

Pietra di Matraia

From our proprietary quarries we extract, process and customize exclusively Pietra di Matraia, a stone that represents true excellence **made in Tuscany**.

Matraia stone does not degrade ...
... it evolves slowly in the course of time without compromising the functionality and the value of the object.

Pietra di Matraia

Matraia stone has certain **unique** features compared to other sandstones:

- negligible water absorption;
- resistant material as far as scientific parameters and applicability in difficult contexts;
- great versatility of the material that allows for countless types of finishing, among which the **mirror-effect polish**, absolute particularity of Matraia stone.
