MADE IN ITALY
Design Beds & Mattresses

Made in Italy:

Where Excellence Begins

We design and create our mattresses with an unmistakably Italian soul. Every stage of our production process takes place on our home soil, where skilled artisans transform the finest raw materials into products that embody the true essence of Made in Italy. Our country is our strength: an endless source of inspiration, a cradle of creativity and a symbol of excellence worldwide.

Who we are

Redefining Sleep Through Design

We are the visionaries of sleep, the architects of comfort, the revolutionaries reshaping the concept of mattress. Niorem® is not just a brand, it's a statement of intent. We are here to turn bedrooms into functional art galleries.

Born from a passion for innovation and driven by the ambition to excel, we challenge our field norms at every turn. Our mattresses aren't just sleep surfaces, they are sculptural masterpieces, blending seamlessly into their surroundings so that rooms are not only functional but also design.

Thanks to our relentless pursuit of design perfection we have earned some of the most prestigious international awards. But for us, each award is just another reason to push further, to explore new frontiers in sleep technology and aesthetics.

We believe the future of sleep is already here. And we are shaping a tomorrow where comfort, style and sustainability exist in perfect harmony.

Michele & Adriano Calabrese
Founders

Awards

Multi-award-winning international design

Our pursuit of excellence never goes unnoticed. Our passion for innovative design and superior quality has been recognized on a global scale.

Every award we receive is a symbol of our commitment to redefine what comfort and style mean in the world of sleep.

About us

Discover the Story Behind Our Innovations

We've redefined the mattress industry with cutting-edge design and unparalleled functionality, using only the finest materials.

The awards we've won are proof of our unwavering commitment to push beyond the boundaries of comfort and the mattress industry.

la Repubblica

“Being part of the finalist list for the Compasso d’Oro is like making the shortlist for the Oscars of industrial design.”

Quotidiano Piemontese

“For the first time in its 68-year history, among the finalists of the Compasso d’Oro, the prestigious international design award, there is also a mattress...”

“Compasso d’Oro 2024: For the first time, a mattress makes it to the finalists.”

“Between 2018 and 2021, MTA ranked among the top-performing Italian companies.”

Libero

“MTA Group Leini is the Growth Champion 2023.”

“MTA Group has been recognized among the top-performing Italian companies.”

Certifications

We don’t just talk about quality and innovation, we live them. Every day.
We’re here to revolutionize the world of mattresses with our bold and disruptive approach.
Our certifications are tangible proof of our commitment to excellence, safety and sustainability.

A Certified Commitment

Our certifications aren’t just symbols, they’re milestones on our journey to a future where comfort meets innovation.
Each one represents our dedication to offer products that meet the highest standards of quality, safety and environmental responsibility.

CertiPUR

Our polyurethane foams are CertiPUR-certified, ensuring they are free from harmful substances such as mercury, lead and heavy metals. This guarantees that our mattresses are not only incredibly comfortable but also safe for both you and the planet.

OEKO-TEX® Standard 100

Our materials are certified OEKO-TEX® Standard 100, a guarantee that our products are free from harmful substances and safe for health.

Dispositivo Medico CE

Our mattresses are certified as CE medical devices, ensuring compliance with European standards for safety, health, and environmental protection.

Reach Compliance

A regulation designed to protect both people and the environment by setting new safety benchmarks for chemical use. This ensures greater transparency about material properties, exposure risks and the most effective safety measures.

Global Recycled Standard

The Global Recycle Standard, promoted by Textile Exchange, one of the leading non-profits organizations in sustainable textile development. This certification verifies the presence of recycled materials in our products, ensuring full traceability throughout the entire production process.

Certification ISO 9001

Our attention to detail and pursuit of perfection have enabled us to achieve ISO 9001 certification for our quality management system. This certification confirms that our production processes are optimized to ensure the highest quality at every stage of production.

Certification ISO 14001

Our commitment to the environment is certified by ISO 14001, which recognizes our environmental management system. We adopt sustainable practices and use eco-friendly materials to reduce environmental impact and promote sustainability.

The fundamental role of sleep: a deeper look

Sleep as the Pillar of Physical and Mental Well-Being

Sleeping well is a complex and vital process, structured in highly organized cycles with essential biological functions. During quality sleep, the brain moves through five stages that repeat in cycles of about 90 minutes. These include light sleep (stages 1 and 2), deep sleep (stages 3 and 4), and the REM phase.

- **Deep Sleep (NREM):**

essential for physical recovery. During this phase, the pituitary gland releases growth hormone, essential for cellular repair, immune system strengthening and protein synthesis.

- **REM Sleep:**

essential for cognitive functions. This stage is crucial for memory consolidation, emotional processing and creative thinking.

When sleep cycles are interrupted or compromised, the effects are immediate: chronic fatigue, reduced productivity and increased risk of cardiovascular and metabolic diseases.

