

COMPANY PROFILE
2019

THE COMPANY

- **LTL Stampi** was established in 2007 in Italy, thanks to the 30-years experience of its founder **Lucarelli Fabio** and his shareowners **Tassi Sandro** and **Lai Luca**.
- The Company is specialized in the **design, production** and **repair of injection moulds** for thermoplastic materials and serves the **packaging** market for the following industries: food, industrial, agriculture and nursery.
- It bases its roots on 4 elements of strength:
 - Craftmanship/Experience
 - Technology/Innovation

OUR PRINCIPLES

MISSION

To supply a **reliable mould**, with stable performances and durability, free of excessive maintenance costs and **aimed to optimize both production costs and management efficiency of those who purchase it.**

VISION

To be a developing Company able to create and maintain over time and internationally a **competitive advantage**, becoming a **reliable alternative** to the major players of the market.

High **quality** for high **efficiency** and costs in
control thanks to:

- Optimization of the item production techniques before the creation of the mould
 - High specialisation
 - Flexible organisation
- Rationalisation of resources

SERVICES

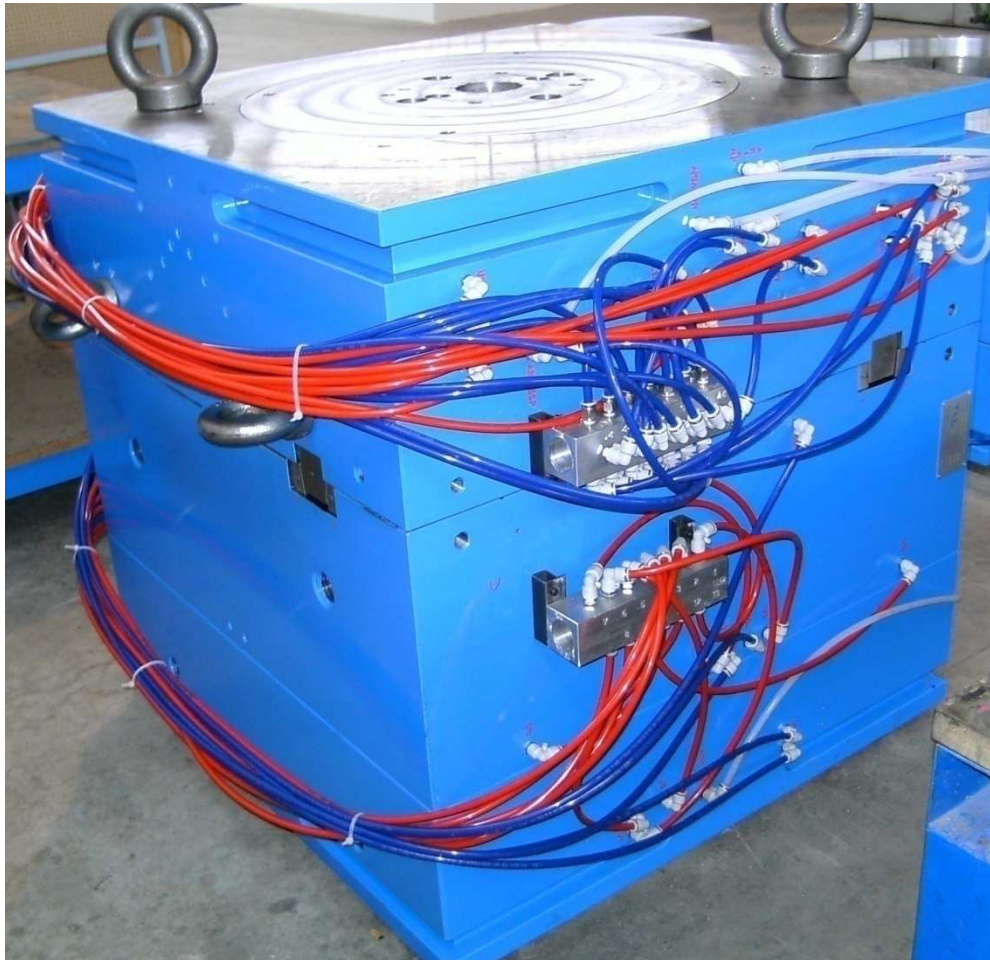

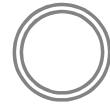

- Assistance during all phases of the supply:
 - ✦ Co-study and collaboration to optimize the item
 - ✦ Co-design
 - ✦ Development and optimization of the mould and its production cycle
- Simulations, Mouldflow and Mouldcooling
- 3D mould design
- IML & IMA moulds
- Mono- or multiple cavity moulds
- On-site technical assistance for our moulds and third party's (on demand)
- Maintenance, repair and modifications of our moulds and third party's
- Internal tests before the supply of the mould

PRODUCT SECTORS

- **Containers, buckets and lids** rounds and squared for food and industrial use
- **Pots, vases, containers** for nursery and greenhouse
- **Crates, containers** for fruit and material handling
- **Households**
- **Building**

