

OUR COMPANY

NSI is an Italian company which has been designing and creating cutting-edge dental implants since 2008. The company was founded in Borgo San Giacomo, Brescia, in 1960 as a turning company. In 1980, we made our debut in the world of orthopaedics and dental health, specialising in turning titanium and special kinds of steel.

OUR PATENTS

Authenticity is a fundamental principle and it is important for products to be protected. The implant market is a competitive one and NSI want to guarantee that their implants are **original** by filing **patents**.

Innovation, simplicity and originality:
NSI s.r.l.'s top three priorities for their certified and patented products.

QUALITY CONTROL & CERTIFICATIONS

All NSI supplies have been certified by ICIM (Italian Certification Institute for Mechanics) with the code **CE 0425**, as per existing European legislation.

Every process takes place in a controlled, aseptic environment, from decontamination and washing to packaging carried out in an **ISO 5** cleanroom.

Our certifications:

- **ICIM CE 0425 certification**
- **NSI Reg. no: MED 29010 CE 0425 issued by the certification body ICIM**
- **Mechanical tests on NSI implants performed c/o Cermet laboratories CE 0571**
- **ICIM certification CE 0425 and ISO 13485**
- **UAM certification no. MH19D0092638**
- **NSI TECH INDIA certification no. AAQFN4012R**

Smile, high.

LIGHT

-  Atraumatic self-tapping
-  Inserted with a single bur
-  One prosthetic connection
-  Designed to avoid bone resorption

FULL-PACK

ALL INCLUSIVE
PROSTHETIC SYSTEM

-  Perfect for immediate loading
-  It is easier to handle the implant
-  Used as a scan abutment for digital intraoral impression technology
-  Direct mounting technology without any additional costs

PROSTHETIC COMPONENTS

FOR ONE-STAGE IMPLANTS

-  Patented MUA kit
-  Special anatomic profile
-  Single abutment size for all implant diameters
-  Single connection with a hexagonal profile, also for the through screw

MAXIFIX

-  Maximum stability
-  Dental fenestration is avoided
-  Perfect for immediate loading
-  Recommended for areas with very low bone density

MAXIFIX COMPRESSIVE

-  Minimally invasive
-  Option to tilt the abutment
-  Perfect for immediate loading
-  Sterile prosthetic kit and scan abutment included

MAXIFIX COMPRESSIVE P

-  Immediate loading
-  Reclinable collar
-  Single connection with one-stage, basal and compressive implants
-  Atraumatic and economic solution for patients

BASAL

-  Anti-rotation stop
-  Perfect for immediate loading
-  Perfect for bicorticalism
-  Internationally patented trilobo connection

INSTRUMENTS

-  Site is perfectly calibrated and smoothed
-  Suitable for any kind of bone quality
-  Certified surgical steel 100% Made in Italy
-  Implant site is prepared quickly and easily

SINGLE-USE STERILISED PROSTHETIC PARTS INCLUDED
