

AGRI-HELPER MACHINES

ROCKY

Made in Italy

It improves **PERFORMANCE** and
WORK QUALITY on rows

www.rocky-agri.com

Rocky is the evolutionary element that brings a new concept of work in agriculture.

The Rocky project was born from a young start-up, which based its activity on improving and updating, with the use of new technologies, the idea of agricultural facilitator projecting this field in the future.

The features that make Rocky a unique and indispensable device are aimed at improving quality of work, care of the environment and protection of workers, so that they guarantee new motivations, eliminate eventual loss of time and maximize productivity.

The primary purpose is to meet the needs and the requirements that arise every day in country life, where manual work is done with effort and passion.

WHAT IS ROCKY?

Rocky is an agri-helper machine with an electric motor. Thanks to our patented system and careful design, this innovative vehicle allows to reduce time, physical fatigue and costs by improving the conditions of handiwork in your agricultural production.

Our goal is to offer optimal and complete service, in support of performing and ecological professional product with made in Italy quality.

WHERE TO USE ROCKY?

Rocky is designed for repetitive agricultural tasks which require body bending and lateral displacements.

It finds numerous fields and types of application: vineyards, various crops of fruit and vegetables, greenhouses, biological productions and breeding.

WHY USE ROCKY?

time and
costs saver

FEEDING COST

Agricultural
diesel fuel

Electric current

KM OF WORKED ROWS

Without Rocky
2,5 linear km per day

With Rocky
3,25 linear km per day

*GREATER STABILITY, RESISTANCE AND
OPERATING RANGE*

4 STEERING WHEELS

HANDS-FREE ADVANCEMENT

BETTER VALUE FOR MONEY

MADE IN ITALY

The innovative design, the mechanics and the functionalities of Rocky are designed to facilitate and speed up movements, and therefore to increase productivity; the structure is designed to prevent problems of physical nature and decrease the risk of accidents.

Rocky is the right balance between classical agriculture and the mechanized one which is more invasive and less healthy for workers, plants and the environment.

Rocky can be easily driven by anyone and it does not require any type of license or qualification.

electric
motor

The heart of Rocky is a powerful electric 300W motor, integrated with a completely sealed oil bath differential system which does not require any kind of maintenance. This allows to maintain formidable performance respecting the environment.

improve
posture

Rocky allows you to move around and carry out your working tasks along the rows, always remaining seated. During the work your back remains straight and the stress on the spine and muscles is reduced. In this way the risk of pains and injuries is minimized.

it reaches
slopes up to 30%

30%

Thanks to its high-performance engine and auto-temporized electric-brake (which blocks automatically eventual passive descent of the vehicle), Rocky also works on slopes up to 30%, making it suitable for working on steep and irregular fields.

**does not tap
toxic smokes**

The electric motor does not produce toxic exhaust fumes that are harmful for the environment and for people health. Being free of toxic emissions Rocky is suitable for a prolonged use.

silent

Rocky's electric motor is extremely quiet. In addition to minimizing noise pollution, it reduces stress, the risk of accidents and does not require any kind of protection.

customizable
options

Rocky can be implemented with options making it more suitable and adaptable to different types of work, context and use.

Storage container for transporting material and tools. Available in two sizes:
Large (cm 34x25x9), Small (cm 28x20x7).

Extra removable batteries with charging bay. Allow for very long sessions, without interruptions due to re-charging needs.

Tow hook. Required for the addition of a transport cart.

The **wraparound saddle** (standard in the "Hands-free" variant) offers greater back support.

Speed regulation potentiometer. Allows you to adjust the vehicle speed progressively compared to standard slow/fast gears.

It is possible to adjust the seat height thanks to the **raising kits** (+3 and +6 cm).

USB power supply converter for charging accessories and mobile devices.

Rocky is available both in the standard colours **Sand/Black** or **Military Green/Black** or in **two custom colours** with **sublimation printing**.

ROCKY ONE Freehands

The "Freehands" version of Rocky One is equipped with our patented "torsion advancement system".

The progress system allows you to check the movement and the direction of the vehicle through simple body movements leaving the operator's hands free. The torsion activates the motor and directs the lateral movement, while the steering is controlled by the swing of the bust.

ROCKY ONE *Mountain*

Rocky One "Mountain" is equipped with a joystick system of acceleration control.

This version is suitable for particularly steep fields. It offers greater control through the use of the joystick and guarantees excellent stability even in presence of slopes, thanks to the auto temporized electric-brake installed in our Rocky One models.

Dimensions	
Sitting height:	45-56 cm
Length:	120 cm
Width:	47 cm
Weight	60 Kg
Safety Payload Weight	150 Kg
Battery	AGM
Capacity:	22 Ah
Weight:	8 Kg
Charging time:	about 6h
Autonomy:	min. 6h / max. 12h
Motor	Permanent magnet motor
Power source:	24v
Power:	300 w (0,3 Kw)
Max. speed:	3-6 Km/h
Frame	s235jr
Braking system	self-timed electric brake
Safety device	“man presence” “emergency stop”
Wheels	
Tyres:	all terrier 4.00-4 (p: 1,5 bar)
Driving wheels:	2
Steered wheels:	4

TECHNICAL DATA

AFTER SALE SUPPORT

Our priority is to provide an innovative product and a complete service, for this reason we have a support service during the after-sale period.

Our technical team is always available. In case of necessity we will provide a courtesy vehicle within 24 hours until your vehicle is repaired or replaced.
