The smallest inclined  
platform lift of

**ENOK**  
Up to eQuality

# THE NEW REBECCA

REBECCA SLIM is ENOK's newest platform stairlift, crafted to enhance safety and accessibility in any architectural setting. Engineered with precision, it combines elegance and reliability to meet diverse needs effortlessly.

- ☑ Featuring a slender and sophisticated profile, **REBECCA SLIM** is perfectly suited for fitting into narrow or constrained areas.
- ☑ Able to manage steep slopes and both internal / external curves of the staircase, it ensures an optimal fit for any environment.
- ☑ The system features a **machine body** with a platform designed to handle both constant and variable inclines, as well as straight and curved paths. With **customizable platform sizes**, it can make nearly any building accessible.
- ☑ The **dual tubular stainless steel system**, which functions as both a **handrail and guide**, allows the stairlift to effortlessly navigate *all types of staircases, including spiral ones, while ensuring optimal safety.*
- ☑ The **REBECCA SLIM** folds away when not in use, freeing up space for ambulant users. Add a fold down seat (optional) for a versatile access solution, and customise colours to match your building.

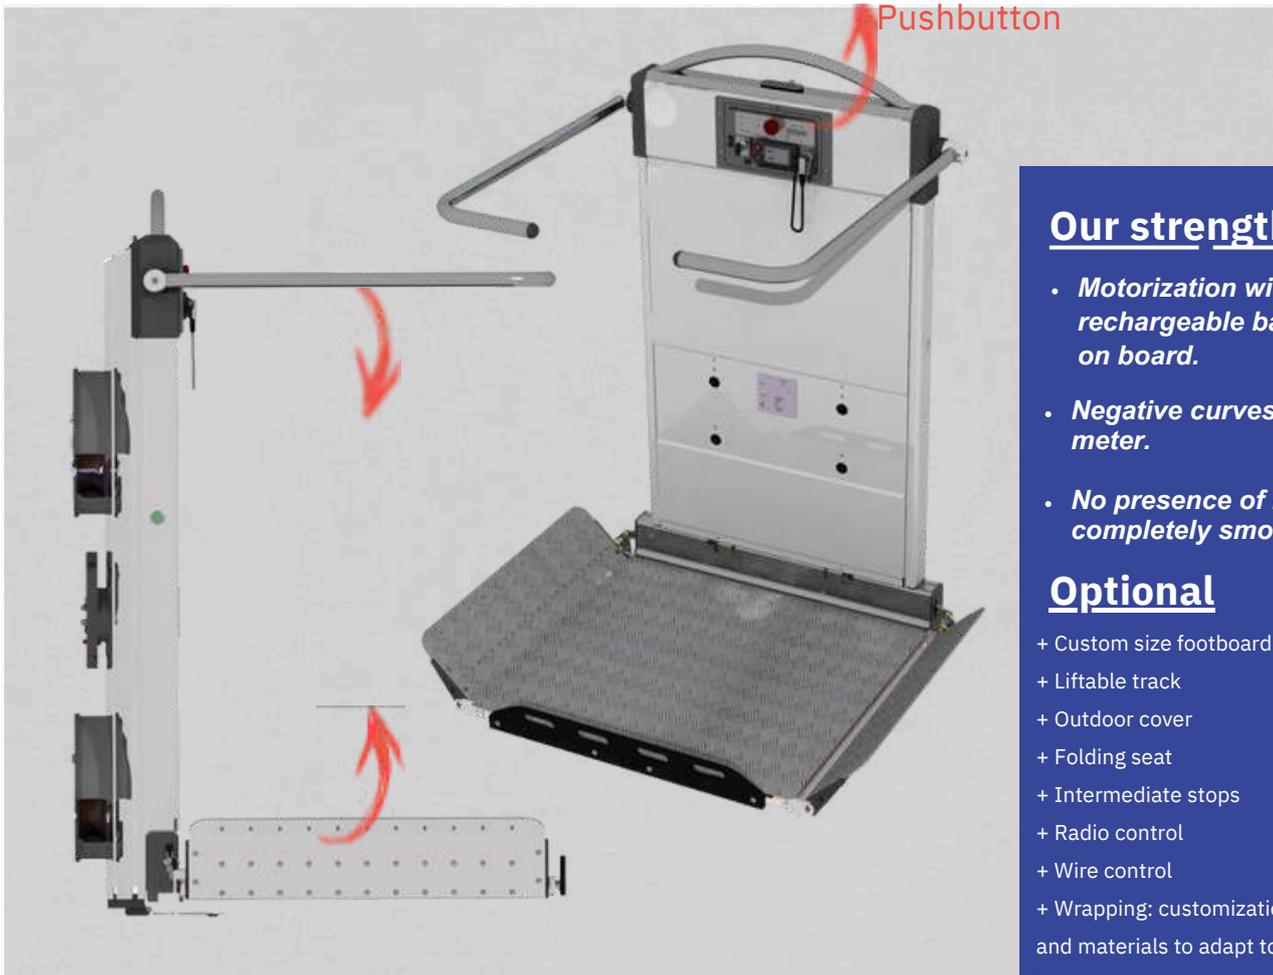

## Safety and Comfort: The ENOK Traction System

At ENOK, we use the **traction drive system** in our stairlifts for its superior reliability and smooth performance. Unlike traditional gear or belt drives, which depend on teeth or grooves, the traction drive relies on frictional contact between surfaces, reducing wear and maintenance. Our choice ensures enhanced safety and comfort for users.

### Devices:

- AISI 304 stainless steel track (optional AISI 316)
- 24V battery power supply with charger
- Smooth start/stop and speed reduction when cornering
- Fully automatic version

## Our strengths

- *Motorization with battery rechargeable batteries located on board.*
- *Negative curves with radius 1 meter.*
- *No presence of holes, teeth, completely smooth guide.*

## Optional

- + Custom size footboard
- + Lifiable track
- + Outdoor cover
- + Folding seat
- + Intermediate stops
- + Radio control
- + Wire control
- + Wrapping: customization in various colors and materials to adapt to the decor of your home.

### Rebecca SLIM stairlift for straight and curved stairs

Thanks to its small size and the track made entirely to measure, it is able to enter the narrowest and most cramped spaces by tackling straight and/or curved paths. The multiple fixing solutions, through the use of supports and pillars or additional anchoring elements, guarantee a solid hold and therefore greater safety.