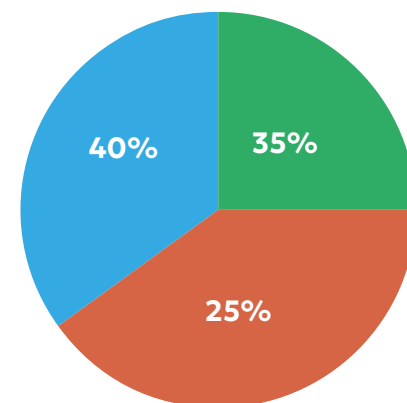

Sleep is regulated by circadian rhythms, influenced by natural light and daily routines.

To maximize its benefits, a dark, quiet and well-ventilated environment is essential. A high-quality mattress plays a key role: it supports the body, reduces pressure points and promotes deep sleep.

According to a study by the National Center for Biotechnology Information, a well-designed mattress can enhance REM sleep by up to 20%, the crucial phase where the body undergoes essential regeneration.

Benefit of a good sleep

- Physical regeneration
- Mental well-being
- Cognitive growth

Scientific Data Proving the Power of Sleep

1. Boost in Cognitive Performance

- A Journal of Neuroscience study found that individuals who sleep at least 7 hours per night experience a 30% increase in problem-solving skills compared to those who sleep less.

2. Stronger Immune System

- Sleeping less than 6 hours a night reduces white blood cell efficiency by 50%, making the body more vulnerable to infections.

3. Lower Risk of Chronic Diseases

- According to the American Heart Association, chronic sleep deprivation raises the risk of developing type 2 diabetes by 23%.

Materials

Materials

Where performance and quality meet

Behind every mattress we produce there's a conscious choice: we use only the highest quality raw materials, selected to ensure the best in comfort, durability and sustainability. Our vision is reflected in every detail of our products.

Materials designed to create a perfect synergy between technology and nature. A sleeping experience that redefines the concept of well-being. Because sleep is not only a need, but also an experience to be lived in total comfort and style.

PURAE® WOOL
Naturally Italian Merino Wool

**Natural, thermoregulating
breathable, odor-resistant.**

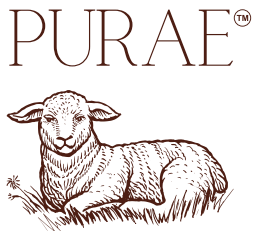

The name PURAE™ carries a deep historical meaning. Our merino wool comes from sheeps of a native Italian breed, with origins dating back centuries. The ""Merino Gentile di Puglia"" was born in the 15th century from the crossbreeding between Italian sheeps and the prized Merinos breed, a gift from the Spanish monarch to the Papal States.

Carefully guarded by the Spanish monarchs, this sheep breed underwent centuries of selections and crossbreedings with European breeds, progressively improving the features of their wool. Today, the "Gentile di Puglia" produces fine white merino wool with a micronage varying between 25 and 27 microns depending on the season. This wool comes directly from Southern Italy, where farmers work with dedication to maintain the pureness of this ancient breed.

Innovative Treatment

Puræ® wool is washable thanks to an innovative treatment using natural salts. Along with specific activators and under precise conditions, these salts release oxygen, acting as an oxidizing agent for the wool fiber. This eco-friendly process avoids the use of chlorine and the formation of organic chlorinated agents (AOX), ensuring a treatment that doesn't harm the wool or the environment.

No chlorine compounds are found in the treated wool or in the wastewater, making Puræ® a sustainable and responsible choice.

GRAPHENE®
A new intelligent filling with unique thermal properties

Graphene is much more than just a fiber: it's an innovation that transforms comfort. Thanks to its unique thermal properties, it intelligently regulates body temperature. In cold environments it retains body heat, while in high temperatures it disperses it, always maintaining the perfect balance.

It's antistatic, so it fights electrical charges, and its antibacterial properties ensure impeccable hygiene. It's the result of nanotechnology, soft and

lightweight. Graphene is the perfect choice for those seeking versatile comfort without compromise.

Advanced thermoregulation: keeps body temperature stable, reducing thermal fluctuations.

Natural antistatic: disperses electrical charges for tension-free comfort.

Antibacterial properties: provides a cleaner and safer environment thanks to its nanoparticles that are free from harmful substances.

RISORSA®
A revolutionary zero-gravity memory foam

Ultra-soft and super cozy, a material that redefines comfort and cares for the future of our planet. With resilience close to zero, it's designed to perfectly adapt to the shapes of your body, offering gentle support that alleviates pressures and promotes deep relaxation. This is Risorsa®, cutting-edge memory foam designed to provide unparalleled comfort and impeccable environmental sustainability. Risorsa represents the vision of a greener world, foamed with vegetable-based polyols. This innovative choice not only enhances the quality of your rest but also contributes to a more sustainable future by reducing environmental impact. Every night on Risorsa is a unique experience, where functional design meets care for the environment. A material designed to envelop you in a delicate embrace while respecting nature, night after night.

