

STUCCO ITALIANO

ECO-FRIENDLY FINISHES

MADE IN ITALY

The atmospheres of the most refined Italian tradition in seventeen eco-friendly materials

Italian Eco-friendly Stuccos

Think Green

NATURAL INGREDIENTS

The 17 products listed in this brochure are Italian eco-friendly stuccos. Specifically, they are 100% eco-friendly versions of our natural lime-based plasters. In fact, these materials exclude all chemical additives in favour of natural ingredients such as casein, shellac, and vegetable starch. Additionally, these products come in powder form in order to avoid the use of preservatives or anti-mildews. Nevertheless, they have excellent workability, comparable to the modern products that make use of chemicals. Moreover, their quality is excellent both for strength and duration.

This line includes 15 finishes for exterior and interior walls, as well as 2 ecologic solutions for seamless floors: Pastellone, a Venetian plaster for floors, and Magnesite, a thin solution for the classical Terrazzo Floor.

LEED CERTIFICATE

Stucco Italiano S.r.l. is a member of Leed Italy (Leadership in Energy and Environmental Design). Indeed, many of our eco-friendly plasters, such as Marmorino Medium, Marmorino Coarse, Intonachino, and Pastellone, are contributing to the achievement of Leed certifications. This is possible because, to produce them, we recover raw materials such as high-quality marble scraps.

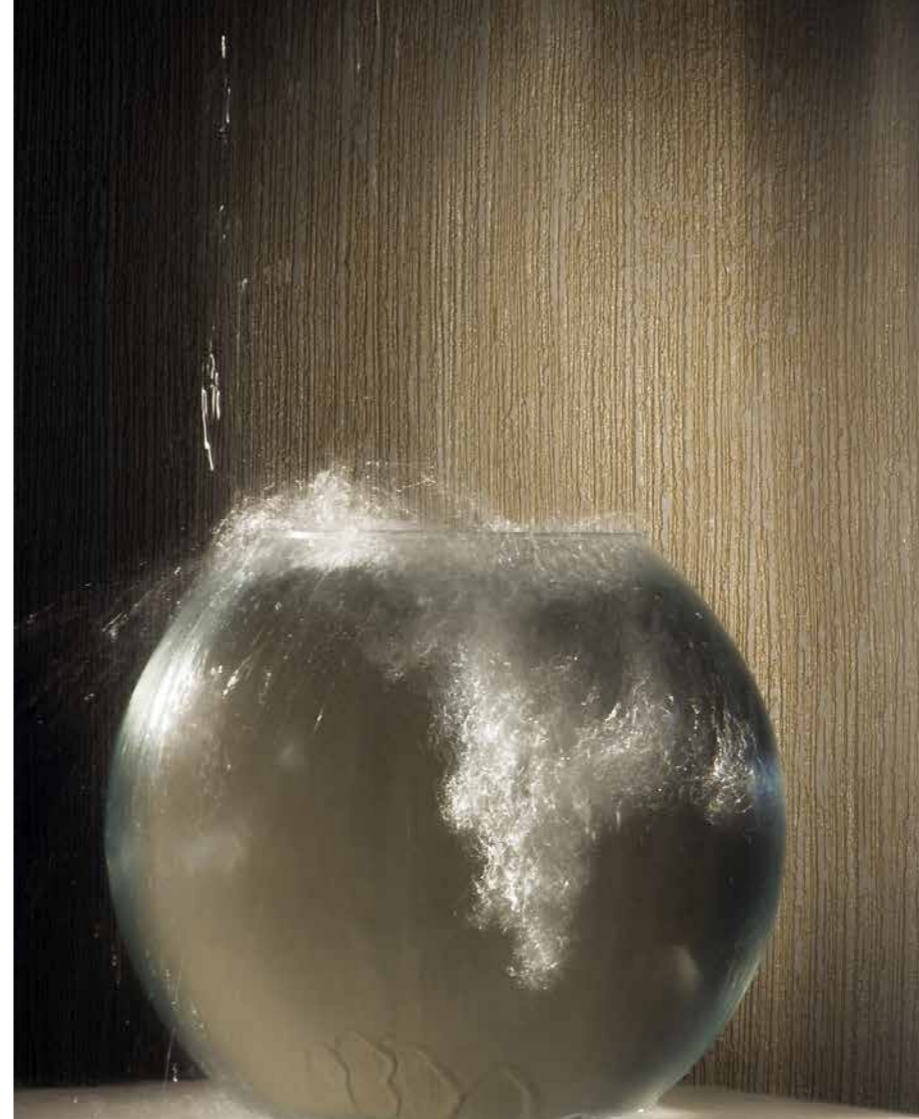

LEED is the most widely used green building rating system in the world. Available for virtually all building types, LEED provides a framework for healthy, highly efficient, and cost-saving green buildings. LEED certification is a globally recognized symbol of sustainability achievement and leadership.

