

# ANTI HANGOVER

4.5 Customer Reviews

“Tried it after a wedding.  
I’ve never felt this good the day after.”  
Andrea

## Cos'è e come funziona

RREBOOT is our 10ml stick-pack food gel with a light lemon flavor. It is designed to help you better manage the “after a night out” in a practical and immediate way: you can carry it with you at all times and take it at the right moment.

How does it work? If taken after 2–3 glasses of wine, it may help reduce blood alcohol levels by up to 60%. If taken after more drinks, it helps significantly reduce next-day after-effects, supporting your well-being after an intense night out.

## 01. Went a bit too far?

Even on special occasions, it can happen to anyone to have that extra drink.

## 02. Take Reboot

When you're done drinking, take a REBOOT — it doesn't matter whether you take it half an hour after your last drink or right before going to bed.

No need to add water: REBOOT is ready to drink.

## 03. Say goodbye to the hangover

Reboot grazie alla sua formula innovativa e completamente naturale riduce notevolmente i postumi del giorno dopo.

Dimenticati il mal di testa e tutti quei sintomi fastidiosi.

# How to Use

REBOOT is easy and effective to use: it's ready to drink and works in just three simple steps. If taken after 2–3 drinks (excluding spirits), it may help reduce blood alcohol levels by up to 60%.

# Display box

- Countertop display
- Available in 30- and 60-piece formats
- Fully recyclable
- Dimensions: 24 × 14 × 6 cm

## 01. Test

Use the first disposable breathalyzer to check your blood alcohol level on the spot.

## 03. Test

Use the second disposable breathalyzer to check the before-and-after difference and see the reduction in your BAC.

## 02. Reboot

Take the REBOOT stick as directed in the kit.

# Reboot Kit Antihangover

We created the REBOOT Kit to make the experience simple and measurable: one REBOOT stick + two disposable breathalyzers.

Take the first test to check your blood alcohol level, take REBOOT, then use the second test to see the before/after difference immediately.

A simple “before/after” approach to support awareness and responsible choices.

The tests help you understand your condition, but they are not a green light to drive. If you have been drinking, do not drive and always follow the label instructions.

# About

## Dinamo Group

Dinamo Group (founded in 2017) is an Italian company that produces and markets flavorings for the Food & Beverage industry and develops innovative, sustainable, and natural food products through an integrated model that combines in-house R&D, manufacturing, and direct e-commerce/retail channels through proprietary brands.

We operate in both B2B and B2C, including contract manufacturing/private label projects, with a fast co-design approach (up to <60 days end-to-end), lean processes, and flexibility in customization and small batches.

We focus on “clean” formulations, as well as traceability and quality control, with HACCP procedures and ISO certifications, while maintaining constant attention to sustainability (supplier selection, packaging optimization, and waste reduction).
