INTRODUCTION

Leasemedica S.r.l. company was born in 2012 with headquarters and offices in Naples (ITALY) and the production site in Salerno province (ITALY).

Leasemedica was born from the extensive, international experience acquired by his founder in the field of aesthetic medicine, plastic surgery, aesthetics & wellness with the aim of producing medical and cosmetic products for skin-care, well-being and safety. The care and attention in the choice of raw materials, respect for the environment and preference for national suppliers, together with the expertise of our staff of doctors, chemists and biologists, makes it possible to create safe, effective and innovative products. At the moment our range of products, after scientific studies with competent staff and continuous analysis, has been expanded. Thanks to these innovation we have expanded our range of action worldwide.

MISSION & VISION

Mission:

The excellent reputation of Leasemedica srl manufacturing has always been in the foreground and is imperative for us to continue this development.

A well-managed laboratory always guarantees products conforming with the latest regulations and market requirements.

Our manufactured products are delivered with our design and our registered trademark or, upon request, with customer personalized design.

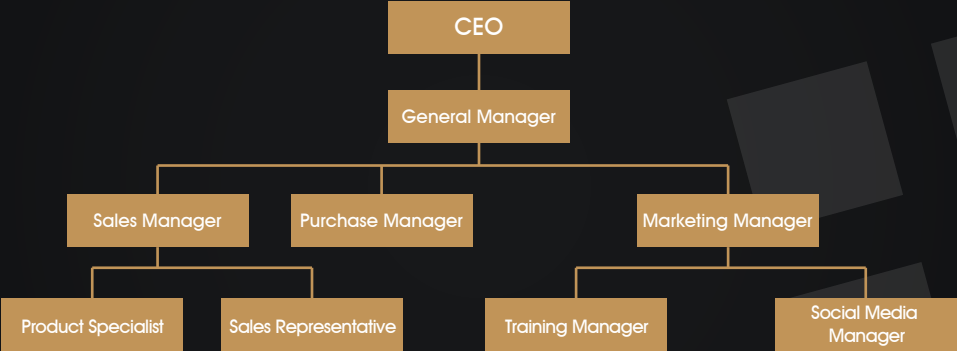

For third party production, Leasemedica has been a reliable partner for decades. A flexible logistic guarantees punctual and reliable deliveries.

Vision:

The interests and objectives of our company are:

- increase the ability to meet the needs and expectations of its customers;
- the importance of pursuing the continuous improvement of own performance;
- the vision of the company as a set of processes aimed at providing products that meet the set requirements and market needs;
- transparency towards the reference markets
- cost control and increased productivity;
- professionalism, competence and reliability.
