

Triaminodil®

Molecule with a chemical structure similar to Minoxidil, developed in our laboratories. The clinical trials on our products based on Triaminodil have proven that our molecule shows the same high tricological characteristics (stop of non physiologic hair-fall and rebalancing of the hair bulb activity) of Minoxidil, but with almost no systemic vasodilating activity and an excellent ability to improve the beauty of the hair. Triaminodil, therefore, combines an high anti-hair fall activity with a very well safety use to obtain an excellent result as hair beauty.

- Novoxidyl fitocomplex, Novoxidyl shampoo, Seboex lotion, Novoxidyl gel cream

Lipacides

Molecule family patented by Givoudan-Lavirotte, which are the result of acylation between a fat acid and a vegetal origin amino-acid.

Lipacide C8G (Octanoic glycinic): sebonormalizer, antibacteric specific versus bacteria of acne and cutaneous acidifier.

- Neo Deacnil cream

Lipacide VG (Palmitoic-prolinic): antiflogistic, dermoprotective and anti free radicals.

- Lenidermine cream, Deacnil lotion

Lipacide PVB (palmitoic-hydrolyzed wheat proteins): collagen fibers restructurant and cutaneous acidifier.

- Deacnil lotion, Novoxidyl gel cream

Enoxolone phytosome (18 beta glycyrrhetic acid phytosome)

Semi-synthetic molecule obtained from liquorice roots which has a high anti-pruriginous, anti-inflammatory and cicatizant action, the highest activities among the cosmeceutical raw materials. The phytosomal version of enoxolone shows a higher performance thanks to an improved bioavailability and to an increased release time.

- Neo Deacnil cream, Lenidermina cream

Acylglutamate

Class of surfactants derived from pyro-glutamic acid fermentation (Ajinomoto patent). They have extraordinary characteristics (currently the best on the global market) as regards the ratio between hydration, detergency, acidifying power (very high level) and the primary skin irritation (almost nil). Products based on Acylglutamate surfactants make the skin very soft and smooth. Acylglutamate surfactants make the hair easy to comb, shiny and free from electrostatic charges.

- Novoxidyl shampoo, Deacnil milk, Lenidermine cleanser

Esculin

Semisintetic molecule based on vegetal extract obtained from Aesculus Hippocastanum. The related tests have proved, both in vivo and in vitro, the capacity to improve blood microcirculation thanks to a local vasodilating action that does not affect the systemic pressure values.

- Novoxidyl fitocomplex

Lauric Acid (n-dodecanoic acid)

Extracted molecule from Serenoa Repens and other plants. Several biochemical tests carried out on animal cells and human fibroblasts have shown that lauric acid is an excellent inhibitor of the action of 5-alpha reductase, the isoenzyme which transforms testosterone into dihydrotestosterone (DHT), the biochemically active form.

- Novoxidyl fitocomplex, neo Deacnil cream

Phytosfingosine

The Phytosfingosine are biotechnology fermentation products composed by same lipids of human skin. They are naturally present in the stratum corneum of the skin, according to the following scheme:

STRATUM CORNEUM -> GLUCOCERAMIDS -> CERAMIDS -> BASIC SPHINGOIDS (Phytosfingosine-sfingosine, Sphinganine).

They have a particular lipidic function and so "moisturizing" in case a loss of CERAMIDS as in presence of atopic dermatitis. Last, but not least, they are antimicrobial and have a specific anti-inflammatory activity

- Ezemax emulsion

Cardiospermum halicacabum

Hydroglycolic tropical plant extract that has proven in many clinical trials an exceptional anti-inflammatory, anti-pruriginous and anti-allergic activity.

It gave the best experimental results in the treatment of the atopic or seborrhoeic eczema, acting in particular on the itching and inflammation, exudative also.

- Seboex cream Seboex lotion, Ezemax emulsion

Product list

TRICHOLOGICAL

NOVOXIDYL PHYTOCOMPLEX *

Hair lotion with Triaminodil®, esculoside, lauric acid, genistein and beta 1.3/1.6 glucan to normalize the functions of pilosebaceous follicle.

Novoxidyl phytocomplex is particularly indicated in the treatment of male and female alopecia or telogen effluvium due to various etiopathologies.

┆ Box of 20 or 40 pre-scratched 2 ml dark-glass vials with vial-breaker and dropper
€ 42.00 (40 vials), € 22.00 (20 vials)

┆ Box of 12 pre-scratched 5 ml dark-glass vials with vial-breaker and dropper € 20.00

┆ 60 ml bottle with spray dispenser in its case
€ 18.00

NOVOXIDYL SHAMPOO *

Anti-dandruff shampoo containing Triaminodil® and pyritione zinc.

