, check of panel temperature and shutdown function upon overheating of the vessel / electronic unit)
- UV-S510 series and models UV-S704 / 705: microprocessor-based control unit with colour touch-screen interface, only available "H" version
- Working pressure max 9 bar
- Power supply: 230 V~ (standard)
- Steel vessels** can be mounted both horizontally and vertically
- Amalgam lamps** guarantee a 100% yield of the emission even with hot water, with a temperature between 30 and 60 °C

REASON FOR RETURN (please describe briefly the problem and attach any pictures / videos):

All the above fields must be filled entirely. The lack of requested information will make the report null and, therefore, the return will not be authorized. In case the material is sent without authorization, upon receipt we reserve the right to reject the package. The completed form must be returned by e-mail to service@steiel.it and attached to the delivery bill.

Important Notes:

- Pack the goods appropriately (if possible, with the original packaging) after decontamination and, if bulky goods, place it on a pallet to prevent damage during transport.
- In case of dispatch of an article used for dosage, also fill the form on the next page.
- Make sure that a copy of the delivery bill is ALWAYS present also inside the package. The delivery bill must be sent in advance via e-mail to service@steiel.it together with this form

TERMS AND CONDITIONS:

The material sent to be repaired in STEIEL, must ALWAYS be sent ex-works (at your charge) unless otherwise indicated.

1. If the material is considered under warranty, upon our communication, the repair and return of the material will be fully borne by STEIEL without charge.
2. If the material will not be considered under warranty, after a repair estimate, the repair will be debited and sent back in charged forwards or ex-stocks with invoice charge.
3. In the event that the repair estimate is not accepted, the unrepaired material will be returned with a charge of €30.00 as handling costs, and the shipment will be in charged forwards or ex-works with invoice charge.
4. For amounts below € 50.00 the repair will take place automatically without waiting for authorization, the payment will be a bank transfer in advance or cash on delivery, unless otherwise agreed.

DECLARATION OF DECONTAMINATION

In compliance with legal regulations and for the safety of our employees, we need this declaration of decontamination, with your stamp and signature, before Your request can be handled.

This declaration must be attached to the delivery bill, together with the first page of this document.

The declaration must be provided for each item sent to us, for which the decontamination has been carried out.
