## **M SERVICES SRL: 40 YEARS OF PASSION IN THE FIELD OF MACHINE TOOLS**

Born from a deep passion of the Menti brothers for CNC machine tools., it has become a point of reference for Italian and European industrial realities, not only the main automotive and mechanical sectors.

Through innovation, research, development, and certification

(UNI EN ISO 9001:2015)

M Services on specializes today in the design and realization of:  
new lines of special machines on request.

### **Hobbing machine:**

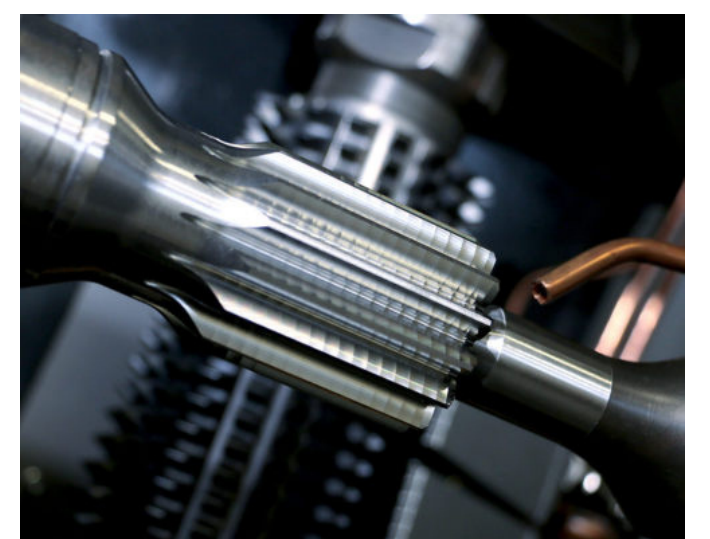

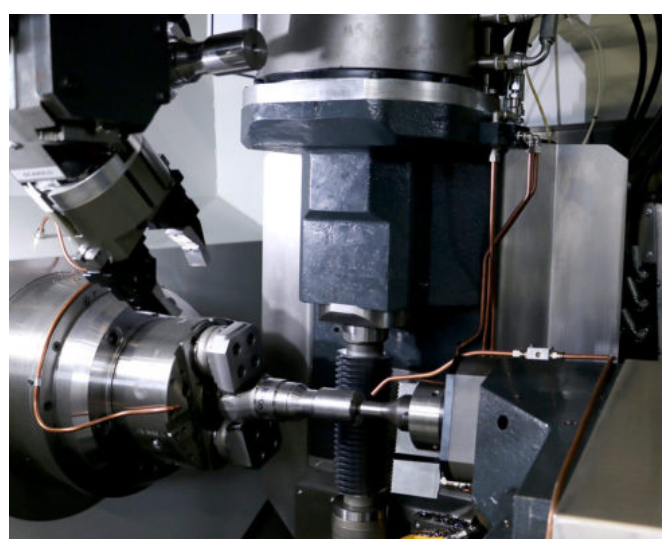

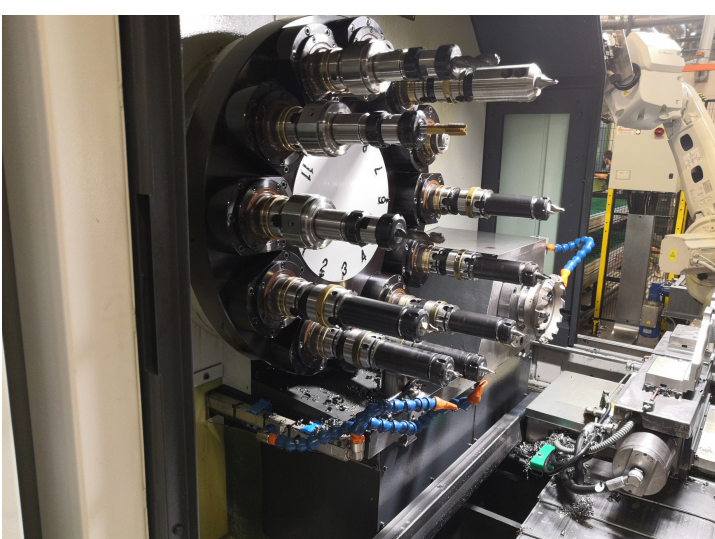

specific N.C machines for cutting cylindrical, straight, and helical gears; They can also make auger in semi-finished cylindrical screws and cylindrical shafts of different lengths, slotted profiles and pulleys. These machines are distinguished by their simplicity of equipment and versatility to adapt to the customer's equipment.

### **Machines for the treatment of chrome shaft:**

they are built for the treatment of chrome shaft for hydraulic and pneumatic cylinders; they also optimize equipment and programming times. The simplicity of use and great versatility make these machines extremely competitive, even for the realization of a unique production code.

### **Boring machine:**

machines used to work the inner hole of the T-nodes of hydraulic cylinders, with diameters from 20 to 300 mm. They are CNC machines, easily programmable and easy to use.

## **M SERVICES SRL: 40 YEARS OF PASSION IN THE FIELD OF MACHINE TOOLS**

### **End working Machine:**

they work simultaneously at both ends of an axle and can perform milling operations: head, centering, drilling, threading, and chamfering.

### **Special CNC machines:**

studied and carried out on specific production needs of the customer. The machines, aimed at simplifying production processes and ensuring greater reliability, are assembled with high-quality mechanical and electronic details; They are also built using advanced measuring and verification instruments and their components measured in an equipped metrological room.

The customer is guided step by step from the analysis to the feasibility study carried out in 3D to the realization of the machine. Its team of qualified technicians is able to guarantee technical assistance interventions (mechanical, electrical, electronic and software), on site and by telephone, quite fast. It also offers training and training on the use of the machine during installation and even after-sales.

The core value of M Services is to create a strong and lasting relationship of trust and loyalty with its customers.
