NEW PRODUCT YEAR 2026

Zoffoli: a family history since 1949

made in Italy

Bringing Timeless Italian Elegance into Everyday Life

In 2025, our journey takes a bold and visionary step forward with the birth of Zoffoli Living.

Building upon the legacy of Zoffoli Mappamondi Srl, a family company founded in 1949 and internationally recognized for its luxury handcrafted globes, Zoffoli Living represents a new and complementary brand identity.

It is rooted in the same values that have defined us for over seventy years — craftsmanship, industrial know-how, historical heritage, premium material selection, and innovative design — while expanding our perspective toward a broader concept of living.

Zoffoli Living is built around the idea of home.

It is a collection designed to bring timeless elegance into everyday life through objects that speak of style, memory, and discovery. Each piece embodies the authenticity of Made in Italy and the balance between tradition and contemporary aesthetics. The result is a refined yet approachable luxury — sophisticated, but never distant.

This **new positioning** allows us to meet the evolving needs of a modern, design-conscious audience:

curious minds who see the world as inspiration, collectors of beauty and meaning, travelers at heart who bring the world into their homes. Zoffoli Living addresses a dynamic target of design enthusiasts and high-profile buyers seeking distinctive décor and lifestyle pieces that elevate interiors with character and cultural depth.

While the original Zoffoli brand continues to represent the purest expression of our exclusive design globes — icons of Italian excellence crafted for prestigious spaces — **Zoffoli Living expands our universe into furniture, home décor, accessories, and curated interior solutions.**

Two complementary visions.

One shared passion: craftsmanship and the beauty of the world.

Zoffoli Living is where heritage evolves into lifestyle,
...and where Italian excellence becomes part of everyday living.

since 1949

Design Globes

The **living area** is where a home best expresses its identity — a space for gathering, sharing, and refined style. In the new **Zoffoli Mappamondi catalog**, interiors come to life through objects that blend tradition, design, and culture.

Zoffoli globes integrate seamlessly into living spaces, becoming **distinctive focal points** that enhance and elevate the atmosphere.

New!

Where vision takes shape.

The office is the place where ideas, decisions, and vision take shape. In the catalog by Zoffoli Mappamondi, this space is enriched with objects that convey authority, culture, and style.

The office is not just a workspace, but an environment that expresses vision and personality.

Bar Globes

The finely handcrafted globes of **Italo Zoffoli** quickly drew attention. In the 1950s and 1960s, he introduced the original and highly successful globe bar in his Rimini workshop, earning the prestigious "**Tornio d'Oro**" award in 1963 from the National Museum of Science and Technology Leonardo da Vinci.

A passion for innovation and the desire to create unique objects led us to design the **bar globe**: an inimitable furnishing accessory that cannot go unnoticed. Globes with authentic charm that, like treasure chests, safeguard precious crystal glasses and fine bottles.

A passion for fine drinking blends with the most refined taste, to surprise your guests and welcome them in style.

Classic lines and contemporary design merge to offer an aperitif in the heart of the world.

living

XVI CENTURY

N

These maps were born during the **Age of Great Explorations**, when new lands were being discovered and borders expanded day by day.

The coastlines began to take shape with greater precision, while the interiors often remained imagined, enriched with **mythological figures, ships, and sea monsters**.

What distinguished them are the inscriptions in **Latin** and their warm, earthy tones.

XVIII CENTURY

N

The cartographies become more precise and **rich in details**.

Decorative elements remain, but with a more sober and elegant style.

Country borders are more clearly defined.

Let yourself be taken back in time to the **18th century** through the period's ornamental motifs and numerous innovations introduced by the Dutch cartographers.

VINTAGE

N

This cartography, inspired by a 1598 model, stands out for its wealth of **numbers, details, and vibrant colors**.

It is a true journey into the imagination of the era: the **mythological figures** that populate the map give it a strong and captivating character.

A touch of history and legend that transforms the globe into an object of inimitable charm.