MEMORY FOAM BREEZE®
Freshness without Compromise

Memory Foam Breeze is designed to offer regenerative rest, keeping your body at the perfect temperature. Thanks to its open-cell structure, it ensures maximum heat dispersion, quickly wicking away moisture and creating a constantly fresh and ventilated resting environment. Laboratory tests have shown that the water vapor passage capacity is, in volume, 50 times higher in Memory Foam Breeze® compared to standard Memory Foam. The Breeze contact surface is designed to remain continuously aerated, air circulates optimally. This continuous ventilation keeps the mattress pleasant to the touch, even on the hottest nights, ensuring long-lasting freshness. Memory Foam Breeze adapts to the body with a unique focus on temperature control, avoiding heat buildup and offering a regenerative rest.

AIRSYSTEM®
open-cell foam, breathability that improves the quality of your rest

An innovative polyurethane foam, designed to redefine the comfort of sleep. Synonymous with ventilation and freshness, it offers impeccable elastic body support and extraordinary flexibility, transforming every night into an unparalleled resting experience. A non-deformable material, resistant to aging deformation, ensuring exceptional durability.

The results of rigorous durability tests are clear: our foam retains its shape even after intensive use. Thanks to its exclusive open-cell formulation, breathability is high, allowing free airflow and a quick heat and moisture dispersion. It's not just a top performance, this material also meets the strictest standards in environmental sustainability, safety and health.

CAUCCIÙ FOAM
High-density material for a strong support

High-resilience polyurethane enriched with natural rubber, a material with exceptional mechanical resistance and durability properties, superior to any other reproduction material. The

balance between these materials ensures extraordinary quality, offering unmatched resistance and longevity.

OLIBOND®
A highly breathable polyester technical fiber

This innovative fiber offers a unique combination of comfort, breathability and high technical performance, ensuring a regenerative and safe rest. Thanks to the structure of its fibers, it ensures optimal air circulation inside the mattress, promoting the dispersion of moisture and body heat. This advanced breathability keeps the mattress surface always fresh and dry, creating a

comfortable resting environment in any season. Olibond® fibers are designed to maintain their shape and resilience over time, providing stable and durable support. Even after years of use, the mattress keeps its features unchanged. The polyester fiber is naturally resistant to the proliferation of allergens and bacteria, creating a healthier and more hygienic resting environment.

MEMORY FOAM
The shapes of comfort

A material that responds to the body, molding with precision to offer customized support. Memory Foam is activated by body heat, distributing weight evenly and reducing pressure

points. Its elastic structure absorbs movements, ensuring deep and tension-free rest, where every muscle relaxes completely.

Fabrics

Beyond the surface: the secret of our fabrics

In every fiber, every weave, there is a passion for innovation, a pursuit of absolute well-being and a desire to offer a rest experience without equals. Precious materials, cutting-edge technologies, design inspired by nature and the future: all of this merges into our fabrics. Carefully selected by our craftsmen, each fabric is the result of a meticulous process to find the most elegant and refined ones, with timeless design.

Viscose Fabric with Negative Ions Treatment

Reinvigorate body and mind

Our Negative Ions cover is the result of an advanced technology that uses the spraying and dispersion of natural ceramic substances capable of generating the effect of negative ions directly onto the fibers. This effect is produced through physical stimulation, offering tangible benefits for your well-being. Negative ions, abundant in natural areas like forests, streams and waterfalls, are responsible for that invigorating and energizing feeling you experience in these environments. In contrast, the concentration of electrical devices in domestic and work environments increases positive ion levels, contributing to fatigue and exhaustion.

It's designed to counteract the negative effects of positive ions, to improve metabolism, blood circulation and to reduce fatigue. Not only an innovative choice, but also a promise of daily well-being.

This shows that technology and nature can coexist in harmony.

The Power of Negative Ions: Natural Well-Being for Your Rest

Negative ions are small elements of nature that can make a big difference. When a molecule captures an extra electron it becomes a negative ion, charged with positive energy. They are abundant in natural environments like forests, beaches and waterfalls, they are often the true reason behind that rejuvenating and refreshing feeling you experience in nature.

These ions bind to dust particles, allergens and other impurities, purifying the air we breathe. But they don't stop there: their energy has a direct impact on our well-being, reducing stress levels and stimulating serotonin production, the happiness neurotransmitter. So also when sleeping negative ions ensure a deep and regenerative rest.

