

Natural and Certified Cosmetics

MADE IN ITALY

About us

BioMiura was born from the will of a pharmacist, Dr. Losanna, who learned about the limits of classical cosmetic formulations through years of professional commitment and close contact with the public.

Together with his family, he decided to start an ambitious new project, aimed at creating a novel formulation of cosmetics that could give good results without simply covering the signs of time using silicones.

Nature does not cheat; rather, it simply needs time to fix things. By embracing this motto, he selected the best active ingredients of organic origins to create a set of products that can help each woman to dilute the effects of time.

This is how the BioMiura organic cosmetics line was born.

The products of the BioMiura line brings to reality the potential that nature offers. Thanks to the high dosage of active ingredients, at best the possible synergies between them, the BioMiura line can truly provide benefits and comfort to the specific areas of the face that each product uniquely targets.

Certifications

The AIAB Bio Eco Cosmetics label guarantees that the adhering operators comply with a specific specification. Following are the key principles of AIAB, a list of products admitted and not admitted, and, above all, a set of good practices:

- absence of non-vegetable raw materials that are allergenic and irritating or considered harmful to human health;
- completely GMO-free products;
- absence of animal testing;
- use of agricultural and zoo-technical products from certified organic farming;
- absence of materials that are not ecologically sustainable, both in the product and in the packaging.

The code assigned to Marol Biopharma s.r.l. is 100591 and can be verified at:

Prickly Pear Oil Line

The BioMiura organic cosmetics line with Prickly Pearl Oil consists of:

Moisturizing Face Cream for dry and normal skin
Moisturizing and relaxing anti-aging Eyes Contour
Nourishing and moisturizing Cleansing Milk
Soothing and moisturizing Toner

The common base is Prickly Pear Oil, which is obtained from the seeds of the fruit native to Mexico, and has been imported into the Mediterranean in the sixteenth century, where it was used to treat wounds and burns, and for defending the skin from the drying action of the wind.

Prickly Pear oil boasts a millenary healing tradition thanks to its antioxidant, regenerative, firming, moisturizing, soothing, anti-inflammatory, and healing properties. This oil also owes its preciousness to the peculiar extraction process. In fact, it is obtained only by cold pressing of the seeds, and this allows for the preservation of its beneficial properties.

Cold pressing is one of the mechanical methods for the extraction of vegetable oils. It is carried out at a temperature below 27° C, and does not involve any chemical treatment. It allows us to obtain a top-quality product, while preserving the natural properties of the seed. Prickly Pear oil gives radiance, brightness, and elasticity to the skin from the very first applications.

This oil has a significant level of omega 6 and omega 3 essential fatty acids, tocopherols, and Delta-7-Stigmasterol. These components make it a great ally in preventing wrinkles and keeping the skin elastic and firm.

Known for its healing and anti-wrinkle properties, Prickly Pear Oil is a nourishing, protective, soothing, emollient, and regenerating oil; it firms and tones skin tissues; it restores skin elasticity, softness and hydration; it protects the skin from the aggressions of time. It is suitable for face, body and hair, and is especially beneficial for dry, mature and loose skin.

The prickly pear oil does not grease, so it penetrates easily through the skin where it can exert a powerful regenerating and restoring action. This helps to fight dry skin, improve hydration, slow down the skin's aging process, and prevent wrinkles. If used daily, dehydrated skin will regain vitality, and will remain soft and silky smooth. Prickly Pear oil is an ideal beauty treatment to alleviate puffiness, dark circles, and the signs of aging in the thinnest, most delicate and sensitive areas of the face skin, such as the eye and lip contour.

Saffron Line

The BioMiura organic cosmetics line with saffron consists of:
The Anti-Age Illuminating Face Cream with Hyaluronic Acid
The Anti-Age Lifting Eye Contour with Hyaluronic Acid

The common base is saffron (*Crocus sativus*), a plant of the Iridaceae family that is cultivated in Asia Minor and many states in the Mediterranean basin. From the trifold stigma, we get the spice called “saffron”.

Three chemical components contribute to the characteristics of this spice: crocin, which is responsible for the yellow colouring activity; picrocrocin, which is a bitter glucoside that gives the flavour, and safranal, which is responsible for the aroma. Saffron is composed of 12 % water, 4 % fibre, 5 % ash and the remaining portion consists of: fats, carbohydrates, proteins, and mineral salts, with the latter including: calcium, phosphorus, sodium, potassium, iron, magnesium, and manganese, present in a higher percentage. It is also rich in many vitamins, including vitamin A, folic acid, riboflavin, niacin, and vitamin C, which are essential for health.

