

Iside Agricola - goodness of simplicity

By following values of transparency, sustainability and ethics, we take care of every detail of the entire production cycle and we make good, healthy and genuine herbal teas, spices and essential oils for your well-being.

100% Natural and Organic Italian products

About us

ISIDE s.r.l. was founded in August 2013 thanks to the passion of Simone for plants and that one of Mariagrazia for officinal herbs. The company name is meant to be a tribute to Isis, who belongs to the group of great Mother Goddesses as the goddess of fertility teaching agriculture to women in ancient Egypt.

Our fields are our grandparents' fields, that have been abandoned for many years and we have decided to give them back "life" in order to link our past to our future.

Our present is the following: **30 hectares of land** in the municipalities of Pietradefusi (Avellino) and San Giorgio del Sannio (Benevento). Currently **10 hectares** of them are dedicated to **aromatic / officinal herbs** and the remaining part to traditional crops (with particular attention paid to **ancient cereal grains**), olive trees, a small vineyard, vegetables, several fruit trees and woodlands.

We take care of the environment and our land, which is why **SlowFood** has awarded us the title of **Custodians of Biodiversity in Irpinia**.

Mission

We farm with **certified organic methods**, inspired by the principles of natural farming of Masanobu Fukuoka.

We respect what nature can offer us without forcing the natural course of events even if it means losing some harvests. For this reason we have developed a plan based on crop rotations and set-aside land in order to get genuine and ethically sustainable products.

We **collect and select the plants manually**, we dry them naturally, we distil slowly without adding chemicals and **solvents**, we take care of every detail of the production cycle to get essential oils, herbal teas and spices, **all for food use**.

Our **products** are analyzed by specialized university laboratories. They are **natural and 100% organic, GMO free**, without additives and chemicals to offer the best safety and quality to consumers.

ORGANIC Herbal infusions