Negative Ions

Science and Well-Being: Studies on Negative Ions and Sleep

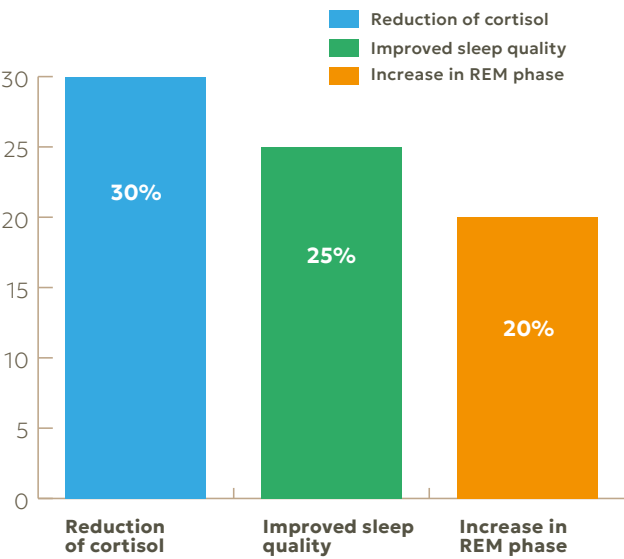

Science confirms what our bodies already know: negative ions improve sleep quality and reduce stress. According to a study published in the Journal of Environmental Psychology, exposure to negative ions in controlled environments showed a significant increase in rest quality and a decrease in perceived stress.

Furthermore, the National Center for Biotechnology Information (NCBI) highlighted how negative ions reduce cortisol levels by 30% and improve the REM sleep phase by up to 20%. These findings are clear: integrating negative ions into your rest moments is not only a natural choice, but a scientifically proven one for better living.

The revolution in rest experience

- **Deep relaxation:**
Negative ions activate serotonin production reducing cortisol, the stress hormone. The result? A relaxed body and a calm mind, ready for a regenerative sleep.
- **Pure air, serene dreams:**
Negative ions act as natural purifiers, capturing dust and allergens to create a clean, healthy and resting environment.
- **Improved sleep quality:**
Thanks to negative ions, nighttime awakenings decrease and the REM phase intensifies, ensuring truly deep and restorative rest.
- **Balance and tranquility:**
Negative ions facilitate the balance of the nervous system, creating a state of calm that accompanies every stage of sleep.

EFFECTS OF NEGATIVE IONS ON SLEEP QUALITY

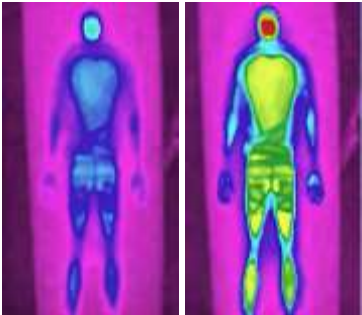

Linen and Cotton Fabric:
a natural duo

It combines tradition and innovation, offering superior support and impeccable aesthetics. Cotton, with its unrivaled softness and linen, known for its strength and freshness, come together to create a perfect synergy for a regenerative and healthy rest. Each fiber is carefully selected to ensure

breathability, moisture absorption and a lasting freshness that endures over time. Imagine sleeping on a bed that breathes with you, adapting to your needs and enhancing your sleep quality night after night. Designed for those seeking the best in both quality and sustainability.

ICECOOL® FABRICS
Temperature under control, freshness always active

Temperature difference of IceCool® fabric compared to a traditional fabric

Designed for those wanting something more than an ordinary sleep, IceCool® is a revolutionary fabric that maintains freshness and comfort throughout the night, helping the body regulate its climate and ensuring optimal rest in every season. Thanks to its advanced technology, it actively dissipates body heat, ensuring a constant sense of freshness. Forget sleepless nights searching for the cool side of the mattress. With IceCool® every part of the mattress is always fresh.

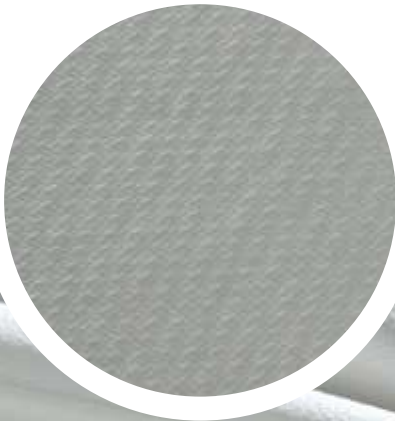

Viscose STRIPE Fabric:
Natural Comfort and Extraordinary Softness

It's made from viscose fiber, a material derived from natural sources. It offers unparalleled softness and breathability, keeping your body cool in every season. The perfect choice for those seeking natural comfort without compromise.

Viscose DOT Fabric:
Nature's Gentle Touch on Your Sleep

Let yourself be embraced by the softness of viscose, a natural fiber that provides an unmatched sense of well-being. Its breathability keeps you cool and dry, night after night, season after season.

