

MIX 30 PRO & GHOST GLAZE

FRATELLI PEZZA

Total reliability since 1970

FRATELLI PEZZA was founded in 1970 as a manufacturer of mechanical and industrial systems in general, and then subsequently dedicated itself to the sector of machinery for glass processing.

The company is particularly at the forefront in the construction of glass sandblasting and marking systems, thanks to the technical skillfulness of the founder Alessandro Pezza, who was the first to design and launch a fully automatic sandblaster on the world market.

Made in Italy

Fratelli Pezza manufactures its products in its large and recently renovated headquarters in Clusone, in the province of Bergamo, and takes advantage of a dense international distribution network.

MIX 30

*Protective coating for
sandblasted glass*

MIX 30 PRO protects and sanitizes sandblasted glass surfaces, making them water-repellent and stain-resistant.

The new formula is the result of an innovative technology which creates a filler that prevents the adhesion of dirt, limescale, fingerprints and impurities that tend to deposit into the micropores created by the sandblasting process.

PRO

SURFACES

THE PRODUCT CAN BE APPLIED ON:

- > ENTIRELY SANDBLASTED GLASS
- > PARTIALLY SANDBLASTED GLASS
- > LIGHTLY SANDBLASTED GLASS
- > DECORATED OR FROSTED GLASS

IDEAL FOR:

- > PARTITION WALLS
- > SHOWER CABINS
- > DOORS
- > PARAPETS
- > STAIRS
- > WINDOWS
- > TABLES
- > FURNISHING ELEMENTS
- > KITCHEN TOPS AND SPLASH GUARDS
- > BATHROOM FURNITURE
- > FLOOR TILES

APPLICATION

THE PRODUCT IS READY TO USE AND MUST NOT BE DILUTED.

- > Clean the surface to be treated.
- > Wait until the surface has completely dried before applying the product.
- > Spray or pour the product on the sandblasted surface.
- > Spread the product with a microfibre cloth until it dries evenly over the surface.
Once sprayed, the liquid must be immediately spread.

COMPATIBILITY

- > It does not yellow.
- > High resistance to UV rays.
- > The treated surface can be installed with the use of neutral silicone, acetic or MS polymer.
- > It is compatible with many materials: aluminum, steel, gaskets, ceramic, marble, wood, corian, etc.
- > It can be applied on glass that has previously undergone nano-ceramic inks digital printing (after oven treatment).

DRYING TIMES

- > The drying process is very quick, about 1 minute to the touch.
- > The treated surface can be immediately handled, packaged or laid on site.

YIELD & DURATION OF TREATMENT

- > The coverage is about 100 m² / liter with a single pass even on etched or very porous sandblasted surfaces.
- > With proper maintenance, the treatment lasts for more than 6500 washes.
- > The product can be easily reapplied.

MAINTENANCE OF THE TREATED SURFACE

- > Only use water and neutral detergents with a soft cloth.

SANDBLASTING TECHNIQUE

Sandblasting is one of the most used techniques for glass decoration as well as to ensure privacy in public and private environments. The sandblasted surface, becoming porous, tends to capture fingerprints and impurities, with unsightly results.

For this reason, **Fratelli Pezza**, leader in the production of sandblasting machines for flat glass, has been offering quality products for the care and protection of sandblasted surfaces for more than 20 years, so that its customers can create design solutions suitable for any environment.

GHOST

*Invisible and
water-repellent protection
for float and extra-clear glass*

GHOSTGLAZE protects and sanitizes transparent glass surfaces, making them water-repellent and stain-resistant.

The new formula is the result of an innovative technology which creates a filler that prevents the adhesion of dirt, limescale, fingerprints and impurities that tend to deposit on the glass surface.

GLAZE

SURFACES

THE PRODUCT IT IS WIDELY USED FOR THE TREATMENT OF GLASS SURFACES IN PUBLIC OR PRIVATE ENVIRONMENTS BOTH INDOORS AND OUTDOORS.

IDEAL FOR:

- > PARTITION WALLS
- > SHOWER CABINS
- > DOORS
- > PARAPETS
- > STAIRS
- > WINDOWS
- > TABLES
- > FURNISHING ELEMENTS
- > KITCHEN TOPS AND SPLASH GUARDS
- > BATHROOM FURNITURE
- > FLOOR TILES

APPLICATION

THE PRODUCT IS READY TO USE AND MUST NOT BE DILUTED.

- > Clean the surface to be treated.
- > Wait until the surface has completely dried before applying the product.
- > Spray or pour the product on the glass.
- > Spread the product with a microfibre cloth until it dries evenly over the surface.
Once sprayed, the liquid must be immediately spread.

COMPATIBILITY

- > It does not yellow.
- > High resistance to UV rays.
- > The treated surface can be installed with the use of neutral silicone, acetic or MS polymer.
- > It is compatible with many materials: aluminum, steel, gaskets, ceramic, marble, wood, corian, etc.

DRYING TIMES

- > The drying process is very quick, about 1 minute to the touch.
- > The glass can be installed and wet after 24 hours from the treatment and can be cleaned with neutral detergents after 72 hours using a soft microfiber cloth.

YIELD & DURATION OF TREATMENT

- > The coverage is about 100 m² / liter with a single pass.
- > With proper maintenance, the treatment lasts for more than 6500 washes.
- > The product can be easily reapplied.

MAINTENANCE OF THE TREATED SURFACE

- > Only use water and neutral detergents with a soft cloth.
- > The treatment makes the surface "easy to clean".