SOME OF OUR PROJECTS

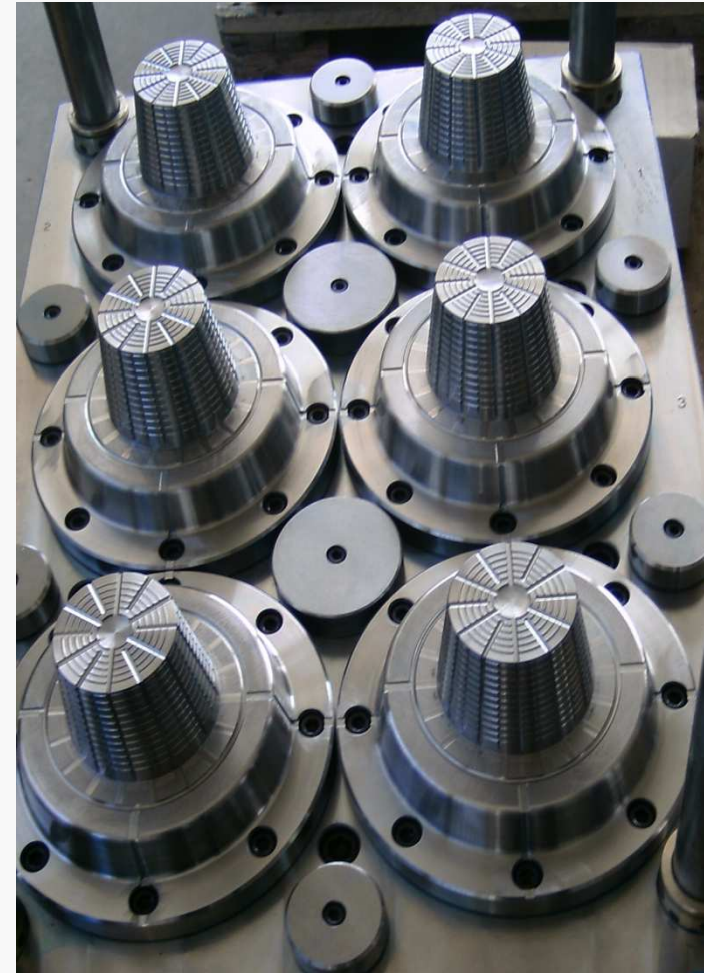

Mould finishing

Households – Rattan profiles

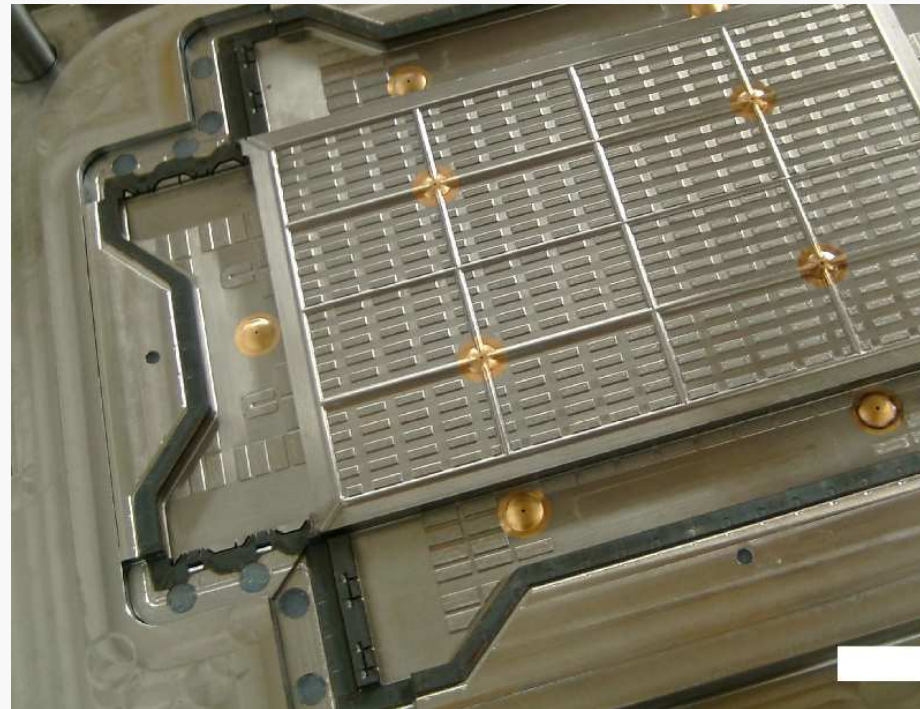

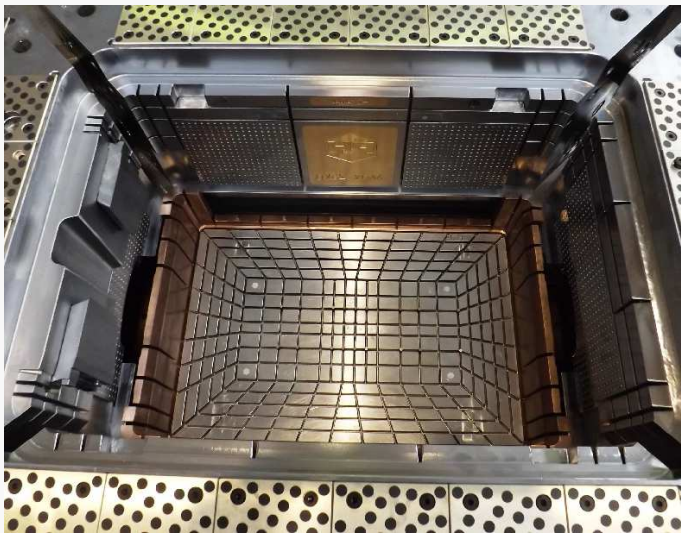

Food & Dairy

Industrial & thin wall

Storage, material handling

- CAD/CAM **Cimatron 5 axes**
- Inner milling **up to 5 axes**
- CNC inner turning up to **1200mm diameter**
- Wire erosion up to **450mm thickness**

- Mould manufacturing up to **15 ton.**
- Inner tests on press

STRATEGIC GOALS

- **Differentiate:** products with unique characteristics which count for each Client.
- **Stimulate:** to expose the Company, the product and their characteristics to a wider and international audience.
- **Communicate:** an effective communicative relationship and the tight collaboration with the Client aimed to optimize the item in terms of profiles, thickness, etc, and make its production process more cost-effective.
- **Innovate:** technology, services and organisation. Long-life learning, machines and operating method to achieve the production efficiency.
- **Customer loyalty:** quality and reliability guaranteed from the study of the project to the post-sale phase.

Facing a new investment & development plan aimed to expand the production capability and the added value of the Company, we would like to propose **our know-how** and **tailor made solutions** to the **international market**.

Constantly looking for **new collaborations**, we want to grow with our Partners and meet their expectation by providing them with quality products reliable in time, able to assure high and long-lasting production performances and to produce a final item free of imperfections.
