

## ABOUT US

**Unikolegno is an Italian company specialized in the production of high quality prefinished wooden floors, for over twenty years.** Our parquets combine the value of a truly 'made in Italy' product with design, tradition and experience of our master craftsmen, who work with complete respect of the environment and human health. **Our wooden floors are rigorously manufactured in our production establishment in the province of Treviso**, in order to guarantee an excellent product and the utmost care for every detail.

**Innovation and tradition coexist at Unikolegno, where the manufacturing industry meets the skilful hand of master craftsmen.**

**11.000 sqm  
company**

**Over 10 ML  
turnover 2022**

**Export to over  
30 countries**

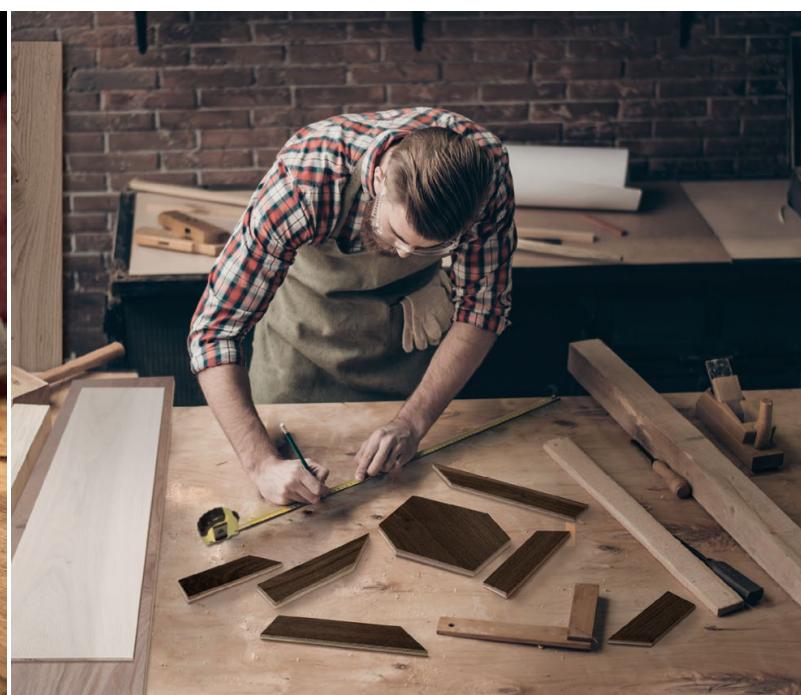

# REASONS TO CHOOSE UNIKOLEGNO

## 1. TRUE MADE IN ITALY

Our wood floors are the authentic expression of the outstanding uniquely Italian ability to give shape and elegance to products, skilfully combining the search for design, innovative technologies and the art of craftsmanship.

**We are one of the very few companies in Italy to manage the entire production process in-house:** from the seasoning of the raw material to the packaging of the parquet. Accurate control of every step in the process guarantees top quality, precision of the finish and the most beautiful aesthetic result.

**The 100% Made in Italy certification rewards the excellence of our creations and guarantees that the entire wood flooring cycle is carried out in Italy.**

## REASONS TO CHOOSE UNIKOLEGNO

### 2. SUSTAINABILITY

Unikolegno produces floors in harmony with nature. The precious wood species come from sustainable forests and are certified FSC®. The wood floors are produced using processes that respect the environment and people's health.

gestione forestale  
responsabile

### 3. INDOOR WELL-BEING

Unikolegno pays special attention to producing parquets with extremely low emissions of volatile organic compounds (VOC). This provides a healthier living environment with better air quality.

Numerous international certifications prove the quality of our products:

- Indoor Air Comfort Gold from Eurofins
- French A+ rating test for emissions in indoor environments
- German AgBB
- the Japanese Jis Jas standard that guarantees zero formaldehyde emissions thanks to class F\*\*\*\*.

## REASONS TO CHOOSE UNIKOLEGNO

### 4. WIDE RANGE OF PRODUCTS

**The flexibility of the manufacturing capacity and the artisanal production processes allow the creation of completely customised and unique parquet**, thanks to the collaboration with designers, architects and customers.

The company's offers include 10 wood species to choose from (Doussié, Iroko, Larch, American and European Walnut, American Elm, Oak, Ash, Teak and Wengé), classified into commercial, rustic or forest choice, based on the presence of knots, sapwood, cracks, grain distortions and pith rays. The choice is also vast in terms of processing: pre-sanded, brushed, hand planed, saw cut, undulation and hollowing or irregular bevel.

**Uniklegno offers an extraordinary range of combinations in the choice of wood species, formats, finishes and colours.**

## REASONS TO CHOOSE UNIKOLEGNO

### 5. UNIQUE PROPOSALS

Each wooden floor is created from a unique combination of wood species, finishes and formats. Our parquet floors can be pre-sanded, brushed, hand planed or enriched with textural effects such as saw cut or undulations and hollows. **Apart from the classic varnishing and oiling effects, other special treatments are possible.**

#### EVO VARNISHING

Unikolegno offers the exclusive EVO varnish that gives parquet the feeling of a completely natural product, barely veiled by a water-based varnish with 5-gloss opacity.

#### MATERIC OAK

Precious surface textural effects, small hollows and irregular finishes with a deliberately rough and natural appearance enrich this parquet. The application of the filler in contrast in the cracks creates amazing textures to the eye and touch.

MATERIC OAK

#### THERMO TREATMENT

Thermo treatment is the core of Unikolegno's reputation. This completely natural process, through heat and steam, infuses the wood with beautiful colours with more or less dark tones depending on the temperature to which it is subjected.

#### ELITE LINE

Special finishes and manual operations that are the expression of the highest Veneto artisan mastery, guarantee exclusive and refined proposals. The CITY collection has been launched, characterised by new colours and HILLS processing, which reproduces slight undulations in the board and gives the floor an elegant and soft effect.

## REASONS TO CHOOSE UNIKOLEGNO

### 6. CUSTOMISED SOLUTIONS

**Parquet floors and interior design can be completely customised by designing special solutions.**

For instance, customisation and design come together in the Quadrotte, embellished with inlays in steel, marble, wood and resin, handmade to form geometric patterns and extraordinary colour combinations. The patterned floors are custom-made, emphasising the colours of the wood and the natural grain to create an emotional interplay of geometry and colour combinations.

**Unikolegno also enables to develop fully co-ordinated fitting projects with made-to-measure staircases, vertical coverings and boiserie.**

**We can realise  
your project  
made-to-measure.**

## REASONS TO CHOOSE UNIKOLEGNO

### 7. PEOPLE

Our wooden floors are the result of the creativity and skill of our artisans and designers. **We believe our people are the added value for Unikolegno products.** Unique solutions are born from listening to the customer, from assisting and guiding the customer in the choice of the most suitable solution, from the willingness to customise our products and from the attention paid to the finest detail.