Much of the research that has been published in scientific journals define saffron as being “the king of antioxidants”, and the reason for this powerful effect lies in the crocetin, crocin, picrocrocin, and carotenoids that are contained in stigmas (red threads in the centre of the flower). These components bind to free radicals and neutralize them, protecting the cells and keeping them young and healthy. Therefore, saffron has important anti-aging functions, and can further fight spots and signs of aging. Known for its anti-aging and exfoliating properties, saffron is extraordinarily effective in the aesthetic field, firming and toning the skin tissues. It also restores elasticity, softness and hydration to the skin, such that it gives a healthy shine to the skin. This product is recommended for use on the face, body and eye contour, especially for mature and loose skin.

Saffron penetrates easily through the skin, exerting a powerful regenerating and restoring action. This helps to improve hydration, slowing down the skin’s aging process and preventing wrinkles.

If used daily, mature skin will regain vitality, remaining soft and silky smooth.

Orange Blossom Line for Mixed Skins

BioMiura organic cream for mixed and oily skin comes from important research on active principles whose synergy results in an incredibly positive result. From pressing orange peels, you obtain a liquid, varying in colour from pale yellow to dark yellow, which is characterized by a particularly sweet, fresh, and pleasant smell. This essential oil contains mainly limonene, citronellol, nerol, linalool, and geraniol, and has dermo-purifying, stimulating, regenerating, and firming properties. Furthermore, it has also been used in the treatment of various imperfections.

From the steam distillation of fresh bitter orange blossoms, you obtain the essential oil of Neroli, used in cosmetics and in the perfume industry. The distillation and removal of the oily phase results in distilled orange blossom water. Distilled orange blossom water is highly appreciated in cosmetology due to its excellent toning, anti-reddening, regenerating and refreshing properties. Finally, the distillation of leaves and orange twigs produces the essence of Petitgrain, composed mainly of linalyl acetate, geranyl acetate and nerol, all of which, contribute to its strong revitalizing and purifying properties, and make it particularly suitable for the treatment of impure skin.

The essential oil of rosemary is obtained by steam distillation of the leaves and flower tops. For topical use it is an excellent antiseptic and skin sebum regulator. In fact, it is present in shampoo with deforming action and creams with sebum-normalizing and dermo-purifying function.

The leaves of green tea, thanks to the presence of important quantities of tannins, show a clear sebum-normalizing and dermo-purifying efficacy.

Thanks to its mix of natural active principles and the absence of silicones, BioMiura Purifying Orange Blossom Cream allows the skin to regain its normal hydro-lipid balance, guaranteeing hydration without weighing the skin down.

MOISTURIZING FACE CREAM FOR DRY AND NORMAL SKIN WITH PRICKLY PEARS

BioMiura Prickly Pear Moisturizing Face Cream owes its qualities to a mix of ideal ingredients aimed at making the skin of the face relaxed and nourished. Some notable ingredients include: Prickly Pear Seed Oil with antioxidant, regenerative and moisturizing properties, Goji berry Extract with well-known antioxidant properties, Hyaluronic Acid, and Kigelia and Quillaja Extract, which have a tensor effect.

INDICATIONS: It has a strong moisturizing, emollient, and nourishing action. It is recommended for usage in all areas with dry and stressed skin that are damaged by exposure to atmospheric agents and subject to loss of elasticity. It should be applied whenever it feels necessary to regain balance and hydration of the face.

RESULTS: The skin of the face is soft, relaxed, and radiant, being nourished in depth.

METHOD OF USE: Apply the right amount of cream on the skin of the face after cleansing, and massage until completely absorbed. Avoid the periorcular area.

CHEMICAL - PHYSICAL CHARACTERISTICS: It does not contain pigments. Its characteristic colour depends on the functional vegetable ingredients. The colour, being of natural derivation, may vary from batch to batch of production. Some slight variations in colouring do not represent alterations of the product.

