

**Tanks for road, civil  
and industrial systems**

# BUSINESS

It all started with a blacksmith's forge. Since then, a long road was built with attention to safety, respect for the environment and attention to detail.

## 1946

Officine Cemin blacksmith's forge is set up.

## 1966

The production of the first tanks begins.

Established in 1946 as a blacksmith's forge, "Officine Cemin" imposes in the twenty years of the post-war period in light manufacturing up to the manufacture of tanks. Professionalism and experience led the firm in the early 80s to establish "Serbatoi Cemin Eurotank", a new location and the first double wall tanks. Since then, tens of thousands of tanks have been installed, in Italy and worldwide, always at the cutting edge of technology and in compliance with all applicable regulations.

The 2000-year headquarters and the path of professional growth that has always accompanied the company have led us to the present day, where the new "Serbatoi Cemin Eurotank soc. coop" is motivated and determined to confirm the business as a benchmark of the sector, according to a spirit that is based on history and is the result of respect for the environment that surrounds us, the beautiful Primiero Valley, North-Italy.

# 1980

Double wall tanks manufacture started.

# 2000

New headquarters and qualified production.

# Tod

The new company "Serbatoi Cemin Eurotank soc. coop." is transformed and updated, ready for the challenges of tomorrow.

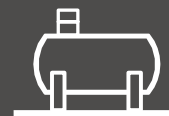

# TANKS

Quality. Security. Environment.

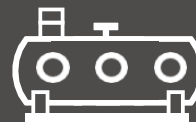

These are the three pillars that made our tanks different from any other production.

Underground tanks

Above ground tanks

Special project tanks

Pellet tanks

From the attention paid at the production of a product can depend the safety of those who work and the surrounding environment.

Each of our tank is the result of continuous controls and constant technical and technological development. Over 60 years of know-how and no objections are the guarantee of an always efficient and safe production: this is what we mean by the word "quality".

From quality to excellence.

At today, all our tanks are in compliance with the most recent Italian and European regulations. This confirms the level of work behind each product and is a fundamental step to certify to all clients the goodness of their choice.

# WELLS

Safe in every aspect and suitable for any context. Our wells are designed for any type of need.

Thanks to the experience gained over the years, Serbatoi Cemin is able to guarantee the construction of different types of wells:

watertight for vehicular areas B125-D400, for green areas, flower beds or islands; at fixed and adjustable height; special for renovations and with antitheft alarm systems.
