Beautiful and top quality wine cellars

We love our job and our mission: this allows us to design the most exquisite customized wine cellars. Putting together only top quality natural materials with refined design, we are able to create unique environments which will please any request.

We design customized and comfortable wine cellars, where our customers can store their best wines, combining functional efficency with the aesthetic taste of our days.
Using only the best materials and the best available technologies, we are capable of creating wine cellars which can produce an elegant and refined atmosphere.

We are professional artisans who put a lot of passion in every detail and we are sure that our solutions will always be able to offer the most appropriate cellar which will match your tastes.

The result will be an exquisite wine cellar, a perfect place to entertain your friends, collaborators or customers: a cellar to live in.
We believe in our work and in our mission, and we assure you that the final result of your wine cellar will always match with your requests and your requirments.

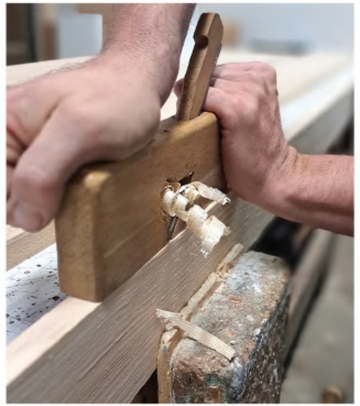

The ideal wine cellar

A wine cellar is a place that can transform any wine into emotions, therefore, the cellar becomes ideal only if it fulfills two crucial complementary criteria.

First criterion is objective: it requires the compliance of every technical parameter for an optimal preservation of bottles to allow a pleasant long stay of the wines. Second criterion is subjective: the wine cellar must be beautiful, must please the costumer; therefore, the cellar must be customized in every detail.

An ideal cellar must observe the correct parameters of humidity, temperature and brightness; bottles must be protected from any eventual external vibration or harmful smell which could compromise the quality of wines.

Winest mission is the creation of perfect wine cellars, which means perfection in every detail, design and construction performed to follow customer's taste and wishes, and the compliance of every criteria of functionality and practicality for the correct preservation of your wine.

Top quality materials

At Winest we have significant experience and a specific technical knowledge and we know how to select the best materials for the creation of wine cellars. We choose only materials which allow a perfect combination of aesthetic taste and functionality.

We know perfectly that refined wine cellars require materials which must be carefully selected.

Whether that materials will be used for shelves for collection of most precious wines or be used for customized details, we will always choose top quality materials with high durability.

Our experience in construction combines with our research of latest design trends of wine cellars. We will introduce in your cellar the best appeal and warmth of the most beautiful woods, the firmness and refinement of most noble stones and metals, using our craftsman's knowledge and our expert and competent hands.