50 mL - 1.69 oz Pack

MOISTURIZING AND RELAXING ANTI-AGING EYE CONTOUR WITH PRICKLY PEAR

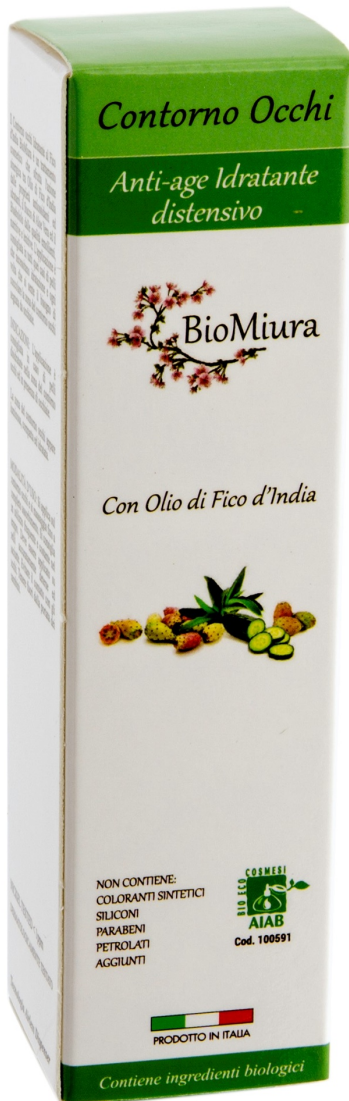

The BioMiura Prickly Pear Anti-Aging Eye Contour is a treatment targeted for the eye contour, and it exploits the synergistic action of Prickly Pear Seed Oil, with its antioxidant, regenerative and moisturizing properties; Cucumber Extract, with its decongestant and refreshing properties, which help to reduce bags and dark circles by improving circulation; Aloe Vera Juice and Bisabolol, which give the BioMiura Prickly Pear Anti-aging Eye Contour emollient, nourishing and soothing properties.

INDICATIONS: The application is recommended in all areas of dehydrated skin, and in the regions of dark circles under the eyes.

RESULTS: With use, the eye contour area will acquire a radiance along with an attenuation of puffiness and dark circles; the overall area is left feeling nourished and moisturized.

METHOD OF USE: Apply to the eye contour area and massage until completely absorbed. We recommend frequent and constant use over time. It must be applied on thoroughly cleansed and dry skin.

CHEMICAL - PHYSICAL CHARACTERISTICS: It does not contain pigments. Its characteristic colour depends on the functional vegetable ingredients. The colour, being of natural derivation, may vary from batch to batch of production. Some slight variations in colouring do not represent alterations of the product.

30 mL - 1.01 oz Pack

CLEANSING MILK WITH PRICKLY PEAR

200 mL - 6.76 oz Pack

BioMiura Prickly Pear Cleansing Milk, thanks to its natural origin, performs excellent cleansing action without attacking the skin. Prickly Pear oil, which is particularly rich in vitamin E and fatty acids such as Omega 3, 6, 9, has antioxidant, regenerative and moisturizing properties. Almond oil guarantees an emollient effect and is also appropriate for individuals with sensitive skin. The presence of Glycerine, Calendula Extract, Chamomile Extract and Aloe Vera gel helps to enhance the hydration and protection of the skin, giving a feeling of softness and comfort.

INDICATIONS: It gently removes makeup and impurities of external agents from face and eyes, while deeply nourishing and soothing the skin.

RESULTS: Following usage of this product, the skin of the face is left clean, nourished, and soft.

METHOD OF USE: Apply on a cotton pad. Rinse with lukewarm water.

CHEMICAL - PHYSICAL CHARACTERISTICS: It does not contain pigments. Its characteristic colour depends on the functional vegetable ingredients. The colour, being of natural derivation, may vary from batch to batch of production. Some slight variations in colouring do not represent alterations of the product.

PRICKLY PEAR TONIC

200 mL - 6.76 oz Pack

BioMiura Prickly Pear Tonic is formulated for daily facial cleansing.

Prickly Pear oil, which is particularly rich in vitamin E and fatty acids such as Omega 3, 6, 9, has antioxidant, regenerative and moisturizing properties. The extracts of Chamomile, Calendula, Mallow and Violet Tricolor contribute to act as emollients and helps to provide soothing properties, giving the skin a feeling of hydration and softness.

INDICATIONS: It cleanses, regenerates, and moisturizes the skin reducing redness and irritation.

RESULTS: The skin of the face is clean, radiant, and refreshed.

METHOD OF USE: Apply on a cotton pad, tapping gently on face and neck. Avoid the eye contour area.

CHEMICAL - PHYSICAL CHARACTERISTICS: It does not contain pigments. Its characteristic colour depends on the functional vegetable ingredients. The colour, being of natural derivation, may vary from batch to batch of production. Some slight variations in colouring do not represent alterations of the product.

ILLUMINATING ANTI-AGING FACE CREAM WITH SAFFRON

50 mL - 1.69 oz Pack

BioMiura Saffron Lifting Face Cream with stretching and lifting action is a next-generation lifting treatment that provides an effective response to the problem of skin aging. It takes advantage of the synergistic action of innovative ingredients, such as: saffron, a powerful antioxidant that prevents aging and gives the face tone and radiance; hyaluronic acid, which guarantees volume and high skin hydration; mullein extract, shea butter, argan oil, coconut oil, and jojoba oil, which collectively act to give the cream its emollient, nourishing and antioxidant properties.

