REBECCA Enok Stairlift

We are an Italian-based lift company offering comprehensive solutions to overcome architectural barriers, drawing on decades of experience in the field. Specializing in platform stairlifts suitable for both indoor and outdoor use.

Our platform stairlifts are designed to transport wheelchairs or individuals seated on folding chairs, as well as carry goods like groceries alongside the user and even heavy materials (load up to 300kg).

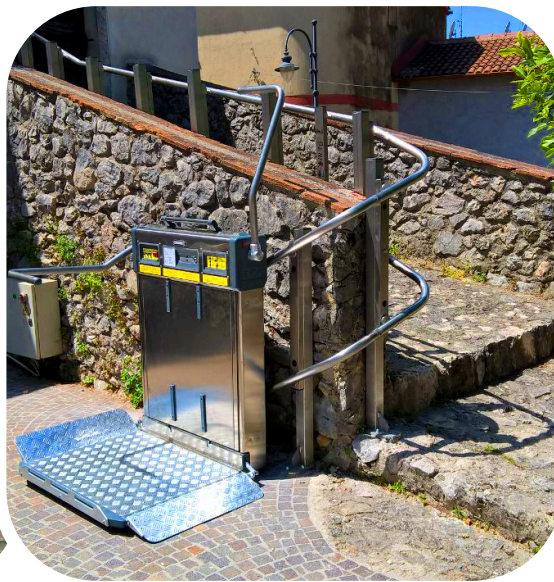

They stand out as the most versatile on the market, capable of installation on long rail runs, narrow staircases, tight turns, and even very steep inclines, enduring fierce outdoor weather conditions thanks to the high-quality materials we employ, such as stainless steel rails.

Our highly specialized team is dedicated to every aspect of the business process, providing meticulous attention from initial studies through to after-sales service.

REBECCA FOR STRAIGHT STAIRS

The Rebecca Straight is intended for use on straight stairs excellent both indoors and outdoors, public and private accommodation also can move loads of up to 300 kg effortlessly and with low wear. It is safe and perfect for anyone needing to overcome the challenge of stairs.

REBECCA FOR CURVED STAIRS

Our Rebecca for Curved Stairs is our customizable curved stairlift platform, designed to navigate all types of curved stairs. Whether indoors or outdoors, in any accommodation, we provide a tailored solution for even the most complex staircases.

OUR DESIGN RAILS :

Our track features two smooth stainless steel tubes, eliminating the need for any treatment. This design, serving as a perfect handrail, ensures safety and accessibility for all on the stairs (Adults benefit from the upper tube, while children can safely use the lower tube)

REBECCA is our solution for both straight and curved stairs, suitable for both indoor and outdoor environments. Our platform stairlift can be folded and parked both at the starting and ending points of the stairs, with minimal space requirement. Additionally, the stairs will remain perfectly accessible for normal use.

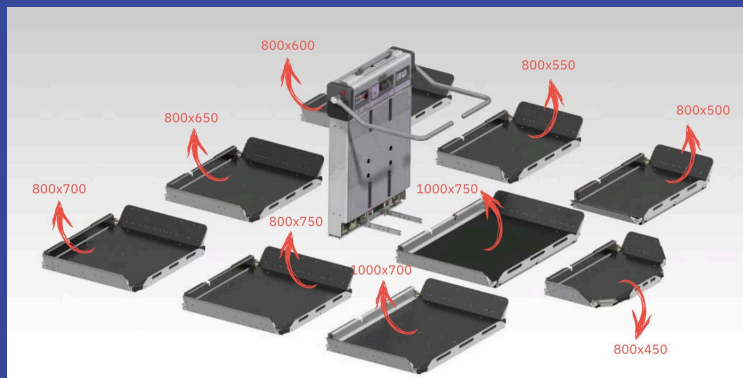

- 300kg
- Traction drive (lifting mechanism)
- Speed 10cm/s
- 24 volt CC
- Motor 0.40kw
- EN81-40
- stainless steel rail system

Rebecca is designed according to safety and health requirements compliant with the UNI EN81-40 2021/CE standard.

We at Enok have thought of everything: 9 different loading platform sizes to adapt to every need, seamlessly fitting into existing designs without requiring any renovations.

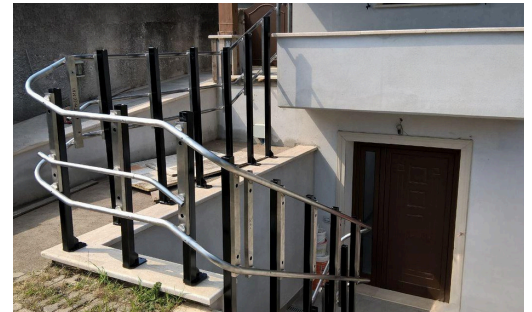

Additionally we know not all staircases are the same, so we offer a range of optional features to suit every request.

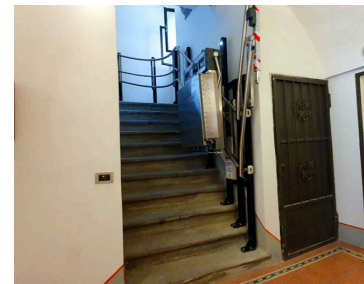

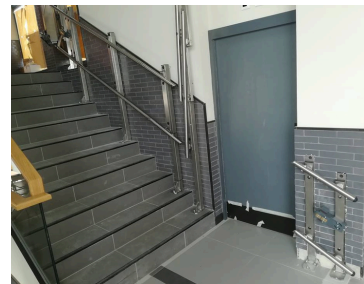

You can find further information on our website: <https://www.enoksrl.com/>

OUR INNOVATIVE RAILS

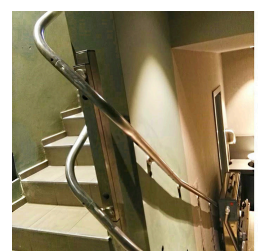

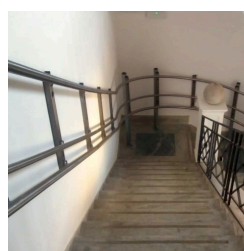

Rebecca is equipped with an anti-blackout system (in case of a power outage) to ensure maximum safety in any condition. It features a double-tube track in stainless steel, entirely smooth without any teeth, holes, or racks. This design eliminates the need for lubrication or special treatments, making it an ideal handrail.

Another innovation in our Rail system is the LIFT UP RAIL which allows overcoming obstacles such as doors and windows along the staircase.

In addition, our rail, crafted with high-quality materials, can be tailored to fit any staircase type. It seamlessly accommodates all types of curves: negative, standard, helical, spiral, and more.

MADE IN ITALY