Adjuvant in functional treatments against strong hair fall.

Extra sweet washing basis containing anphoteric surfactants (betaines) and non ionic (acylglutamate)

┆ 200 ml bottle in its case € 14.80

NOVOXIDYL GEL CREAM

Non-alcoholic gel for face and body alopecia treatment containing Triaminodil®, azelaic acid, carnitine and lipacides. Excellent skin sebum-balancing and softening power.

┆ 30 ml bottle with dispenser in its case € 16.70

NOVOXIDYL SHAMPOO SOFT

Oily hair cleanser slightly foaming containing a mixture of hydrosoluble oils and anphoteric surfactants.

This innovative formula makes the product highly biocompatible with the scalp and balsamic on the hair, assuring a high quality detersion standard. Its use is recommended also in pediatrics and neonatology, since it helps the dissolution of milk scab in addition to an extra smooth detersion.

┆ 200 ml bottle in its case € 15.00

SEBOEX LOTION

Trichological lotion based on Triaminodil®, hydroglycolic extract of cardiospermum halicacabum, ciclopiroxolamine, climbazole, vitamin E acetate and salicylic acid, for the treatment of flaking and irritation of the scalp caused by excess sebum.

┆ Box of 15 pre-scratched 2 ml dark-glass vials with vial-breaker and dropper € 21.00

┆ 30 ml bottle with spray dispenser in its case
€18.00

DERMATOLOGICAL

neo DEACNIL CREAM *

Dermatological cream containing azelaic acid, l-carnitin, enoxolone phytosome, lipacides, lauric acid and clorexidine for the treatment of acne scarring and skin hyperchromies. Its complex formulation enabled a significant reduction of treating times if compared with similar preparations with same performances.

┆ 30 ml aluminium tube in its case € 16.90

DEACNIL MILK

cleanser based on anphoteric surfactants (betaines) and non ionic (acylglutamates), physiological pH (5,5), extremely gentle on the skin. Excellent bacteriostatic activity specific for seborrheic or damaged skin. For frequent use on the whole body and on all skin types.

┆ 200 ml tube-bottle in its case € 14.10

DEACNIL LOTION

Lipacide and sulphorate compound fluid gel for the treatment of skin rashes and irritations due to depilation.

Excellent for men (after shave) and women (before and after body depilation)

┆ 100 ml bottle in its case € 12.10

BADENOIL

Bath oil exclusively containing vegetal oils rich of polysaturation acids and balsamic oils. It replaces the standard cleansers keeping soft skin without greasing it.

Used pure it has an high cutaneous lipids repairing activity and excellent softening moisturizing and keratolytic action on skin, for xerosis and hyperkeratosis treatment. High skin biocompatibility.

┆ 200 ml bottle with cap, dispenser spray and measuring spoon in its case € 18.10

EZEMAX EMULSION

Fluid emulsion based on glycolic extract of cardiospermum halicacabum, enoxolone phytosome, phytosfingosine, chlorhexidine and vitamin E acetate, for an adjuvant treatment of irritative or eczematous skin states.

┆ 50 ml bottle with dispenser in its case € 23.80

SEBOEX CREAM

Cream based on cardiospermum halicacabum, ciclopiroxolamine, climbazole and vitamin E acetate, for cosmetic treatment of skin flaking and irritation caused by sebum excess.

┆ 30 ml aluminium tube in its case € 17.60

LENIDERMINA CREAM *

Orthodermic cream containing lipacides, enoxolone phytosome, vitamin A palmitate, clorexidine and hydration complex for the treatment of skin rashes and irritations due to external factors (chemical, biological and/or physical). Excellent both adults and babies.

┆ 30 ml aluminium tube in its case € 15.10

LENIDERMINA LIQUID POWDER *

Mixture of sprinkling powders added to a watery gel containing smoothening and refreshing vegetal extracts and a natural film-forming agent. This innovative formula has eliminated the powders inhalation risk, advantageously replacing the traditional "dry" products, both for babies and adults.

┆ 100 ml bottle in its case € 16.20

LENIDERMINA CLEANSER *

Gel cleanser containing anphoteric surfactants (betaines) and non ionic (acylglutammate), with a slightly acid pH (6.3), to deeply wash, but gently, the skin without altering the hydrolipidic surface. Highly bacteriostatic action. Excellent in pediatric childcare and for female and male intimate hygiene.

┆ 200 ml bottle in its case € 15.50