POLITICAL

This **cartography highlights** only the current geopolitical divisions: each country is colored differently from its neighbors, and **capitals, major cities, states, and regions** are indicated.

The physical features of the territory are rendered in a simplified way, so as not to distract from the political aspect.

Globes with this type of map are ideal for consultation and learning, and it is no coincidence that they are often found in schools, libraries, and museums.

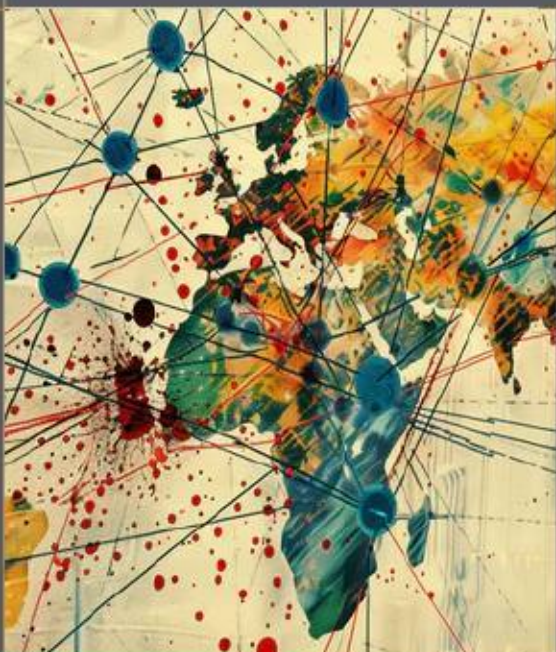

CONTEMPORARY

It combines clarity and detail: political borders are well defined, showing only **countries and capitals**.

Major **rivers** are marked, **ocean depths** are depicted through delicate shading, and even **sea currents** are represented with arrows that bring movement to the globe.

An essential design, conceived to be both **informative and elegant**.

CUSTOM

We offer the possibility to develop customized cartography for corporate and special projects.

Personalized maps can be created subject to technical feasibility, sphere dimensions, graphic complexity, and minimum production volumes.

From **private label** collections to branded corporate gifts and interior design projects, our team works closely with partners to ensure precision, consistency, and the highest manufacturing standards.

Production

From Premium Materials to Hand-Finished Detail

Each globe begins with the careful selection of high-quality raw materials, particularly fine woods and components chosen to ensure both the beauty and structural integrity of the globe and its stand.

Elements such as **bases**, **feet**, and **meridians** are precision-cut using advanced computer-controlled machinery, yet every piece receives meticulous artisanal attention.

Maps—whether antique or contemporary—are carefully **applied and hand-finished**. In some cases, they are printed using traditional cartography techniques, preserving a classic, vintage, or modern aesthetic that reflects both heritage and timeless elegance.

Italian Precision in Every Detail

Production

From Paper to Globe: An Entirely In-House Process

Every Zoffoli globe begins with carefully selected, high-quality paper, chosen to ensure clarity, durability, and refined aesthetic appeal.

The production process is meticulously managed in-house, from the printing of the cartography to the precise cutting and application of each map segment onto the sphere.

Each stage — printing, shaping, application, drying, and final assembly — is carried out within our company by skilled artisans and specialized technicians. This complete internal control allows us to guarantee consistent quality, exceptional attention to detail, and the highest standards of Italian craftsmanship.

By overseeing the entire process under one roof, we preserve the authenticity, precision, and excellence that define every Zoffoli globe.

Comprehensive Quality Control

Every product is carefully inspected and tested to ensure the highest **standards of quality** and reliability.

Our Comprehensive Quality Control process guarantees consistency, durability, and customer satisfaction at every stage of production.

- Material checks to verify quality from the start
- Process monitoring to prevent defects
- Final inspections to ensure excellence before delivery

With this approach, we make sure every item meets our strict quality expectations, giving you confidence in every purchase.