INDICATIONS: The application of the cream is recommended in all regions of tired skin that is subject to loss of elasticity and/or has deep and evident wrinkles.

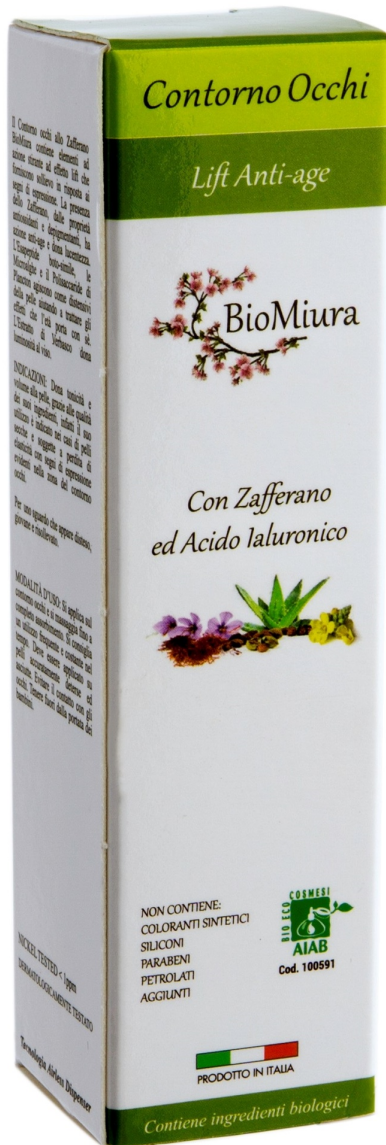

RESULTS: The Saffron face cream gives an immediate and long-lasting sensation of reshaped, relaxed, and lifted face to counteract already existing wrinkles, and give tone and volume to the skin.

METHOD OF USE: For best results we recommend frequent and constant use over time. Apply to cleansed and dry face, and massage until completely absorbed. Avoid the periorcular area.

CHEMICAL - PHYSICAL CHARACTERISTICS: It does not contain pigments. Its characteristic colour depends on the functional vegetable ingredients. The colour, being of natural derivation, may vary from batch to batch of production. Some slight variations in colouring do not represent alterations of the product.

ANTI-AGING LIFT EYE CONTOUR WITH SAFFRON

30 mL - 1.01 oz Pack

The BioMiura Saffron Eye Contour with stretching and lifting action is a lifting treatment that provides an effective response to natural skin aging. The presence of Saffron, with its antioxidant and depigmenting properties, helps to prevent aging and gives radiance. Hexapeptide botox-like, Microalgae and Plankton Polysaccharide act as skin lifting and stretching agents that reduce wrinkles and expression lines. Mullein Extract acts to even tone and provides radiance.

INDICATIONS: It counteracts already existing wrinkles, and gives tone and volume to the skin. In fact, its use is recommended in areas of dry skin that subject to loss of elasticity with deep and evident wrinkles in the eye contour area.

RESULTS: The eye contour area appears rejuvenated, relaxed, and lifted.

METHOD OF USE: Apply to the eye contour area and massage until completely absorbed. We recommend frequent and constant use over time. The BioMiura Saffron Eye Contour should be applied on thoroughly cleansed and dry skin.

CHEMICAL - PHYSICAL CHARACTERISTICS: It does not contain pigments. Its characteristic colour depends on the functional vegetable ingredients. The colour, being of natural derivation, may vary from batch to batch of production. Some slight variations in colouring do not represent alterations of the product.

PURIFYING FACE CREAM FOR MIXED AND OILY SKIN WITH ORANGE BLOSSOMS

BioMiura Orange Blossom Purifying Face Cream is ideal for impure and oily skin. Thanks to a mix of natural ingredients, such as extracts of green tea, rosemary, cucumber, vitamin H, and orange blossom water, this product has dermo-purifying, astringent and sebum-normalizing properties.

INDICATIONS: It is recommended for use in individuals with oily, impure skin that needs hydration without weighing down the skin.

RESULTS: With continual use, the skin of the face appears purified and regains its normal hydro-lipidic balance, moisturizing and reducing the shine of the skin.

METHOD OF USE: Apply the right amount of cream to the skin of the face after cleansing and massage until completely absorbed. Avoid the periorcular area.

CHEMICAL - PHYSICAL CHARACTERISTICS: It does not contain pigments. Its characteristic colour depends on the functional vegetable ingredients. The colour, being of natural derivation, may vary from batch to batch of production. Some slight variations in colouring do not represent alterations of the product.
