ALOE ARBORESCENS

With the knowledge that nature is able to offer us remedies and solutions to preserve and improve the health of our skin and organism, we have chosen as the basis of our products the queen of herbal plants: ALOE.

Our goal has always been to create products that bring real benefits, different from those that the market usually proposes. That is why we have made two unusual choices:

1) The variety of Aloe used

We have chosen not to use Aloe Vera, but the less known Aloe Arborescens from organic Italian crops, since the Aloe Arborescens as demonstrated by various scientific research and recent bibliography has a concentration of active ingredients significantly higher and therefore greater therapeutic activity compared to Aloe Vera.

2) The processing method of the Aloe leaf

We have developed an Aloe manufacturing process called the "HDR® method", an innovative, effective and tested method, protected by industrial secrecy.

The "HDR® method" allows us to cold extract all the active ingredients not only from the inner gel, but from the entire aloe arborescens leaf. The cuticle, external part of the leaf, contains a huge percentage of active ingredients with anti-inflammatory, antioxidant, anti-radical, anti-tumor properties. The result obtained is a very rich extract, with all the active ingredients present in the Aloe Arborescens leaf.

NATURAL REMEDIES

Nature offers us a myriad of active ingredients to take care of our body, it is a real open-air pharmacy. The Aloe-beta® "Natural Remedies" line has been specially designed and formulated by selecting the most powerful biological extracts to preserve and improve the health of our skin and body. Each product is the result of study and research, and every single component, for its properties and for the synergy with the other ingredients, makes our remedies incredibly effective.

Animal fats or mineral oils are not used at all.

Main functional ingredients

- Organic aloe arborescens
- Litsea Oil
- Olive oil
- Coconut oil

We have been working in the world of prevention and well-being since 1997.

In 2006 we demonstrated the synergistic effect between the Carrot and the Aloe Arborescens so as to be able to patent the formula as "Vegetable blend with energetic and cosmetic therapeutic activities".

Working, studying and focusing only on the Aloe Arborescens and at the same time creating an "HDR® method", effective and 100% tested, allows our customers to obtain the MAXIMUM benefits from the Aloe.

In 2012 Phytotherapy Research, a prestigious international scientific journal, published an experimentation at the Federico II University of Naples which demonstrated how the extract of Aloe obtained with the HDR® method promotes cell regeneration.

We take care of all the phases necessary for the study, creation and distribution of our products: choice and processing of raw materials, formulation and registration.

We select the best raw materials and the packaging is carried out in such a way as to allow the preservation of the products in an optimal manner.

We work with a single purpose, happiness.

Our goal is to make our customers happy by offering natural products that have real beneficial effects. Whenever the people who trust us smile for solving their problems, we smile and we are happy with them!