Springs

Our Commitment: Ensuring Uniform Firmness for Every Mattress

Each spring unit we produce undergoes rigorous tests using a dynamometer. This tool allows us to measure the firmness of each single spring system, ensuring that the mattress you receive at home has the exact same level of firmness as the one you tested in store.

We guarantee consistent resistance and support, even with normal material tolerance variations. This means that regardless of production

conditions, every spring meets the nominal load value specified in its technical sheet.

With the dynamometer, each spring system undergoes multiple tests and only those with optimal values are used.

The result? A mattress that provides maximum support and durability, ensuring the comfort and quality you expect, night after night, for a lifetime.

Premium Steel for Long-Lasting Support

Our spring systems are crafted using high-carbon steel that is pickled, phosphate-coated and drawn, as required by the strict EN 10270-1 standards. This ensures that each spring is not just a simple component but a guarantee of superior performance.

Thanks to high-quality steel and meticulous processing, our springs provide optimal elasticity and a perfect support.

The phosphate coating prevents micro-cracks during the drawing process, ensuring exceptional durability and extending the lifespan of the mattress.

With this attention to details, we guarantee that every spring not only supports the body with precision but maintains its effectiveness for years, offering constant comfort and impeccable resistance.

Spring Technologies and
Personalized Comfort:
Our advanced systems

We have developed a range of spring systems that stand out for their precision and variety of comfort levels. Each system has a different diameter, specifically designed to provide customized support and perfectly adapt to individual needs. From thinner springs giving a delicate support to wider and firmer ones ensuring superior stability, every detail has been carefully crafted to guarantee maximum comfort.

Our focus on quality and material selection ensures that each spring system maintains its performance even after years of use. The result? Mattresses that offer personalized rest, designed to last while maintaining the same level of support over time.

DUAL PROGRESSIVE

Dynamic Support (Dual Layer Pocket Springs)
A combination of two layers of independent pocket springs with differentiated zones, each with a specific function, it guarantees the correct weight distribution and pressure relief.

Springs per square meter: 522

MICRO 1.700

Small-diameter springs provide a highly responsive support for your body, easily adapting to different sleeping positions. This spring system provides a soft but right support, alleviating pressures.

Springs per square meter: 534

POCKET 1.000

The Pocket system is the perfect choice for those seeking balanced support with an elastic response. With a slightly larger spring diameter than the previous models, the Pocket 1,000 offers calibrated comfort while maintaining optimal firmness.

Springs per square meter: 305

LFK

An innovative interconnected spring system. Each cylindrical-shaped spring, designed with compact dimensions, precisely adapts to different body zones providing perfect elasticity and personalized support.
Crosswise steel spirals, meticulously intertwined, create an invisible but strong network for the best support, ensuring superior durability and unwavering stability.

Springs per square meter: 201

DUAL PROGRESSIVE
Progressive Comfort, Perfect Sleep

Progressive comfort is the core of our dual-layer pocket spring system, a technology that redefines personalized support. This dynamic interaction between mattress and body responds in real time to every movement and pressure, creating a highly customized sleep experience. A combination of two layers of independent pocket springs, each with a specific function, ensures adaptive support and complete pressure relief.

Upper Layer: Softer springs supporting the parts of the body with the highest pressure (shoulders, hips, and legs), alleviating tension and distributing weight evenly to prevent discomfort.

Lower Layer: Firmer springs that provide a stable base, effectively supporting the body while keeping the spine in its natural alignment regardless of the sleep position.

Real-Time Adaptive
Comfort

The magic of progressive comfort lies in its ability to instantly adapt to body movements: As weight shifts, the upper layer molds gently to the body. The lower layer maintains constant stability. This dynamic balance ensures proportional responsiveness, reducing micro movements and promoting uninterrupted and restorative sleep.

Covers

Innovation and Advanced Design in a single cover

Where aesthetics meet functionality. Masterpieces designed to redefine the comfort of your rest, with an innovative design and top technologies. Like works of art that dress your sleep. Every detail is designed to enhance your rest experience. They are not just covers, but everyday luxury experiences made with cutting-edge materials.

No edges, no compromises

No edges for a minimalist and refined look, while still keeping the mattress structure perfectly squared. This aesthetic approach adds a modern and sophisticated touch without compromising functionality or shape.

The result is a mattress that seamlessly integrates into any environment with an essential and contemporary style.

Sewn with precision

The quilting is done with a numerical control machine that ensures a uniform and precise stitch.

This process binds the materials indissolubly, ensuring stability through time.

Magically elastic

Quilted elastic polyurethane that offers superior aesthetic performance, giving the mattress a plumper and more welcoming look while also ensuring flawless retention over time, keeping the padding stable.