All our products are made in Italy

Stucco Italiano is a building finishes manufacturer based in the Region of Venice, birthplace of Italian craftsmanship and center of historical architecture. In order to guarantee the authenticity of our Italian and Venetian plasters, we manufacture all our products in our headquarters in Vicenza. Consequently, all our products are made in Italy certified. Finally, the production path is controlled in all its steps by a technician committed to this work, to assure constancy of quality. Ultimately, the high quality of our products is also obtained thanks to the best raw materials, which are all of Italian origins.

THE TRADITION OF LIME

These lime-based products sink their roots into the history of Italian plasters. In fact, our eco-friendly plasters differ from other Italian commercial stuccos because, to produce it, we closely follow antique recipes that use only natural ingredients. Applicable with trowels, the final texture can be varied: smooth and glossy or textured and opaque. These highly decorative finishes are therefore suitable for any atmosphere and can last for several years. The majority of the materials comes in Natural White, but they can all be tinted in any colour with Stucco Italiano's Colour System. Additionally, all our ecologic plasters can be combined with eco-friendly additives to obtain special creative effects. Ultimately, we have developed 5 natural treatments for the final protection of eco-friendly stuccos.

Finishes in the pictures (left to right, top to bottom): 1. Interior villa's wall in Marmorino Velvet; 2. Seamless floor in Pastellone; 3. Exotic bathroom's shower-box in Moroccan Tadelakt; 4. Shop's wall in Stucco Lava Copper; 5. External villa wall in Dilavato; 6. Elevator's accent walls in Marmorino Medium

Marmorino Veneziano Coarse

The classical Polished Plaster of the Venetian tradition

This natural lime-based plaster is the most typical decorative finish in the Venetian tradition. It's a plain finish, with little movement and medium shine, also used to realise faux marble effects.

interior

exterior

Marmorino Veneziano Medium

The modern glossy Venetian Polished Plaster

It is a natural lime-based plaster found in the exterior and interior walls of the Venetian buildings. The surface is smooth and slightly shiny, with light contrasts giving a sense of depth.

interior

exterior

Marmorino Medium on an interior wall

Dilavato

Plaster for exteriors rich in coloured marble aggregates

This plaster mimicks an antique plaster which has weathered over time. The multi-coloured marble grains rising from its matte surface make this one of the most valuable and impressive stuccos.

interior

exterior

Terracotta

The most typical plaster for exteriors in the Venetian tradition

Among the strongest hydrated lime-based plasters, this rugged finish contains terracotta powders. It is typically used in Venetian exteriors, since it is very resistant in humid environments.

interior

exterior

Rustic style external wal in Terracotta plaster

Marmorino Velvet

A modern opaque Marmorino Veneziano

This is an opaque version of Venetian Marmorino, produced exclusively by Stucco Italiano. A Damask effect, with soft patterns in relief, can also be obtained with this material.

interior

Seta - Silk

A pearlescent finish reminiscent of precious silk

It is slightly rough and matte, but with a soft iridescent pearl effect, visible when rays of light hit the wall. It has the chiaroscuro effect and the smooth touch typical of silk.

interior

Intonachino

Traditional Italian plaster for exteriors

It is a traditional Italian lime-based plaster for exteriors. This stucco is uniformly rough with slight variations in color intensity. It comes in Fine, Medium and Coarse textures and can generate various different effects.

interior

exterior

Calcite

A modern alternative to Intonachino

It is similar to Intonachino but with smooth and rough surfaces that alternate. It has a faint chiaroscuro effect. Being very resistant, it is an excellent solution for classic and modern exteriors, as well as for high-traffic interiors.

interior

exterior

A rustic villa's walls coated with Intonachino

Beton Stucco

A concrete effect finish for urban and industrial styles

It is a modern hydraulic lime and cement-based finish. It is the easiest way to obtain decorative effects reminiscent of smooth and normal concrete. It can be applied on all building surfaces, but also on modern furniture.

exterior

Urban style furniture and walls in Beton Stucco

Dolomia

Coarse plaster with aggregates and golden micas

Often beauty originates from simplicity, combined with a precious detail. The same happens for this finish: a simple plaster that becomes wonderful when enriched with flakes of natural golden mica.

