

LIMAC Design

Italian craftsmanship, raw materials, and contemporary design.

Founded in 2009 and based in Conegliano, in the heart of Veneto, LIMAC Design was created with the goal of crafting home accessories that blend aesthetics, functionality, and artisanal quality.

Starting from its first leather log holders, LIMAC has expanded its collection over time to offer a wide range of accessories for homes, offices, hospitality, outdoor spaces, and yachting.

The brand's distinctive character stems from the harmony between contemporary design and Made in Italy craftsmanship.

Leather, fine hides, steel, aluminum, and regenerated materials are shaped by local artisan workshops into essential, minimalist objects—crafted with attention to detail and built to last.

LIMAC Design's vision also embraces sustainability through low-impact materials and solutions that emphasize the recovery and regeneration of raw materials.

Collaborations with designers, architects, and interior design professionals enable the brand to develop customized products and bespoke projects, tailored to the needs of private residences, corporate spaces, hotels, design studios, and yachts.

LIMAC Design sits at the intersection of raw material, creativity, and Italian savoir-faire: items designed to enrich spaces with elegance, authenticity, and character.