Design **COVER SYSTEM**

*More than a cover.
It's pure style.*

Invisible details, flawless functionality

The hidden zipper is a small revolution in mattress care. Invisible to the eye but easy to use, it allows you to remove the cover with a simple gesture, making washing and maintenance effortless. A design that keeps the aesthetic impeccable, without sacrificing practicality.

No movements

Our anti-slip system keeps the mattress in its optimal position, eliminating unwanted shifts.

The fabric is designed to create friction with the surface, offering constant stability. A technical detail that makes a difference, ensuring uninterrupted and distraction-free rest.

Refined embroideries, surprising utility

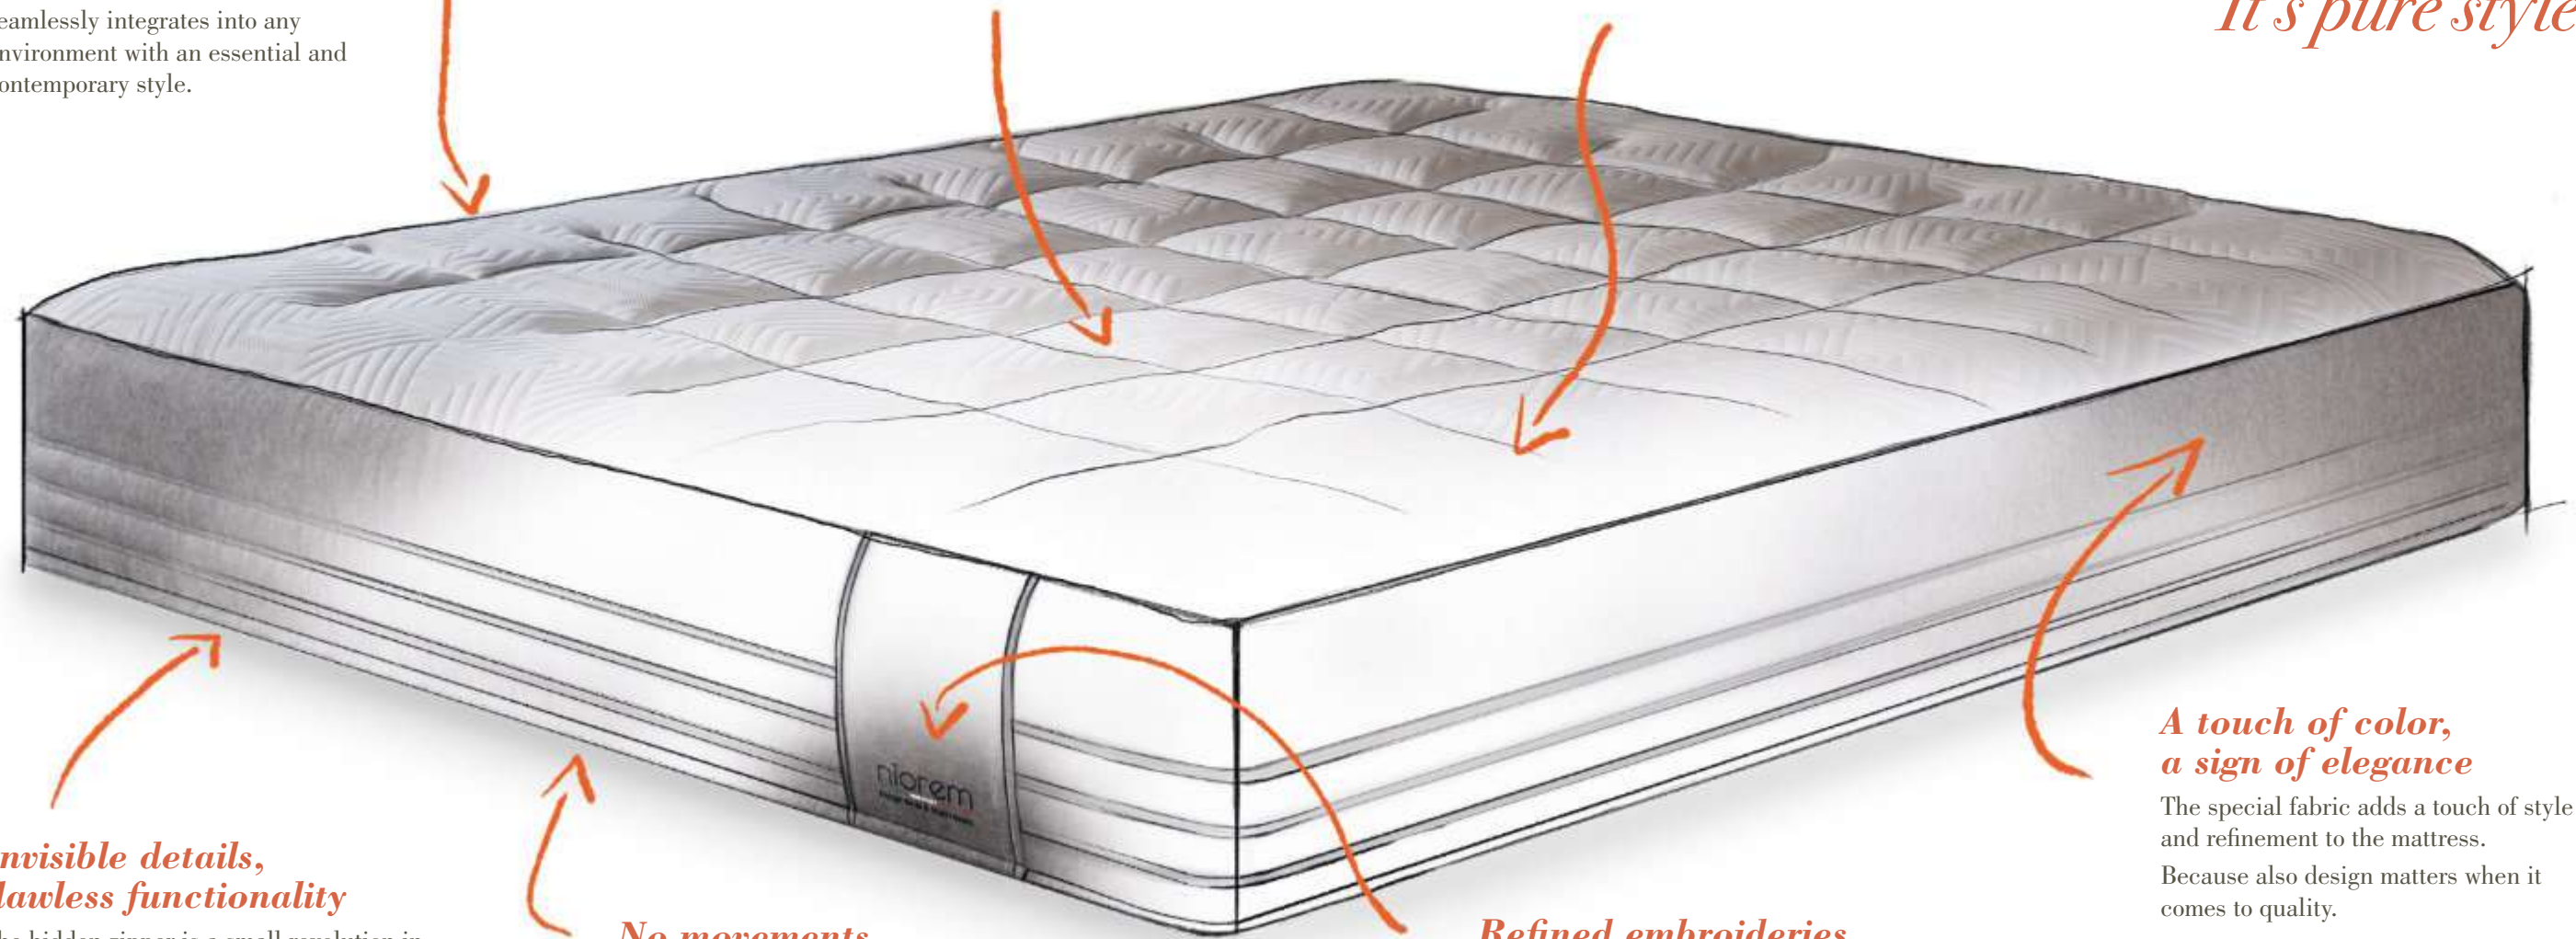

The embroidered label is not just an aesthetic detail that adds elegance and personality to the mattress, but also a smart and functional solution.

Its design makes it perfect for hiding small items, offering a discreet and practical space.

A touch of color, a sign of elegance

The special fabric adds a touch of style and refinement to the mattress.

Because also design matters when it comes to quality.

COVER

Nano Wave

Negative Ions and Graphene in action: pure energy, every night.

Our cover with Negative Ion fabric and Graphene padding is the perfect blend of innovation and well-being. Thanks to cutting-edge technology, the pulverization of natural ceramics generates negative ions directly in the fibers. The result? A regenerative effect that envelops your body.

Like a walk in a forest or near a waterfall, negative ions infuse a sense of vitality, counteracting the tiring effect of environments full of electronic devices. More energy, less fatigue. It improves metabolism, promotes circulation and helps you feel your best every day.

Graphene completes the perfect rest by maintaining a stable body temperature, reducing thermal fluctuations and acting as a natural anti-static, dispersing electrical charges for a tension-free comfort.