interior

exterior

Stars

Coarse plaster with aggregates and silver micas

This finish is very similar to Dolomia, with the only difference of the colour of the micas, which is natural silver.

interior

exterior

Travertino

An Italian finish from the Renaissance tradition

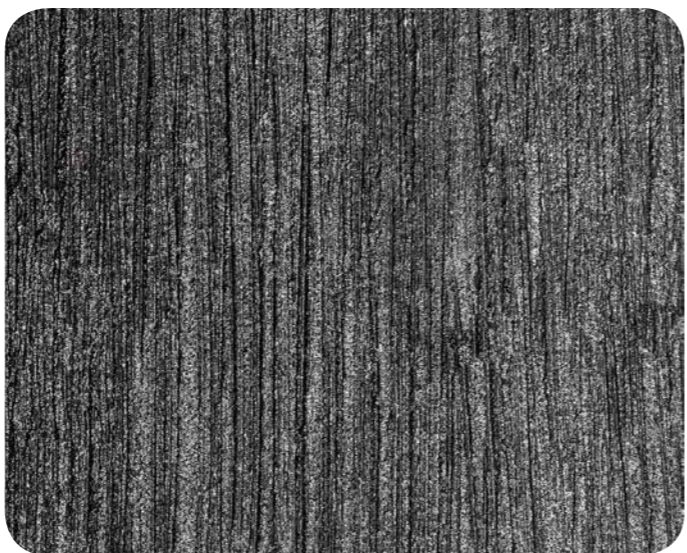

This plaster was created to imitate travertine marble, one of the most famous Italian marbles. Two different effects can be achieved with this material: Romano and Toscano, which has a more modern and youthful look.

interior

exterior

Stucco Lava

A versatile finish for decorative effects

This extremely versatile finish was created to achieve more than ten distinctly diverse finishes, such as Craters, Juta, Rain, Spazzolato, Tessuto and Crocodile Skin. Although it is lime-based, it is remarkably hard.

interior

exterior

Sauna's walls and washbasins in white Tadelakt

Tadelakt

Smooth and glossy traditional Moroccan wall finish

This waterproof lime-based plaster originated in Morocco, where it is traditionally used in the Hammams and Riads of Marrakech. It is appreciated for its durability and appearance which brings to mind exotic places.

interior

exterior

Lime Paint

The most ancient mural painting

A wall painting that creates a welcoming and cozy atmosphere. It has that sense of softness that is rarely found in modern paints. It is most suitable for ancient buildings, rural environments, and decorations.

interior

exterior

SEAMLESS FLOORS

Seamless floor in Pastellone, wall in Intonachino

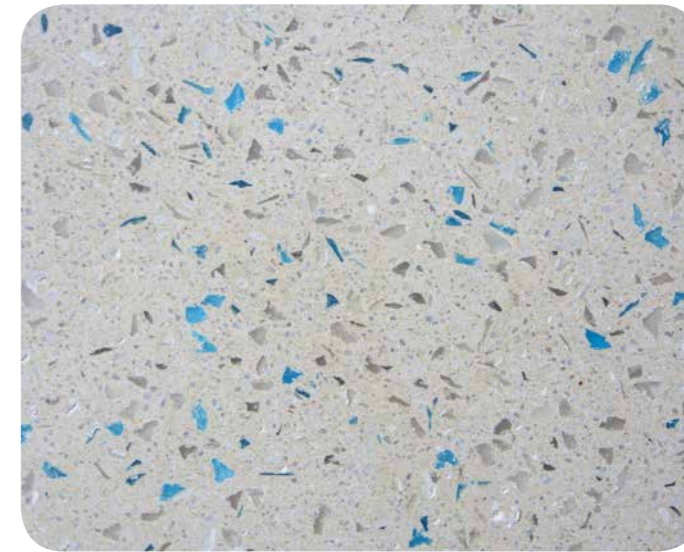

Pastellone

Seamless floor finish marrying elegance and resistance

This finish retains the aesthetics of antique Marmorino while adding the durability that modern day living demands. It's ideal for minimalist environments because of its smooth, uninterrupted continuity.

interior

Magnesite

A new thin solution for the classical Venetian Terrazzo

It is a historical material that lost its interest with the arrival of cement. Now it is drawing new attention because it is exceptionally hard and ecofriendly. With it you can obtain a Venetian Terrazzo floor with a thickness of only 10 mm.