COVER

Nature Blend

The strength of nature and the luxury of Italian merino wool

Tradition and innovation meet in a cover that takes rest to a new level. Incredibly soft cotton blends with linen, renowned for its strength and coolness, creating a perfect balance between comfort and durability.

Lana Purae®: Natural, thermoregulating, breathable and odor-resistant, Lana Purae® is much more than just padding. It's a piece of Italian history that carries the excellence of the "Gentile di Puglia" merino wool, an ancient native breed.

Thanks to a revolutionary treatment using natural salts, Lana Purae® is fully washable without chlorine or harmful chemicals. An eco-friendly process that respects both the fiber and the environment, for a mattress that embraces the future of sustainability.

Mattresses

A perfect blend of Science and Well-being

Every mattress is the result of a simple but at the same time powerful idea: improving rest through intelligent design and technological innovation. Every detail is designed to provide a sleep experience that perfectly adapts to individual needs, combining innovative materials with impeccable craftsmanship.

We have combined science and comfort, creating mattresses that actively respond to movements, reducing pressure and improving sleep quality. Each raw material is designed to work in synergy with the others, ensuring uncompromising durability and consistent performance over time.

In each of our products there is a commitment to excellence, a sustainable approach and a vision that places well-being at the center, night after night.

DUAL PROGRESSIVE Spring sys

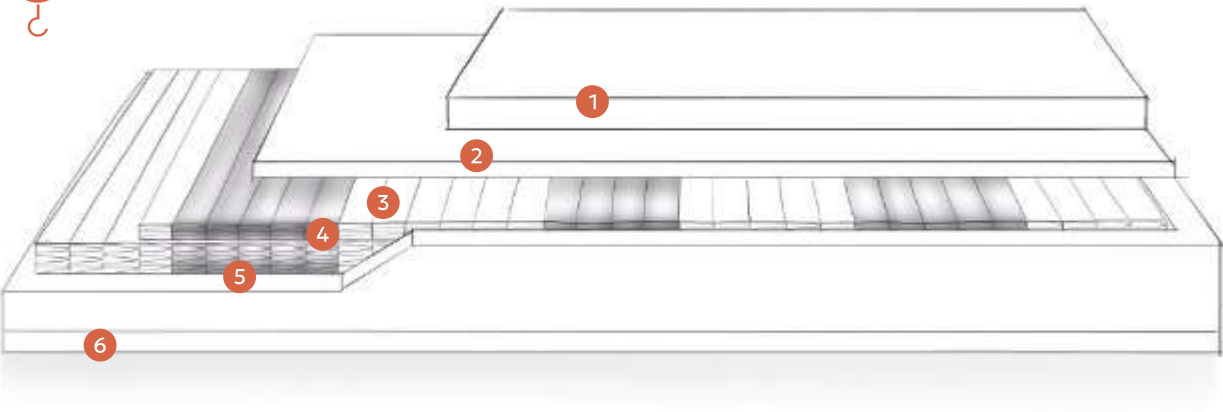

Model A

Engineering precision for advanced rest

The **Model A** embodies the evolution of comfort, combining the best of sleep science and spring system technology. Its advanced **Dual Progressive spring system** ensures a progressive welcome that responds precisely to every movement. The spring system adapts smoothly to the different body pressures, providing dynamic support that changes according to the needs of your body

during the rest. Our exclusive Risorsa® layer, an innovative memory foam designed with near-zero resilience, ensures optimal pressure relief creating a sense of support that grows and adjusts in response to body changes. Model A represents the perfect synthesis of technology and well-being, ensuring ergonomic posture and regenerative rest.

Multilayer innovation for modular support

The structure of this mattress consists of **3 synergistic layers of high-density foam**, it adapts precisely to the body, ensuring the correct weight distribution thanks to the Risorsa® memory foam layer. Each layer is designed to work in harmony, offering precise support and guaranteeing the correct posture, enhancing well-being night after night. In the double version you can create a customized experience by combining the two internal structures with different firmness.

Accessories

The finishing touch for a perfect rest

Every detail matters when it comes to creating the ideal sleep experience.

Our collection of accessories has been designed to complete and enhance the performance of our mattresses.

Each accessory works in perfect harmony with your mattress, providing customized comfort and total well-being.

It's not just a matter of functionality, but also of elegance and care. Because when every element is in balance, rest becomes a truly unique experience.

TOPPER

Nano Wave

Energy and Comfort with Negative Ions and Graphene

Transform every night with our NanoWave topper, where negative ion technology and graphene come together to provide pure and renewed energy. This topper is a fusion of innovation and well-being, designed to envelop you in a regenerative effect that redefines your rest.

Technical features

- 5 cm of adaptive memory foam (standard or Breeze®)
- Final thickness: 8 cm
- Removable and washable cover
- Anti-slip system
- Easily washable thanks to the split system (top/bottom panel)
